Hi Bill,
Just wanted to let you know I have been doing some more research on powerline saftey and we should be at least 385 feet is considered safe from the powerline and we are not. We should be okay with the current powerline because of the trees but the new one would infact put us in the danger zone.
Terri Mjolsness
http://www.feb.se/EMFguru/Current-Messages/home-safe-power.html

here are few more sites to look at
http://www.google.com/search?q=power+line+safe

This information was given to me by the EPA
Please check into it, also could you send me back a quick email to let me know you have received this and the last email I sent.
Also, can you give me the date and time of the heiring so I can attend.
