Application for Certificates of Need for the Prairie Island Nuclear Generating Plant

Table of Contents

1 Summary 1-1

1.1 Introduction 1-1

1.2 Structure of Petition 1-2

1.3 Background 1-3

1.4 The Prairie Island Plant 1-4

1.5 Additional Dry Cask Storage Project Description 1-5

1.5.1 Alternatives to the Continued Operation of Prairie Island 1-5

1.5.2 Alternatives to Additional Dry Cask Storage 1-7

1.6 Environmental Information – Additional Dry Cask Storage 1-8

1.7 Need for Power Uprate 1-8

1.8 Power Uprate Project Description 1-9

1.9 Alternatives to the Proposed Power Uprate Project 1-10

1.9.1 Non-Construction Alternatives 1-10

1.9.1.1 Demand-Side Management 1-10

1.9.1.2 Increased Efficiency of Existing Facilities 1-10

1.9.1.3 Long-Term Purchased Power Agreement ("PPA") 1-11

1.9.1.4 Short-Term Purchased Power 1-11

1.9.1.5 New Transmission Lines 1-11

1.9.1.6 Distributed Generation 1-12

1.9.1.7 Reduced Project Size 1-12

1.9.1.8 No Facility 1-13

1.9.2 Construction Alternatives 1-13

1.10 Environmental Information – Power Uprate 1-13

1.11 Certificate of Need Criteria 1-14

1.11.1 Minn. R. 7855.0120, subd. (A) & Minn. R. 7849.0120, subd. (A) 1-14

1.12 Conclusion 1-18

2 General Information and Regulatory Permits 2-1

2.1 Section Summary 2-1

2.2 General Information 2-1

2.3 Description of Business and Service Area 2-2

2.4 Description of Proposed Projects 2-2

2.4.1 Additional Dry Cask Storage 2-3

2.4.2 Power Uprate 2-3

2.5 Other Filings, Regulatory Requirements, and Permits Required 2-4

2.5.1 Additional Dry Storage Casks Filings/Permits 2-4

2.5.1.1 Certificate of Need – Minnesota Public Utilities Commission 2-4

2.5.1.2 Spent Nuclear Fuel Storage Regulations, 10 CFR 72 – Nuclear Regulatory Commission 2-5

2.5.2 Power Uprate Filings/Permits 2-6

2.5.2.1 Certificate of Need – Minnesota Public Utilities Commission 2-7

2.5.2.2 LEPGP Site Permit - Minnesota Public Utilities Commission 2-8

2.5.2.3 Operating License Amendment – Nuclear Regulatory Comm. 2-8

2.5.3 Minnesota Environmental Review 2-9

2.5.3.1 Dry Storage Environmental Impact Statement 2-9

2.5.3.2 Power Uprate Environmental Report 2-10

2.5.4 Resource Plan 2-11

2.5.5 Other Project Permits 2-11

2.6 Fee Determination 2-12

2.6.1 Additional Dry Cask Storage 2-12

2.6.2 Power Uprate 2-12

2.7 Officer Certification 2-13

3 Prairie Island Plant Information and Project Description 3-1

3.1 General Plant Information 3-1

3.2 Pressure Water Reactor Operation 3-5

3.3 Description of Fuel and Operating Cycle 3-6
3.4 Fuel Availability 3-7
3.5 Spent Fuel Pool 3-8
3A Additional Dry Cask Storage Project Description 3-11
3A.1 Additional Dry Cask Storage Proposal 3A-11
3A.2 Dry Cask Storage System 3A-13
3A.2.1 TN-40 Cask 3A-14
3A.2.2 Lifting Yoke 3A-15
3A.2.3 Transfer Trailer 3A-17
3A.2.4 Vacuum Drying System 3A-18
3A.2.5 Transportation Impact Limiters 3A-19
3A.3 Operations 3A-20
3A.3.1 Canister Loading 3A-20
3A.3.2 Transport of the ISFSI 3A-23
3A.3.3 Removal for Offsite Shipment 3A-24
3A.3.4 Decommissioning of the Storage Facility 3A-25
3A.4 Pressure Monitoring System 3A-25
3A.5 Life of the Storage Facility 3A-26
3A.6 ISFSI Design, Expansion, Cost and Schedule Information 3A-26
3B Extended Power Uprate Project Description 3B-28
3B.1 History of Power Uprate 3B-28
3B.2 Power Uprate Proposal 3B-29
3B.3 Necessary Plant Modifications 3B-30
3B.4 Impact on Plant Operations 3B-31
3B.5 Impact on Spent Fuel Produced 3B-32
3B.6 Project Cost, Life and Availability Information 3B-32
3B.6.1 Canister Loading 3B-32
3B.6.2 Service Life 3B-32
3B.6.3 Average Annual Availability 3B-32

4 Alternatives to Continued Operation of Prairie Island 4-1

4.1 Section Summary 4-1

4.2 Methodology and Tools for Alternative Evaluation 4-1

4.2.1 Modeling Inputs 4-3

4.2.1.1 Base Case Assumptions 4-3

4.2.1.2 Load Forecast 4-3

4.2.1.3 Existing Generation Fleet 4-4

4.2.1.4 Renewables 4-4

4.2.1.5 Emissions 4-5

4.3 Alternatives Evaluation for Additional Dry Cask Storage 4-6

4.4 Modeling Assumptions for Additional Dry Cask Storage 4-6

4.4.1 Capital Investments 4-6

4.4.1.1 Steam Generator Costs 4-7

4.4.1.2 Dry Cask Storage Costs 4-8

4.4.1.3 Relicensing Costs 4-8

4.5 Out of Model Adjustments 4-9

4.6 Alternative Screening 4-9

4.6.1 Demand Side Management ("DSM") 4-9

4.6.2 Renewables 4-10

4.6.3 No Facility 4-11

4.7 Generation Alternatives 4-11

4.7.1 Prairie Island Life Extension and Replacement Alternatives 4-12

4.7.1.1 Base Case – Continued Operation of Prairie Island 4-12

4.7.1.2 Super Critical Pulverized Coal ("SCPC") Replacement 4-12

4.7.1.3 "Unconstrained" Replacement 4-12

4.8 Strategist Analysis & Results 4-13

4.9 Sensitivity Analysis 4-14

5 Dry Cask Storage Alternatives for Prairie Island 5-1

5.1 Section Summary 5-1

5.2 Alternatives to On-Site Storage 5-2
5.2.1 Reprocessing Spent Nuclear Fuel 5-2
5.2.2 Existing Off-Site Storage Facilities 5-3
5.2.3 Private Fuel Storage Initiative 5-3
5.2.4 Yucca Mountain 5-5
5.2.4.1 Challenges to the Development of Yucca Mountain 5-5
5.2.4.2 Funding Challenges 5-5
5.2.4.3 Judicial Challenges 5-6
5.2.4.4 Prospects 5-6
5.3 Alternatives to Increase Storage Pool Capacity 5-7
5.3.1 Consolidation 5-7
5.3.2 Extend Operation by Re-racking to Increase Pool Storage 5-8
5.3.3 Construct a New Pool On-Site 5-9
5.4 Alternative Dry Cask System Technologies 5-9
5.4.1 Non-Canisterized Storage System 5-10
5.4.2 Horizontal Canister Storage System 5-12
5.4.3 Vertical Canisterized Storage Systems 5-16
5.4.4 Modular Vault Dry Storage System 5-19
5.5 Alternatives of a Different Size 5-24
5.6 Alternative Site 5-24
6 Alternatives to Extended Power Uprate 6-1
6.1 Section Summary 6-1
6.2 Need Discussion 6-2
6.3 Methodology for Evaluating Alternatives 6-2
6.3.1 Evaluation Criteria 6-3
6.3.2 Non-Construction Alternatives 6-4
6.3.2.1 Demand-Side Management 6-4
6.3.2.2 Increased Efficiency of Existing Facilities 6-4
6.3.2.3 Long-Term Purchased Power 6-5

6.3.2.4 Short-Term Purchased Power....6-5
6.3.2.5 New Transmission Lines....6-6
6.3.2.6 Distributed Generation....6-6
6.3.2.7 Reduced Project Size....6-7
6.3.2.8 No Facility....6-7
6.3.2.9 Summary of Non-construction Alternatives....6-7
6.3.2.10 Qualitative Screening of Alternatives....6-8
6.3.2.11 Fossil Fuel Technology Screening....6-9
6.3.2.12 Renewable Resource Technology Screening....6-9
6.3.2.13 Emerging Technology Screening....6-10
6.4 Quantitative Modeling or Alternatives....6-11
6.4.1 Base Case....6-11
6.4.2 Prairie Island Power Uprate Project....6-11
6.4.3 Hypothetical 164 MW Biomass Plant....6-12
6.4.4 Hypothetical 164 MW Coal PPA....6-12
6.4.5 Unconstrained....6-12
6.5 Economic Comparison of Alternatives....6-13
6.6 Sensitivity Analysis....6-13
6.7 Rate Impact....6-15
6.8 Emission Comparison of Alternatives....6-16
6.9 Operating Information of the Alternatives....6-17
6.10 Alternatives Evaluation Summary....6-19
7 Additional Spent fuel Storage Environmental Information....7-1
7.1 Section Summary....7-1
7.2 Existing ISFSI Site Description....7-1
7.2.1 Topography....7-1
7.2.2 Soils....7-2
7.2.3 Geology....7-5
7.2.4 Groundwater....7-6

7.2.5 Terrestrial Ecology 7-7
7.2.6 Land Use 7-10
7.2.6.1 Goodhue County, Minnesota 7-10
7.2.6.2 Dakota County, Minnesota 7-10
7.2.6.3 Pierce County, WI 7-11
7.2.7 Water Resources 7-11
7.2.8 Transportation 7-19
7.2.9 Sensitive Environmental Resources 7-20
7.2.9.1 Federally Designated Sensitive Environmental Resources 7-20
7.2.9.2 Minnesota Designated Sensitive Environmental Resources 7-21
7.2.9.3 Wisconsin Designated Sensitive Environmental Resources 7-25
7.2.10 Historic and Archaeological Resources 7-26
7.2.11 Cultural and Recreational Resources 7-27
7.2.11.1 Federal and State Cultural and Recreational Resources 7-27
7.2.11.2 County and Local Parks and Recreational Areas 7-28
7.2.12 Demography 7-29
7.3 Wastes and Emissions 7-30
7.3.1 Radioactive Wastes 7-30
7.3.2 Human Exposure Due to Operation 7-31
7.3.2.1 Direct Radiation 7-31
7.3.2.1.1 On-site Radiation Doses 7-31
7.3.2.1.2 Off-site Radiation Doses 7-31
7.3.2.2 Radiation Protection Program 7-32
7.3.2.2.1 Storage System Design Description 7-34
7.3.2.2.2 Shielding 7-36
7.3.2.2.3 Radiation Monitoring System 7-36
7.3.2.2.4 Emergency Plan 7-36
7.3.3 Non-Radioactive Solid and Liquid Wastes 7-37
7.3.4 Non-Radioactive Gaseous and Particulate Emissions 7-37

7.3.4.1 Air Quality 7-37
7.3.4.2 Clean Air Act 7-37
7.3.5 Fugitive Dust 7-38
7.3.6 Non-Radioactive Discharge to Water 7-38
7.3.7 Runoff and Receiving Waters 7-38
7.3.8 Heat Rejection 7-38
7.3.9 Noise 7-39
7.3.9.1 Noise Standards 7-39
7.3.9.2 Ambient Sound Levels 7-39
7.3.9.3 Construction Sound Levels 7-40
7.3.9.4 Operational Sound Levels 7-42
7.3.9.5 Conclusions 7-42
7.4 Pollution Control and Safeguards Equipment 7-44
7.4.1 Management of Radioactive Materials 7-44
7.4.2 Contingency Plans in the Event of an Accidental Release of Radioactive Materials 7-45
7.4.3 Recycling Methods to Dispose of Solid or Liquid Wastes 7-45
7.4.4 Emission Control Devices and Dust Control Measures 7-45
7.4.5 Water Pollution Control Equipment and Runoff Control Measures 7-45
7.4.6 Spill and Leak Prevention Measures 7-46
7.4.7 Heat Rejection Reduction Methods 7-46
7.4.8 Other Equipment or Measures to Reduce Effects of Facility on the Environment 7-47
7.4.9 Environmental Monitoring 7-47
7.4.9.1 Radiation Monitoring System 7-47
7.5 Estimates of Induced Development 7-47
7.5.1 Vehicular Traffic Curing Construction and Operation 7-48
7.5.1.1 Traffic from Construction 7-48
7.5.1.2 Traffic from Operation 7-49
7.5.2 Work Force During Construction and Operation 7-50

7.5.2.1 Work Force During Construction 7-50
7.5.2.2 Work Force During Operation 7-51
7.5.3 Impacts to Utilities and Public Services 7-51
7.5.4 Water Usage During Construction and Operation 7-51
7.5.5 Impacts on Agricultural Lands 7-52
7.5.6 Impacts on the Local Population 7-52
8 Power Uprate Environmental Information 8-1
8.1 Section Summary 8-1
8.2 Power Uprate Project Environmental Information 8-2
8.2.1 Land Requirements (Minn. R. 7849.0320(A)) 8-2
8.2.2 Traffic 8-2
8.2.3 Water Use for Alternate Cooling Systems 8-3
8.2.3.1 Ground Water 8-3
8.2.3.2 Surface Water Appropriation 8-4
8.2.4 Water Discharges (Minn. R. 7849.0320(F)) 8-5
8.2.4.1 Water Discharge Flow Rates 8-5
8.2.4.2 Water Discharge Temperature 8-6
8.2.4.3 Circulating Water System 8-8
8.2.4.4 Circulating Water System Operating Modes 8-9
8.2.4.5 Water Quality Monitoring 8-13
8.2.4.6 Mississippi River Thermal Plume 8-16
8.2.4.7 Cold Shock 8-17
8.2.4.8 Impingement and Entrainment 8-17
8.2.5 Radioactive Releases (Minn. R. 7849.0320(G)) 8-18
8.2.5.1 Gaseous Wastes 8-18
8.2.5.2 Radiation Levels and Offsite Dose 8-20
8.2.5.2.1 Operating and Shutdown In-Plant Radiation 8-20
8.2.5.2.2 Offsite Doses 8-21
8.2.5.2.2.1 Radiological Effluent Doses 8-21

8.2.5.2.2.2 Postulated Accident Doses 8-23

8.2.6 Radioactive Wastes 8-23

8.2.6.1 Radioactive Solid Wastes 8-23

8.2.6.2 Radioactive Liquid Waste 8-24

8.2.6.3 Reactor System Wastes 8-25

8.2.7 Non-Radioactive Solid Wastes (Minn. R. 7849.0320(H)) 8-25

8.2.8 Noise (Minn. R. 7849.0320(I)) 8-25

8.2.9 Workforce (Minn. R. 7849.0320(J)) 8-26

8.2.10 Transmission Facilities (Minn. R. 7849.0320(K)) 8-26

8.3 Power Uprate Project and Alternatives Environmental Information Comparison 8-26

9 Denial Would Adversely Effect Adequacy, Reliability, and Efficiency of Energy Supply System 9-1

9.1 Section Summary 9-1

9.2 Forecasting and System Planning 9-3

9.3 Demand and Energy Forecasts are Increasing 9-4

9.3.1 Current Peak Demand and Energy Forecast 9-4

9.3.2 Forecasts Rely on Continued Aggressive DSM 9-7

9.3.3 Demand and Energy Obligations Include MAPP Reserve Capacity Obligation 9-10

9.3.4 Meeting Customers' Energy Needs 9-10

9.3.5 Compliance 9-11

9.4 Consequences of Project Delay 9-11

10 Project Benefits Society 10-1

10.1 Section Summary 10-1

10.2 Society Benefits from Reliable, Low Cost, and Environmentally Benign Electricity Sources 10-1

10.3 Provides Value to Ratepayers 10-2

10.4 Use of Existing Infrastructure 10-2

10.5 Lower Emissions 10-3

10.6 Health and Safety 10-3
10.7 Jobs 10-3
10.8 Supports Future Economic Development 10-4
10.9 Provides Tax Benefits 10-4
11 Project Compliance 11-1
11.1 Section Summary 11-1
11.2 Projects are Consistent with Minnesota Energy Policy 11-1
11.2.1 Legislative Preference 11-1
11.2.2 Department of Commerce Policy 11-2
11.2.3 Non-Proliferation Policy 11-4
11.3 The Projects Comply with Federal and State Environmental Regulations 11-4
11.4 Carbon Risk Analysis Compliance 11-4
11.4.1 CO2 Analysis 11-5
11.4.1.1 Federal Legislative Proposals 11-6
11.4.1.2 State and Local Climate Policies 11-7
11.4.1.3 Impacts of Climate Policy on the Energy Industry 11-7
11.4.1.4 Carbon Dioxide Pricing 11-8
11.5 Compliance and Policy Summary 11-10
