Hello Bill

We live at 4340 Hingeley road, Floodwood MN 55736. Legal description; SW ¼ of SW ¼ SEC.10, TWP 50, R 20.

We will be affected by the savanna project. Can you describe what will happen to our particular property if this project goes through?

We think it would be more feasible to locate the line across the road, north of our residence. There are no residences or buildings on that side of the road. We would like to see the Lake Country Power line be moved also.
We are concerned about the environmental impact of these structures and how they will affect our land value. Construction would surely damage our lowlands.

We have had problems with Great River Energy and their tree service. When they were here last, they sprayed some of our berry shrubs after agreeing they would not do so. One year before that, Lake Country Power trimmed a very old pine tree so severely that it was lopsided. The following year, Great River Energy said since the tree was unevenly trimmed, it should now be removed. We have requested that they write a formal agreement on how they would treat our landscaping within the easement. Our request was ignored.

We are also concerned with EMF.

Finally we are concerned that more upgrades and additional easements will be requested in the future.

We greatly appreciate your time and consideration. Please send any maps or other information to our address listed above.

Barb and Nate Goodell
