Bill,

I am one of the land owners on whose land the power line goes on near Cromwell, I really object to the 300 foot right-of-way, It will wipe out a good portion of our woodlot and hunting area. If they could move about 3 poles to the East (about 150 feet) on our land and than go back on centerline on our land, I could agree with the project. However, in its present form I cannot. When you look across Northern Minnesota and the new power lines or the rebuilt power lines, The electric companies are literally creating moonscape with the extremely wide right-of-ways. We do not live up here to see it barren of trees. If they are so worried about the trees, than put it underground.

Thanks,

Hans E. Hanson
