Impact: I'm concerned first about the health impacts of an overhead high voltage powerline in a densely occupied urban setting. Also, I feel that the greenway is a major car free thouroughfare that needs to be protected from further industrial encroachment. I use the bikepath and know many others who also use it. I'm most familiar with the section through the Phillips neighborhood which already has major health concerns from arsenic in the soil so this neighborhood especially needs protection from further health risks.

Mitigation: I understand that burying power cables & substation is a viable option and I strongly urge that this option be chosen for this situation.
