Dear Bill,
As a bicycling citizen of Minneapolis, I appreciate the Greenway for its low level noise. I am very sensitive to high pitch noises that emanate from other power lines I have known. I am concerned about the electrical project along the bike path for my own peace, but also for the safety of people who live along the 29th Street corridor. I know that the noise is only one factor, but I request that Xcel not get a free pass to put in power lines without proving safety, as well as need, as required prerequisites to moving ahead on this project. Thanks for your time and attention to this proposed project.

Sincerely, Esther Perry
