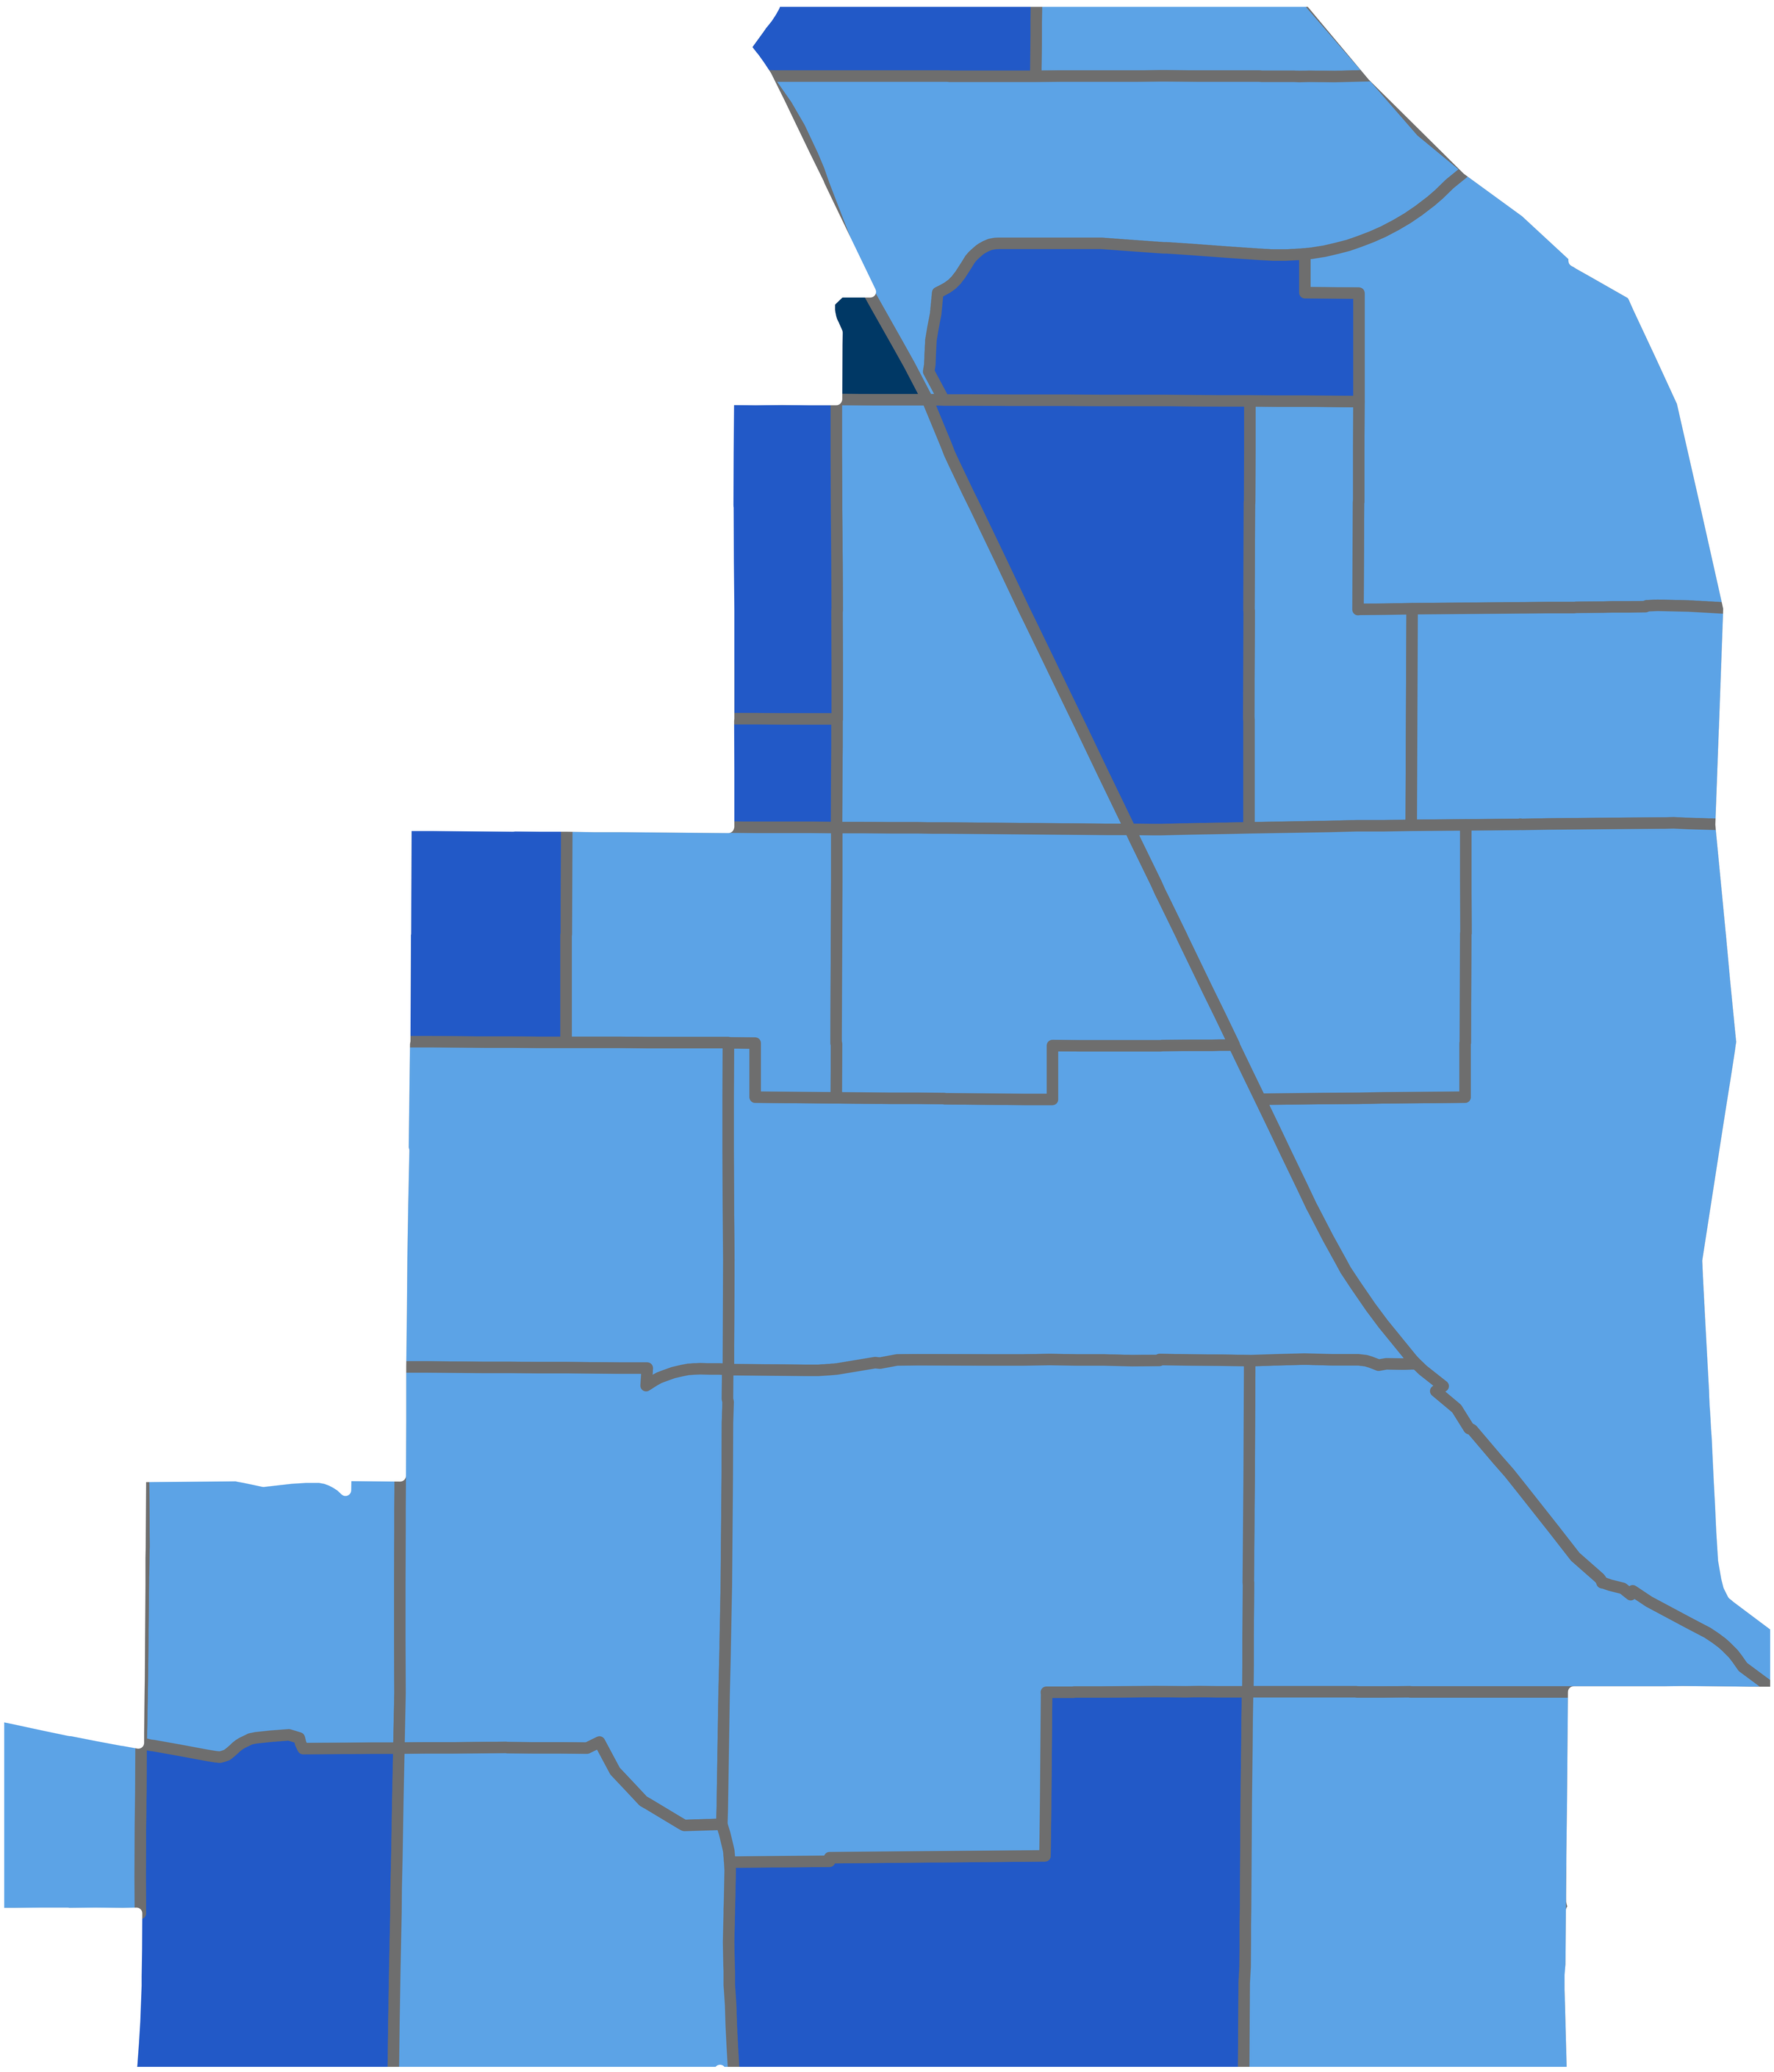
HISTORICALLY UNDERCOUNTED AREAS
Minnesota Senate District 62



Which areas will be hard to count in the 2020 Census?

- Cities and Townships

Projected Non-Self Response

- Easiest (1%-22% will not self-respond)
- Medium (23%-29% will not self-respond)
- Hardest (30% or more will not self-respond)
- Areas are not hard to count, but predicted self-response rate is not available

Data Source: U.S. Census Bureau's 2018 Response Outreach Area Mapper (ROAM). These data were developed by the Census Bureau to classify areas according to their propensity to self respond to censuses and surveys. Percentages correspond to the area's predicted mail non-response rate. The higher the percentage, the harder-to-count that area is.

For more information on the data see https://www.census.gov/roam
