Subject: 12/17 NoRCA Petition Docket 09-1056
Attachments: Petition Signatures.pdf

Mr. Birkholz,

On behalf of the North Route Citizens Alliance, enclosed is a petition signed by approximately 67 landowners & stakeholders along the proposed CAPX2020 Preferred and Alternate A "North Routes". The petition was administered at a NoRCA hosted Public Forum on December 17, 2009 and reflects the following concerns pertaining to the Melrose/Freeport Area to South St. Cloud in Central and Northern Stearns County.

- **Minnesota's Policy on Non-proliferation:** Of the proposed Preferred North Routes approximately 39 miles, 42% of the route creates a new transmission line Right of Way via the extensive use of Field and parcel lines.
- **Quality of Life:** The proposed Preferred and Alternate A North Routes will have deleterious affects on this rural geographies protected natural resources by placing HVTL's in a currently "undisturbed" rural environment. The proposed Preferred and Alternate A North Routes will also threaten the character, preservation and heritage of 40 identified and documented historical properties, known as Century farms.
- **Negative Effects on Property and Land Values**
- **Significant Risks to Health due to EMF's**

Petition to Re-route the Fargo - St. Cloud North "Preferred & Alternate Route A" Routes

Petition summary and background	Recently, several residents in the Albany, Avon, St. Wendel, Holding and Brockway Townships received notice of a proposal to construct a 345KV Transmission Line, directly through their properties. This proposed route would deviate from the established I-94 corridor that is being followed for the majority of the route. Further, this route would seem to go against precedent set forth in PEER vs MEQC, 1978: "This policy of non-proliferation creates a preference for placing new power lines near existing infrastructure as a way to minimize the proliferation of new corridors." The CAPX2020 Fargo to St. Cloud route is an effort by 11 transmission-owning utilities to bolster the energy requirements of Minnesota and comply with one of the nation's most aggressive Alternative Energy Standards (primarily wind-power), set forth by the state of Minnesota legislature (known as Renewable Energy Standards or RES). We would like the North "Preferred and Alternate Route A" routes redirected based on 3 guiding principles; 1. Quality of Life(ecology, environment, proliferation of historic century farms) 2. Negative effects on properties and the values attributed to them 3. Health risks.
Action petitioned for	We, the undersigned, are concerned citizens who urge our leaders to act now to re-direct the "Preferred and Alternate Route A" routes to I-94 consistent with State statutes and policies regarding Non-Proliferation.
