Dear Mr. Birkholz:

My husband and I live along the southern route of the projected transmission line, on Island Lake Road north of Cold Spring. Our land will definitely be devalued with the line going through it. I am curious: why isn't the line following I-94 where easements are in place? We have been here for 27 years and have even contemplated spending the money it would take to put the power lines along our driveway underground just for aesthetic value. It is difficult to imagine looking out the window daily to see this massive encroachment on our property. Please, please fight for our rights. We are in our late 70s and really appreciate our current peaceful surroundings in the country. Again, why not the I-94 corridor?

Myron & Lenore Felix
