I propose the power line route go thru my property on the east side of my feed lot. In the future when I expand my feed lot, it would have to be done within your proposed line route eastment. Due to feed lot setbacks from city limits + wetlands, I only can expand to the west or north within my property line. I have drawn on the map, 2 alternative routes with dotted lines. One would just shift the whole line over 1320 feet. The other would detour the line di-angle across my property, elimitating a 90° turn for the proposed/preferred line.
