Docket # 14-21

Comment: Manitoba Hydro & Mn. Power really need to look at moving the crossing point at the border further east.

There is plenty of wooded non-resident areas to do this on both sides of the border!

The current proposed crossing has way to many opposing factors!

With talking to some of the representitives of this project, it appears that agree with some of these ideas.

I am a farmer/landowner in Dieter Township, and part of the proposed route. For many reasons, which Jim Adkitson is aware of, this line needs to be re-routed.

Thank you for considering my ideas. Please contact with any updates.

Stuart Rice

The proposed Route IS IN line with one of the States largest migratory waterfowl management ares and a very busy headquarters.

It IS Also to close to Existing homes & farm yards for comfort.

It would greatly affect my farming operations, & (cost) to to go Around And Restrict me from some of my current practices!

Like mentioned before, this Line has plenty of Areas to cross the Border IN populated Area, IN wooded land.
