Developer Attestation and Acknowledgement

Instructions: Developer must initial each section of the following attestation and sign the attestation. This document must be attached with the application.

_____ ***Application Requirements***

1. The developer attest that its application on behalf of the consumer contains the following items:
    a. Accurate background information pertaining to the applicant and to the installation type, installation process and anticipated installation and interconnection date.
    b. Utility and utility contact information are accurate. Communication between utility and consumer pertaining to interconnection timeline, utility battery programs, utility program requirements and incentives and possible roadblocks as it pertains to interconnection.
    c. Information pertaining to the on-site energy storage specs, specifically:
        i. Warranty
        ii. Battery kW total
        iii. Battery kWh total
        iv. Model and Manufacturer
    d. Documentation to support the specific information that pertains to the storage system.
    e. Any upgrades that were required to meet fire code or to the electrical panel.
    f. The intended use of the energy storage system, and that:
        i. *The verification that the addition of the energy storage system to the solar energy generating system shall not impact the customer's eligibility for service under a net-energy-metering tariff or other tariff whose eligibility is determined by system size, measured at the system's inverter(s) or a power control system or supplemental device that controls production of the solar energy generating and storage system before the net-metered customer's load, or when the storage system is configured only for non-exporting mode of operation. When configured in this manner, an addition of a battery will not impact eligibility for net-metering.*
    g. The following documents have been attached:
        i. Developer Attestation
        ii. Owner Attestation
        iii. Utility MOU
        iv. Documentation showing proof of interconnection.

_____ ***Interconnection Application***

1. The Developer attest the following is accurate pertaining to the applicant's interconnection application:
    a. An active or completed interconnection application has been submitted to the utility.
    b. The interconnection ID supplied in the application.
    c. Any potential issues or roadblocks to interconnection.

_____ ***Developer Confirmation***

1. The Developer attest the following related to the applicant:
    a. The applicant will be receiving the full incentive.
    b. The applicant understands the requirements for the supplier ID process for payment.

_____ ***Program Administration by the Minnesota Department of Commerce***

1. The Developer attest that the Minnesota Department of Commerce will review applications and reserve funds on a first come first serve basis.
2. The Developer acknowledges that the Minnesota Department of Commerce has the authority to reject applications if they do not meet the programs eligibility or requirements.
3. If the first step of the application is approved, the Developer agrees to provide the Department of Commerce with:
    a. Proof of purchase, paid invoice
    b. Supplier ID for system owner for incentive payment
    c. Witness Test Documentation
    d. Photos of installed system
    e. Proof of interconnection
    f. Electrical Inspector contact information.
