Instructions: Utility and Recipient should review this document and agree that the following has been communicated. This document should be sent back to the applicant to include with their application.

This document is to establish a mutual understanding between potential storage incentive recipient, , ("Recipient") and ("Utility") regarding recipients' installation of a storage system. The intent of this document is to assure the communication surrounding utility storage programs, the incentives from those programs, along with interconnection and system procurement. This document also outlines the utility storage program, if applicable, that the recipient is eligible for and the requirements and incentives of the program.

Does the Utility provide a storage incentive program?

☐ Yes

☐ No

Is the Recipient pursuing the Utility's storage program?

☐ Yes

☐ No

Please outline the Utility's storage program requirements and eligibility (If applicable):

Utility and Recipient mutually agree the following has been communicated:

- The requirements to be eligible for the utility storage program, and that the recipients meet the requirements to apply for both the Commerce and the utility program, if desired.
- The incentives the recipient would receive if they participated in the utility program, and the impact the incentives would have on the cost of the system and / or the recipient's utility bill.
- The verification that the addition of the energy storage system to the solar energy generating system shall not impact the customer's eligibility for service under a net-energy-metering tariff or other tariff whose eligibility is determined by system size, measured at the system's inverter(s) or a power control system or supplemental device that controls production of the solar energy generating and storage system before the net-metered customer's load, or when the storage system is configured only for non-exporting mode of operation. When configured in this manner, an addition of a battery will not impact eligibility for net-metering.
- the information submitted here is true and accurate to the best of Utility's knowledge.

[Check All] System Interconnection:

☐ Utility has reviewed the Storage System contract with Recipient's selected developer and/or has engaged in discussion(s) with Recipient pertaining to the Storage System contract with Recipient's selected developer.

☐ As the Storage System is shown to be designed and financed, Utility, as of the date under Utility's signature below, does not foresee any issues that would prevent System interconnection from proceeding.
