Applicant Attestation and Acknowledgement

Instructions*:* Applicant must initial each section and sign the following attestation. This document must be attached with the application.

_____(initials) **Application Requirements**

1. The Applicant attests that this application contains the following items:
    a. Accurate background information pertaining to the applicant and to the installation type, installation process, anticipated installation and interconnection dates.
    b. Utility name and contact information are accurate. Communication between utility and consumer pertaining to interconnection timeline, utility battery programs, utility program requirements and incentives and possible roadblocks as it pertains to interconnection.
    c. Information pertaining to the on-site energy storage specs, specifically:
        - Warranty
        - Battery kW total
        - Battery kWh total
        - Model and Manufacturer
    d. Documentation to support the specific information that pertains to the storage system.
    e. Any upgrades that were required to meet fire code or to the electrical panel.
    f. The intended use of the energy storage system, and:

        Verification that the addition of the energy storage system to the solar energy generating system shall not impact the customer's eligibility for service under a net-energy-metering tariff or other tariff whose eligibility is determined by system size, measured at the system's inverter(s) or a power control system or supplemental device that controls production of the solar energy generating and storage system before the net-metered customer's load, or when the storage system is configured only for non-exporting mode of operation. When configured in this manner, an addition of a battery will not impact eligibility for net-metering.
    g. The following documents have been attached:
        - Owner Attestation
        - Utility MOU
        - Documentation showing proof of interconnection.

_____(initials) **Interconnection Application**
