Rabies Vaccination Certificates

The [Compendium of Animal Rabies Prevention and Control](#) (page 12) provides information on approved rabies vaccines and their durations of immunity. There are currently no approved two-year vaccines. Rabies certificates that have inaccurately listed a two-year duration of immunity can be corrected two different ways.

1. The veterinarian that administered or oversaw the administration of the vaccine and issued the certificate can correct the information on the certificate, and initial and date the change.
2. The veterinarian can issue the animal owner a letter indicating the error and what the actual vaccine duration of immunity is.

For detailed rabies vaccination certificate requirements, please refer to [Minnesota Administrative Rule 1721.0540, Subp. 3](#) or see the **Rules Review** below.
