**Proposed Pleasant Valley Transmission
Project Survey**

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Rock Dell
Which section? 14

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

Was our land at issue?

4. Please provide any additional comments or ideas you have about the project.

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

I'm all for renewable energy MARS

*Please complete the information on the back of the page if you want to be added to our mailing list.
Thank you for attending the open house.*

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Waconia
Which section? 13

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

Health & Lines running on my property.
Home value - will it decrease?

4. Please provide any additional comments or ideas you have about the project.

What if any do these lines have on one's health?
animals?

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

Very Important. =

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Pleasant Valley
Which section? 14 W 1/2 NW 1/4

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

How are houses close to the road going to be handled (are you going to jump sides to minimize that ~~exp~~ expense exposure

ON ~~70~~ 720th Ave from Cty 15 N to Cty 6 there are 4 or more houses close to the road and 3 on the East side off the road further

4. Please provide any additional comments or ideas you have about the project.

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

Please complete the information on the back of the page if you want to be added to our mailing list.

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Vernon
Which section? 35

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

4. Please provide any additional comments or ideas you have about the project.

Since it has not been determined a "need" for added energy (by the state) why are you taking valuable farm land for power lines?

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

If a power line is put in - then route it the most direct route (shortest route).

Please complete the information on the back of the page if you want to be added to our mailing list.

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Rock Dell
Which section? 12

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

Does it cross our property? Will it affect our property?

4. Please provide any additional comments or ideas you have about the project.

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

Absolutely imperative. We need renewable energy now! Benefits the environment and dependence on foreign oil. Drawbacks - don't want to use food for fuel.

Please complete the information on the back of the page if you want to be added to our mailing list.
Thank you for attending the open house.

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? High Forest
Which section? 11

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

The route of the line - neither proposal directly impacts us, but is another route a possibility?

4. Please provide any additional comments or ideas you have about the project.

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

We support renewable energy and believe that wind is the best source for this area at this time.

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Dodge/Vernon *we also own property in Olmsted Co. Rock Dell Twpsh, section 19*
Which section? 11
2. Do you own property that may be crossed by the proposed Transmission Project? *(Co. rd. 149 and 100th St. Olmsted Co)*
- Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?
- Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

We are concerned about our cattle. Pasture in this area County Rd 4 and Cty 15 (Dodge). Wetland and woods on our property we want to preserve.

4. Please provide any additional comments or ideas you have about the project.
- We already have the 345 power line going through our property and both of these routes would affect our farmland also.

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?
- Clean energy is important but I don't think we need to take up so much room for more poles. Can't we use existing and add higher?

Open house location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? High Forest
Which section? 25 own also 22, 23 sections

2. Do you own property that may be crossed by the proposed Pleasant Valley Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No," what important issue or potential route have we missed?

4. Please provide any additional comments or ideas you have about the project.

How many years has this been on the table to build
I know the Pleasant Valley Substation been up and running for a few years.

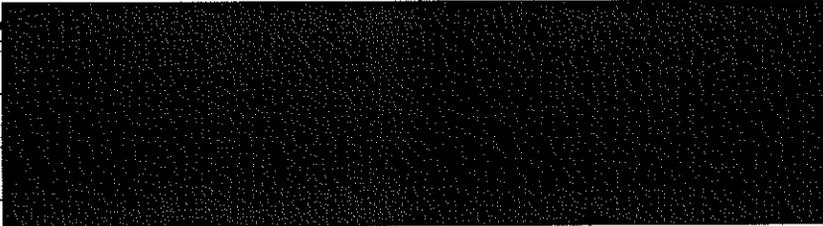

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

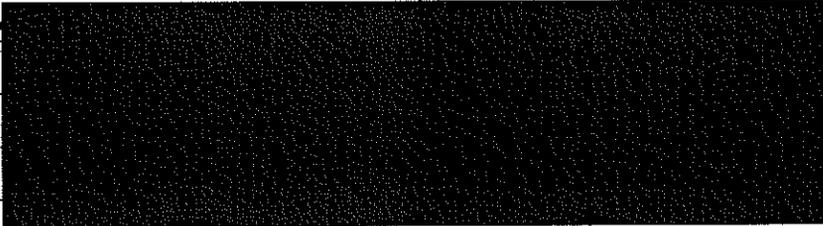

renewable Energy is something we must look at but I worry about the safety of all the overhead lines. With stray Electricity, and in the Atmosphere.

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open house location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? CANE STRO
Which section? 01

2. Do you own property that may be crossed by the proposed Pleasant Valley Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No," what important issue or potential route have we missed?

- GO WEST First turn DOWN 15 - less affected
- SAVES TWO CORNER POLES

4. Please provide any additional comments or ideas you have about the project.

- THE TOWNSHIP ROADS ARE PLOWED LAST
- THINK WHERE HOUSES WILL BE IN FUTURE
- DODGE CTY 15 & HWY 14 - NO HOUSE WILL BILD THERE, THEY WILL IN OTHER PLACES
- SAVES CORNER POLLS
- FUTURE EXPATION TO WEST & NORTH

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

Please complete the information on the back of the page if you want to be added to our mailing list.

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? HIGH FOREST
Which section? #6

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

4. Please provide any additional comments or ideas you have about the project.

If the new line is put on taller poles on the existing route along 60th St on North side of High Forest township the height restriction for Zone B in Airport Zone would affect route of line,

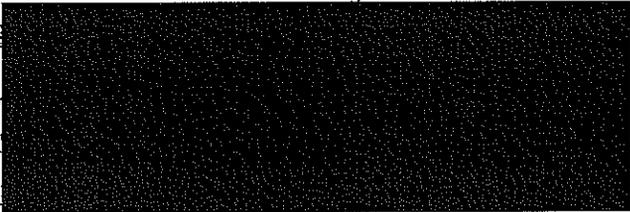

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

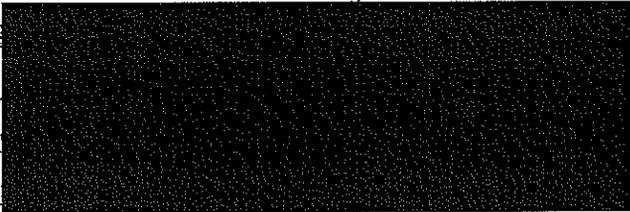

I am all for renewable energy and feel it is a thing of the future and will be a larger part of our source of energy

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open house location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Rochester
Which section? _____

2. Do you own property that may be crossed by the proposed Pleasant Valley Transmission Project?
 Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?
 Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No," what important issue or potential route have we missed?

Location, size

4. Please provide any additional comments or ideas you have about the project.
Seems like a needed project

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

I think its VERY important. Much of the renewable sources of energy are non-polluting. I don't think we can produce all our needs this way.

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? 6010 Lane SW, Rochester
Which section? _____

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

As the City of Rochester owns the airport and therefore runs utilities down 147 to service the airport, there is substantial residential development along that route, and more projected. This is a major impact that the alternate route along I-90 would not have.

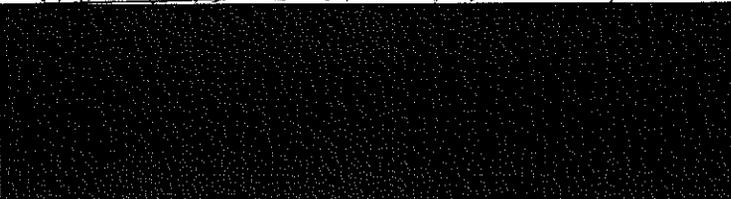

4. Please provide any additional comments or ideas you have about the project.

I much prefer the alternate route, as would all of the adjacent neighbors along CRD 148. The "advantages" of the pre-existing Peoples Coop line are hardly an issue as they are no where near adequate to meet Xcel's needs.

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

Please complete the information on the back of the page if you want to be added to our mailing list.

Comments:

To live on both st. where the proposed
County 148 route is slated. Due to the
existing and proposed future housing
developments in the immediate vicinity
of the proposed route, I am strongly
opposed to this route and would
prefer that the alternative I-90 route
be used instead. This would impact fewer
medium to high density residential neighborhoods,
impacting fewer number of county residents
overall.

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Vernon
Which section? 1

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

Health concerns. Property Values.

4. Please provide any additional comments or ideas you have about the project.

Please use the 149 corridor for this line. That will affect us the least.

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

If there's no wind - No power! All these should be explored and utilized where feasible.

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Vernon
Which section? 23

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

4. Please provide any additional comments or ideas you have about the project.

If it's not been determined if there is a need for it, why are they proposing it?
I don't like these big poles coming through my good farm land.

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

We need to conserve more. I hate these gigantic wind mills. Soon we won't have any land left to farm.

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Rochester
Which section? _____

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

Proximity to populated Residential Areas.

4. Please provide any additional comments or ideas you have about the project.

Run Pleasant Valley Along I-90 where there is less residential vs through the middle of residential area & next to Willow Creek Reservoir
Not in favor of running it by Willow Creek Reservoir

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

Good but not the only answer
Nuclear should be considered as renewable.

Please complete the information on the back of the page if you want to be added to our mailing list.
Thank you for attending the open house.

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Rochester
Which section? 735

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

I am concerned that the proposed lines will cross directly over my housing development thereby decreasing housing property value & increase flood risk

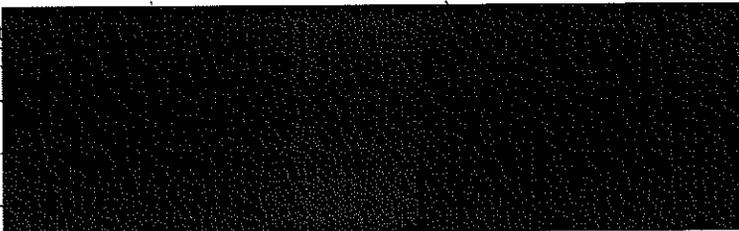

4. Please provide any additional comments or ideas you have about the project.

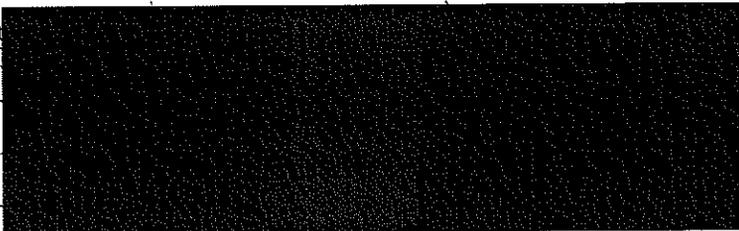

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? High Forest
Which section? 2

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

Proximity to my home.

4. Please provide any additional comments or ideas you have about the project.

Lets connect these lines to some renewable energy sources. There are numerous wind farms in Flower Co.

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

It could easily provide more than half of the existing consumption and should do so!

Proposed Pleasant Valley Transmission Project Survey

W2. rd. 1117 N. 111.02 S08
Rochester, MN 55907

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Rochester
Which section? _____

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

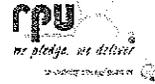

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

4. Please provide any additional comments or ideas you have about the project.

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

Mostly Benefits – Cleaner Air,

Please complete the information on the back of the page if you want to be added to our mailing list.
Thank you for attending the open house.

45

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Argonne
Which section? 24

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

The route

4. Please provide any additional comments or ideas you have about the project.

Whatever works best for this project is fine with us!

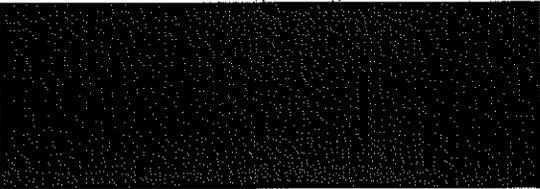

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

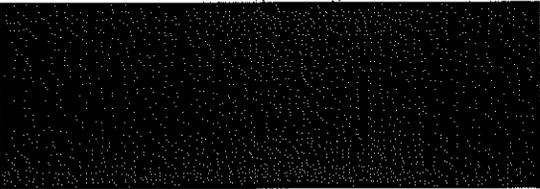

With the ever increasing energy needs, this would be a very good and worthwhile project.

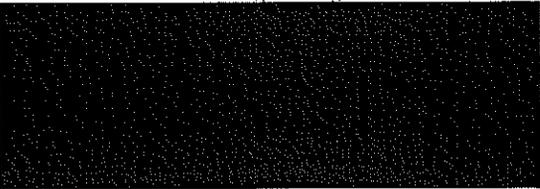

Please complete the information on the back of the page if you want to be added to our mailing list.

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Vernon
Which section? 35

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

4. Please provide any additional comments or ideas you have about the project.

We don't have many Black Top Roads in our County. Please
don't build a power line next to one of the few we do have
a paved Road to build our homes on in the future

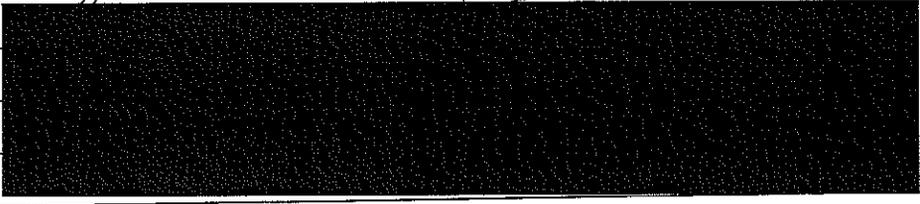

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

Wind power is a good idea but very few people
want to look at them. It significantly devalues our
quality of life. The western states (Wyoming, N. Dakota
S. Dakota etc.) have plenty of open land in which almost no one
will see them. Build them there!

Please complete the information on the back of the page if you want to be added to our mailing list.

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Levon
Which section? 23

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

I don't know if this is needed for the people
or if it's for Xcel to expand & add to their
bottom line.

4. Please provide any additional comments or ideas you have about the project.

Run these lines next to those that already
exist. There comes a point when there is too
much impacting the view and wide open spaces.

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Vernon
Which section? 23

2. Do you own property that may be crossed by the proposed Transmission Project?
 Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?
 Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

Most important issue: if the project is approved, that the
County 10 / County 149 route be chosen for Pleasant Valley
Substation route.

4. Please provide any additional comments or ideas you have about the project.

Make provision for considering aesthetic damage to people
who have no wish for a power line ruining their enjoyment
of years of work.

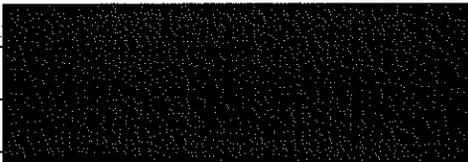

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

Wind energy should be situated to the west of this
area - see state wind maps.

Please complete the information on the back of the page if you want to be added to our mailing list.

1. In which township/city do you reside? Candiot
Which section? 25

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

The location of potential routes and how close they will come to our home
Also of interest is impact on property values.

4. Please provide any additional comments or ideas you have about the project.

We prefer the proposed route (Byron to Pleasant Valley) that is east of the existing 345 KV line.

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

Renewables need to play an expanded role in generation. Reliability and impact on power quality are probably two of the more important concerns with renewables

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? High Forest
Which section? 11

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

4. Please provide any additional comments or ideas you have about the project.

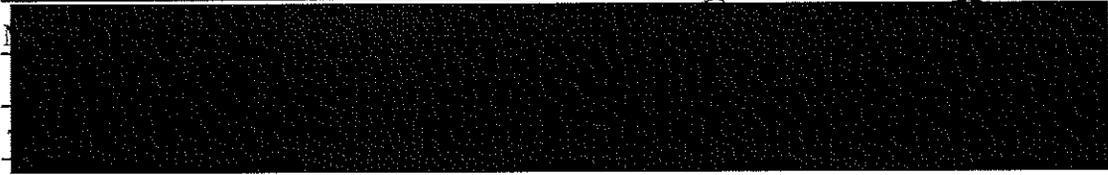

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

Depends upon how much it is
subsidized

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Cenesta
Which section? 13

2. Do you own property that may be crossed by the proposed Transmission Project?
 Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?
 Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

THE ROUTE DOWN DECOR CO #15 HAS SEVERAL HOMES & OUTBUILDINGS FOR AT LEAST 2 1/2 MILES VERY CLOSE TO THE ROAD, WHICH MAY PRESENT A PROBLEM

4. Please provide any additional comments or ideas you have about the project.

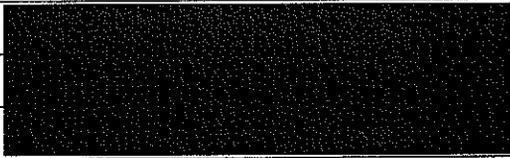

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

I HOPE THERE IS MUCH DEVELOPMENT IN RENEWABLE ENERGY. I THINK THE FUTURE DEMANDS IT. THE DRAWBACKS ARE THE SAME AS CURRENT SUPPLYS NO ONE WANTS TO LOOK AT THE POWER POLES & POWERLINES. WHY NOT UNDERGROUND?

Please complete the information on the back of the page if you want to be added to our mailing list.
Thank you for attending the open house.

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Rochester,
Which section? 60th St. S.W.

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes *I think* No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

How this would affect our TV Reception as we have an antenna - radios etc. Concerned if noise.

4. Please provide any additional comments or ideas you have about the project.

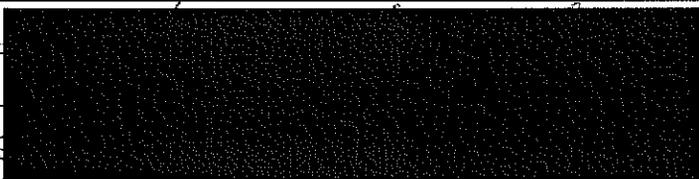

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

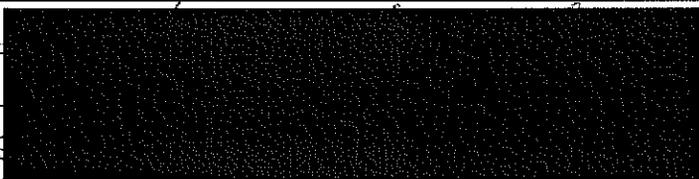

Renewable energy is needed - the wind mills when like bees in a bee hive take away from our beautiful open land in MN.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Rockdelell
Which section? 12

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

minimum standards between powerlines and homes, livestock, other structures

* medical ramifications of emf not fully explored

4. Please provide any additional comments or ideas you have about the project.

think the interstate 90 route closer to Stewartville substations makes more sense than other route - less homes along interstate

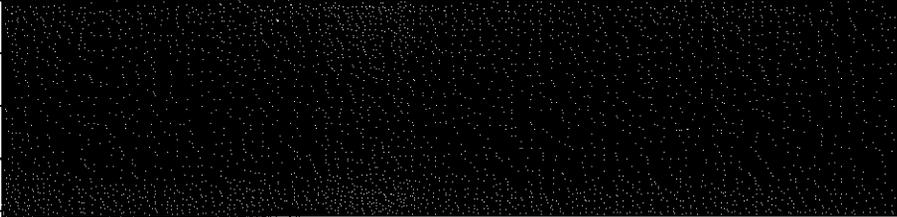

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

should be major new sources, along with "clean" coal (needs development first) no new nuclear until disposal solved
no drawbacks if regional

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? PLEASANT VALLEY
Which section? 12

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know *MAYBE ISSUES FOR UNKNOWN*

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

PROPOSED ROUTE OF PLEASANT VALLEY TO WILLOW CREEK, IF RUN ON SOUTH SIDE OF I-90 - WOULD BE 7 FT FROM INTERSTATE RIGHT OF WAY, AND 90-100 FT FROM OUR HOUSE. IT WOULD REMOVE OUR WIND BREAK TREES TO THE NW. IT WOULD TAKE OUR 4-ACRE PROPERTY W/ HOUSE + GARAGE WORTHLESS.

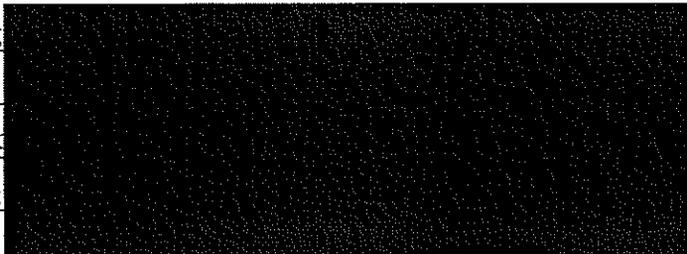

4. Please provide any additional comments or ideas you have about the project.

PLEASE DO NOT CONSIDER I-90 ROUTE FOR PV TO WILLOW CREEK. IF RUN ON THE SOUTH SIDE OF I-90, YOU WILL DESTROY THE VALUE OF OUR HOME. PLEASE USE DOUBLE CONDUIT ON EXISTING LINE NORTH ALONG CITY 119 + ON 148

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Sargeant
Which section? 13

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes sort of No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

To strongly consider going 1 mile to the east as that area is served by Peoples Cooperative & we aren't. That doesn't really make sense to run it through Freeborn-Mower County areas when you will serve Peoples and their patrons are just one mile to the east of here.

4. Please provide any additional comments or ideas you have about the project.

Our farm is one of the oldest in Mower County, even older than the one to our north. We purchased in 1967 and have put all our money into restoring and making it what it is today. We were both Master Gardeners & have put thousands of dollars in landscaping material alone. We, on this road (680 Ave) are served by Freeborn-Mower so far Rochester Public

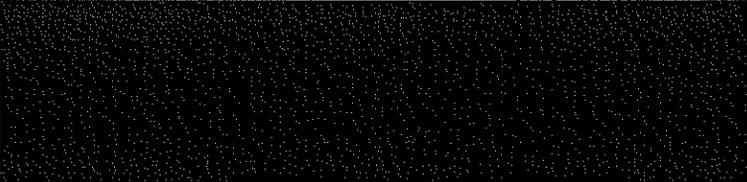

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in util + Peoples, providing for Minnesota's future energy needs? What do you think are the benefits and the line should be one mile to the east. drawbacks of renewable energy?

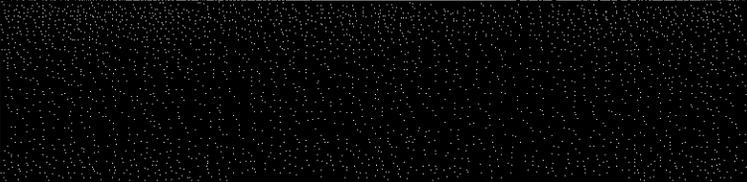

I'm all for renewable but personally I think hydro is going to be the big one. My husband was on the board of Freeborn-Mower Electric Cooperative.

Please complete the information on the back of the page if you want to be added to our mailing list.

Tom Hillstrom
 Senior Permitting Analyst
 Xcel Energy, Siting and Permitting Dept,
 414 Nicollet Mall
 Minneapolis, Minnesota 55401-1993

This is a continuation from the form letter as space was limited.

This is not a "not in my backyard" argument. I am Vice Chair of Mower County Planning Commission so I've heard and seen both sides of each conditional use permit. My husband served on the Board of Directors for Freeborn-Mower Cooperative up until his death in April, so we are also aware of energy needs. When Great River wanted to put this "peaking" plant in our area, we weren't thrilled with the idea, but we went along with it. As I recall only one family living several miles away protested because they felt it would make our environment less safe. Now we all feel maybe we shouldn't have been so greeable. Now its windmills and power lines. We are beginning to look as industrialized as Rosemount,

I've just watched a production on Tpt (twin cities public broadcasting) of how in the twin cities they are wanting to preserve and make even more park areas despite their population growing, emphasizing how important it is to preserve trees and natural landscape. Here we are in the outskirts of Mower County where we are many times forgotten (except at tax time) because of our remoteness and away from any city. We enjoy clean air too.

We realize the need for more energy in Rochester and Byron because of their growth, but they sure have fought the coal trains and we have an abundance of coal in the U.S. and with the scrubbers in the plants, it is not a dirty fuel.

Along 680th Avenue, north of 320th Street, we here in rural Dexter enjoy our trees. My husband, Ken, and I have spent thousands of dollars planting trees and shrubs to beautify the area. We did it along the road to prevent so much dust in our houses. Have you ever lived on a gravel road? We do have a lot of traffic by here too. Our neighbors enjoy their trees too. Trees help to purify the air. When you drive along this road the trees that grow along the road to the north of our neighbors, give you a feeling of a park you are driving by. Many people comment on that and enjoy driving this road for that reason. They are trying to get more of this in the cities and you want to take ours away from us? Are you willing to give us a hard surface road?

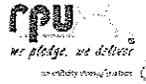

Also, you mentioned this would benefit us since we are served by People's Coop, which we are not. If this is to serve People's coop too, shouldn't this be a mile over to the east in their area? We here are served by Freeborn-Mower Cooperative. And the power to our farm comes from overhead across the road from us. How can you cross another utility's lines? Another neighbor is concerned for their small children's health, with all this electricity on both sides of them. How can you assure them that somehow this will not affect their health? It could be in something that won't show up for years. Already in this area several of our families have recently had cancer. Studies have shown this can be a leading cause of it.

We are only asking that you reconsider where you are installing these power lines.

Sincerely,

Margaret Kirchner

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Pleasant Vally, Dexter
Which section? _____

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

I do not want The lines going over my house. I do not want to lose my trees as they are a wind break. And I do not want to lose my pasture land as we have horses also.

4. Please provide any additional comments or ideas you have about the project.

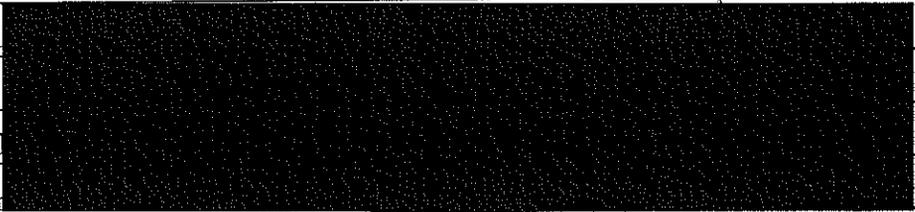

Why can't you go down the 345 kv line.

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

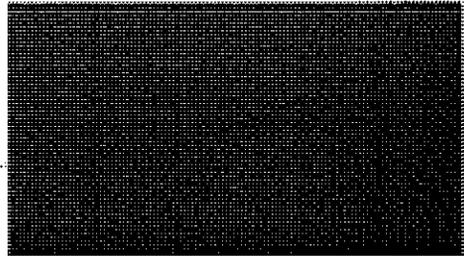

I think it is important. But so is the land I owe. Because it is 5 acres and it is all I have.

Please complete the information on the back of the page if you want to be added to our mailing list.
Thank you for attending the open house.

To Whom It May Concern:

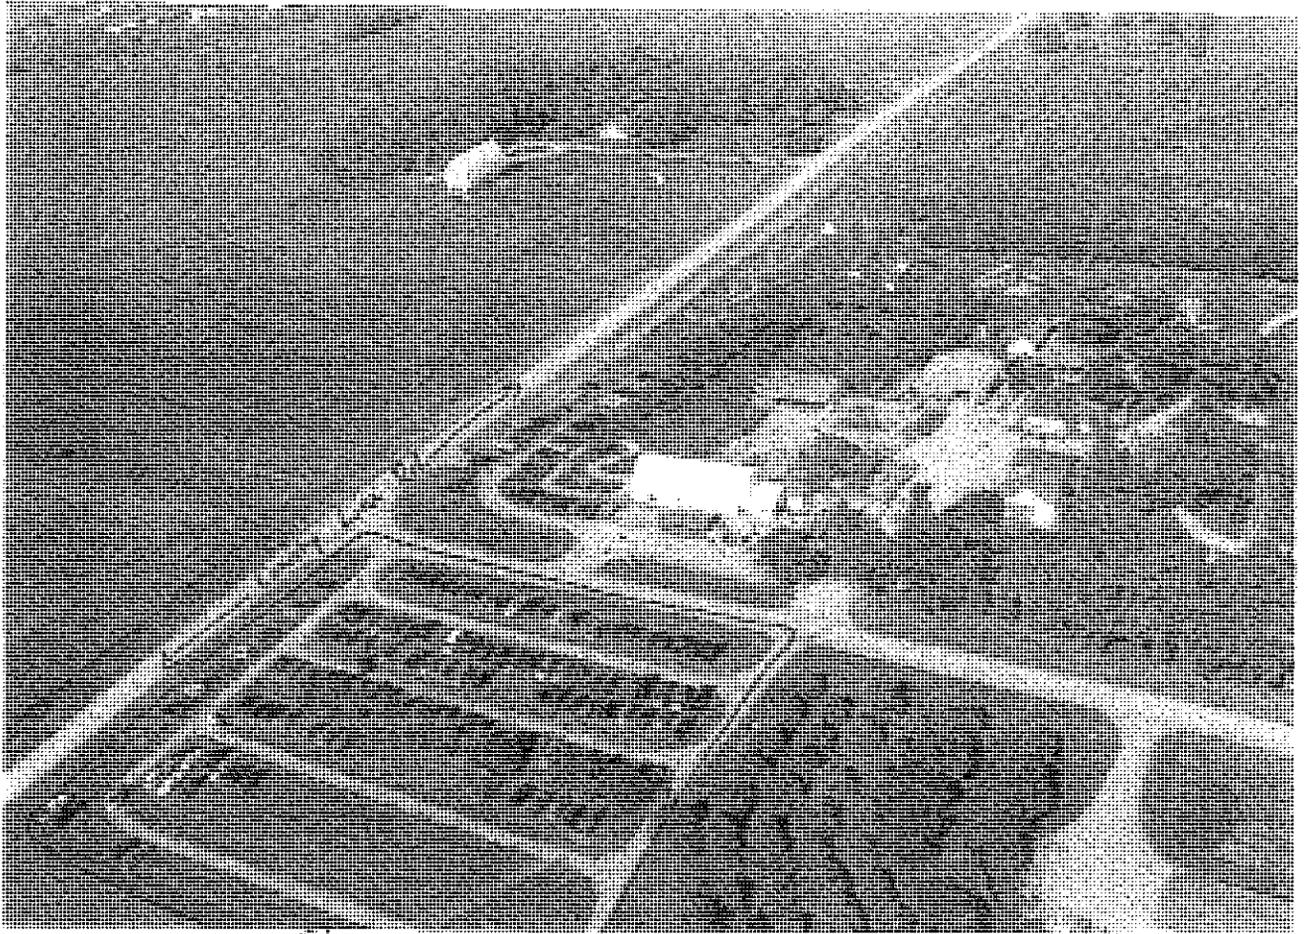

My name is Robert Tweite. I have two concerns at this time regarding the proposed 161 kV Transmission line form the Pleasant Valley substation to Byron substation. My Farm is located in Section 6 of Salem Township in Olmsted County. I am retired from farming but I do rent out my land for row cropping. If I understand correctly the right of way needed is eighty feet, I would expect that the line itself will run down the middle of the right of way of eighty feet. If the line right of way runs next to the road right of way this leaves only a short forty feet to farm between the poles and the road right of way. The farmer that presently rents from me has the following widths on his equipment:

Planter: 42'
Digger: 50 ½'
Sprayer: 60'
Drag: 60'

My other concern is I rent the area that my son uses as a graveled parking lot for his business. How would this area be handled. He sometimes has the lot full for many days in the fall.(see attached photo)

Owens Dry Lake Park
- 20,000 visitors during fall
- Concerned about impact
- Wants a field meeting

December 1, 2008

To Whom It May Concern:

I will address the proposed 161 kV Transmission Line from the Pleasant Valley substation to the Byron substation from five perspectives.

- 1) Property Owner
- 2) Business Owner
- 3) Five year member of the Olmsted County Planning and Advisory Commission
- 4) Member of the Olmsted County Roadway Management Taskforce
- 5) Eleven years as Kalmar Township Supervisor

Presently my father and I have four sets of the large double poles that come to the Byron substation from the south.

From the perspective of Olmsted County Planning Advisory Commission and Olmsted County Roadway Management Taskforce I would like to make sure that it is realized that the intersection of the County Line Road and US 14 is a site for an interchange (see photo A). I also have maps that show in detail how North of US 14 the City of Byron has set up their industrial park to accommodate an interchange and even moved the old frontage road to allow space for ramps. On the south side of US 14 I believe right of ways were purchased at the time the four lanes were put in about 1976 or so.

From a township outlook we assume that our road right of way will not be compromised. We do our own planning and zoning in our township and if an interchange becomes a reality the County Line Road right of way will need to be increased significantly. Also, Frontier Road is long range to become the main arterial road south of US 14 extending from Kasson to Rochester.

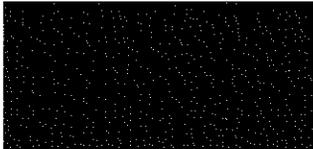

As a property owner I do not rent out my land but I do hire some work done by those who have larger equipment. We use Greenway Coop for custom spraying and their equipment requires 90 feet, the farmer that works the land requires 50 feet for his tillage equipment. When corn is planted (Corn Maze) the corn planter requires 42 feet. Our family has owned and operated our farm for many years; we will be applying for century farm status in 2010.

As a business owner we operate what is known as Tweite's Pumpkin Patch, come 2009 will mark our 21st year of operating this special amusement park. Our farm is involved in Agri-tourism; we have ten acres of permanent amusements. Along with the ten acres we also have four to six acres of corn maze and six to eight acres of U-pick pumpkins. During a five week period in the fall we open our farm to the general public. Last years attendance was more than five times the population of Byron. The rest of the year is only open to corporate and family private events/picnics. These types of events generate 100 to 1500 people per single event (could be only the banquet hall or use of all ten acres plus the corn maze starting in August). To find out more of what services we offer please go

to our website www.tweite.com. Photo "C" shows where our parking lots are (5 acres). The north lot holds approximately 95 cars. The south lot holds approximately 300 cars and is flagged for expansion to bring this lot to 400 cars. The east lot holds approximately 120 cars with exposure to open fields for overflow (overflow was used 3 times in 2008). If our route is chosen we would need to work out issues in our graveled parking lots assuming the line runs along the road right of way. I would also like to note that the corn maze is an attraction that all our customers enjoy (see photos). This would also need to be worked out how people and poles will work. The other amusements next to the road right of way will also need to be discussed.

I would invite a representative of Xcel Energy to discuss further options, liability issues of line past our facilities. We really would like all involved to truly understand what happens here and the volumes of people involved with our business.

Tom Tweite

Proposed Pleasant Valley Transmission Project Survey

Thank you for your interest in the proposed Pleasant Valley Transmission Project. Please take a few minutes to complete this survey and give it to a team member before you leave.

Open House Location – Rochester International Event Center, November 17, 2008

1. In which township/city do you reside? Rochester
Which section? 31

2. Do you own property that may be crossed by the proposed Transmission Project?

Yes No Don't know

1/2 mile away

3. Did we address your most important issues regarding the proposed Pleasant Valley Transmission Project?

Yes No Don't know

If you checked "Yes," what is the most important issue to you? If you checked "No", what important issue or potential route have we missed?

** Our biggest concern is losing electricity, especially after it snows. Trying to survive 3 days without electricity was quite a feat, especially with our neighbors that raise Beef Cattle. Every winter we end up without electricity for a long period. Will you update current lines along both Ave S.W in front of our house? Would like to know what type of cost a day...*

Will be incurred with this project and how it will impact my current electric Bill with Peoples Coop.

5. What role do you think renewable energy (i.e. wind, solar, hydro, biomass) has in providing for Minnesota's future energy needs? What do you think are the benefits and drawbacks of renewable energy?

Need to learn more about renewable energy before I can comment on this.

I see wind turbines going up all over - am not sure of any drawbacks with these except losing ag land -

Please complete the information on the back of the page if you want to be added to our mailing list.

Thank you for attending the open house.
