

Mr. Hargis and Mr. Storm,

Comments from Citizens's Against the Mesaba Project regarding the Mesaba Project Draft Environmental Impact Statement.

Mesaba Energy Project, PUC Docket No. E6472/GS-06-668

DOE Draft EIS for the Mesaba Energy Project (DOE/EIS-0382D)

Submitted by: Citizens Against the Mesaba Project (CAMP)

Several emails with attachments will follow due to the size of the file. The attachments are CAMP's comments with regard to the DEIS as well as additional supporting information that will be important in properly addressing the environmental impact of this project.

I had previously asked each of you to reevaluate scoping comments that we feel are not adequately addressed in the Draft EIS. Because I have not had a response to this question, and because CAMP feels that many of these comments are appropriate, they have been submitted again. This includes comments of the Citizen Advisory Task Force, the MPCA, the Army Corps of Engineers, Citizens Against the Mesaba Project, and individual citizens.

I would hope that you find these comments important in your evaluation. We have worked hard to ensure that these comments are within the scope of the EIS and/or directly relate to information contained in the Draft EIS. Certainly comments from governmental agencies such as the MPCA should be critical to your evaluation. We expect that CAMP's comments will be properly and thoroughly reviewed in the Final EIS.

If for any reason you have difficulty receiving the forthcoming emails, please let me know. CAMP's comments will also be available on our website in a day or two at www.camp-site.info Please add this email as part of CAMP's Draft EIS comments.

Ed Anderson, Citizens Against the Mesaba Project

Mr. Hargis and Mr. Storm,

At this time you should have received CAMP's complete comments on the Mesaba DEIS. This should have consisted of 11 emails (excluding this one) and a total of 36 attachments.

Please acknowledge receipt of this information.

Thank you,

Ed Anderson
