Dear Mr. Birkholtz, My name is Steve Temes and I am a resident located on Minnesota ave. directly less than 100 yrds from the sub station on highway 14 and hwy US 8. I was unable to attend the meeting that took place on Tuesday evening the 27th of Feb. My concern is that I have an ICD and Heart Pacemaker implant and was told by several Cardiologists to avoid residing near high powered transmission lines as this might have an effect on my medical implanted device. I would appreciate your response to this concern as other wise I have no objection to the proposed plan.

Sincerely yours,

Steve Temes
