Subject: Great River Energy
115 kV Badoura
House Counts
UEI Project No. 106.0895

Carole,

We have enclosed aerial photos and corresponding house location summarization as requested along the existing transmission line route along Highway 20 and for the alternate route along 209th Avenue and State Highway 34.

It appears to me that the existing transmission line route would affect a much smaller number of homeowners than the alternate route. There is also the existing distribution line along the north side of State Highway 34 that needs to be considered. Will this existing distribution line become underbuild on the alternate route, would it be buried, or would alternate route be along the south side of Highway 34? There may also be significant buried utilities along the State Highway 34 corridor.

Please review and call me if you have any questions.
