I have repeatedly experienced the

have alarms going off, caused  
by outages. Please approve this

**Comments:**

I recently moved to the area because  
~~as~~ I know this area is changing  
and changing for the better.  
I know this project is a must. I  
strongly feel that the transmission  
lines must go under ground. We are  
working hard to improve our area.  
Please do not come and put up the  
transmission lines in the neighborhood.  
I live right along the greenway route  
and currently have a nice view of the  
greenway, I hope to not lose this.

Several, actually - 1. Safety, 2. Aesthetic, 3. Removal of housing in an area already strapped for affordable housing, 4. environmental impact - will there be damage during construction? will we lose already scarce green space? Are there run-off concerns? What are the effects of so much voltage running through densely populated areas? Why does this stuff always go into the poorest neighborhoods in the city?

Aesthetic.  
I'm concerned about the impact on already struggling neighborhoods - who wants to buy next to a sub-station?  
And the 115KV towers look so menacing - they would destroy the Greenway.

9. What suggestions do you have for improving the *recommended* route (29<sup>th</sup> Street corridor)?

I'd prefer to see these lines routed along existing large transportation corridors, rather than along green corridors.  
 Since the Western substation is next to 35W, why not bring the transmission lines down 35W, rather than along the Greenway?

10. Please provide any additional comments you have about the Hiawatha Project.

I agree with some of those objecting to the project, that it would be good to see more <sup>detailed</sup> information about the actual and projected needs of the community.

Re: Hiawatha Project: Midtown Substation Placement

Dear Dave;

Wells Fargo recognizes the need for sufficient, reliable and affordable electrical service to sustain South Minneapolis' area neighborhoods and employers. We concur with your recommendation not to place a substation on our campus and ask that you please include your recommendation in your application to the Public Utilities Commission.

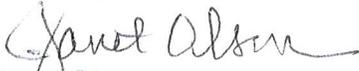

Wells Fargo's desire is to have the new midtown substation placed in a location that does not reduce green space nor diminish Wells Fargo's ability to expand our facilities, add jobs and increase the parking necessary to accommodate those jobs.

Specifically, the City of Minneapolis' approved Travel Demand Management plan allows for a parking ramp expansion so we can accommodate an increase in our work force as we someday reach capacity at our site. This future expansion opportunity would be eliminated if the proposed surface lot substation option were to be recommended and approved.

Wells Fargo has invested nearly \$200 million in revitalizing and redeveloping our campus and we want to preserve our investment and our ability to grow there.

Thank you for your time and consideration. Should you have any questions or need additional information, please do not hesitate to contact me.

Sincerely,

**Sent:** Mon Mar 30 14:52:00 2009  
**Subject:** Hiawatha Project - Xcel Substations & Transmission Lines  
Pam (or to whom it may concern):

I live at the Midtown Exchange Condos on the Greenway. I am also on the Association Board of Directors for our building. Our location on 29th Street between 10th and 11th Street. See below map.

<http://www.midtownexchangecondos.com/location/>

I have attended the public meetings Xcel has held on the "potential locations" for the transmission lines to connect the substation sites. The last Xcel meeting I was shocked to learn of the "proposed final" locations for the transmission lines - and was mostly shocked that these were to be along the Midtown Greenway. The Greenway is such a wonderful place which serves so many people each and everyday that to possibly think of above ground transmission lines along its edges is just a disappointment to our community.

Specifically affecting us at The Midtown Exchange Condo building is the proposed location of an above ground transmission line to go on the corner of 10th and 29th Street. (Is this still the proposed location for a transmission line?). This is directly in front of the Midtown Exchange building! And of course, this just happens to be in front of my window/condo on the 4th floor of the Midtown Exchange. Words can not describe, as a first time home buyer, the anger and sadness that I felt upon learning of this proposed location. And for all of us at The Midtown Exchange this will negatively impact our property values.

While I understand that businesses are experiencing electricity supply and quality problems - as I am sure some households are as well or will - I (we) are *strongly* opposed to Xcel putting above ground transmission lines along the wonderful Greenway - and specifically directly in front of my condo and blocking my view of the Greenway.

We at the Midtown Exchange are trying to enhance the community. We have many great people moving into the area and specifically into the Midtown Exchange condo building. We hope that our "voice" speaks loudly as we as a community are strongly opposed to the above ground transmission lines.

We hope that Xcel will look at putting the transmission lines below ground or look at another location if they are to be above ground. Your response is appreciated.

Thank you for your time.
