

July 16, 2010

Dear Landowner:

You are receiving this letter because your property may be directly or indirectly affected by route alternatives for the proposed Potato Lake 115 kilovolt (kV) transmission line and substation project. This letter provides you with information on the proposed transmission line project, the state's high-voltage transmission line route permitting process, and future opportunities to participate in the process. I encourage you to familiarize yourself with the project, **sign up for the project mailing list**, and participate in the route permitting process.

PROJECT DESCRIPTION

On February 26, 2010, Great River Energy (GRE) filed a route permit application with the Minnesota Public Utilities Commission (Commission) under the alternative permitting process (Rules 7850.2800 to 784950.3900) for 7.25 miles of new 115 kV transmission line and a newly proposed substation. GRE would be named as permittee for the proposed project and would own the approximately 7.25 miles of 115 kV overhead transmission line. Itasca-Mantrap Cooperative Electric Association (Itasca-Mantrap), a GRE member distribution cooperative, would own the proposed Potato Lake Substation, and has purchased 3.2 acres of land on which to construct the new facility. Itasca-Mantrap would also own and operate all the associated low-voltage distribution facilities.

The proposed 115 kV Potato Lake transmission project would be located northeast of the city of Park Rapids in Hubbard County, Minnesota. The project would specifically be located in sections of Arago, Lake Emma, Todd, and Henrietta townships. GRE is proposing two possible routes for the transmission line, a preferred route and an alternate route. (*See attached figure*).

The project as described in GRE's route permit application would consist of the following:

- Construction of a new 115 kV Potato Lake Substation that would initially be operated at 34.5 kV until conversion to 115 kV is necessary.
- Construction of approximately 7.25 miles of new overhead 115 kV transmission line between the new Potato Lake Substation in section 21 of Arago Township and a tap point on GRE's existing Mantrap Sub Tap 34.5 kV line ("PM Line") in Lake Emma Township. The newly proposed transmission line would initially be operated at 34.5 kV until the surrounding transmission system is converted to 115 kV.
- Approximately 2.25 miles of existing 12.5 kV distribution line owned by Itasca-Mantrap would be removed, upgraded and attached/underbuilt to the proposed 115 kV structures along U.S. Highway 71 between the new Potato Lake Substation and 230th Street (Northern Pine Road).
- Installation/underbuild of new 12.5 kV distribution lines on the proposed 115 kV structures along 230th Street (Northern Pine Road) and 141st Avenue up to the intersection with County Highway 18.

REGULATORY PROCESS AND PROCEDURES

The Office of Energy Security Energy Facility Permitting (EFP) staff held a public information and environmental assessment scoping meeting on May 18, 2010, in Park Rapids, to gather public input on the applicant's proposed project and routes. At this meeting, the public had the opportunity to learn about the project and the state's high-voltage transmission line route permitting process, review the applicant's application, ask questions, submit comments, and propose route alternatives for consideration in the environmental assessment.

As part of this public comment process, a number of new route alternatives were submitted by an Advisory Task Force, landowners, and other stakeholders during a comment period that ended on June 1, 2010. **Property records indicate you are located near, or own property on, one or more of these route alternatives.**

The environmental assessment is currently being prepared by EFP staff; it will evaluate the potential environmental, economic, social, and human impacts for all of the routes identified in the scoping decision document. The environmental assessment is scheduled to be issued in late August 2010.

Once the environmental assessment is issued, a public hearing will be held in the project area. Anyone may speak at the hearing, present evidence, ask questions of GRE and EFP staff, and submit comments on the proposed project and alternative routes. In addition to receiving comments at the public hearing, the Administrative Law Judge will provide a comment period to accept written/emailed comments on the project.

A final decision by the Commission on the route permit for this project is not expected before October 2010.

Further information on Minnesota statutes and rules governing the routing process are available on the following website: <http://energyfacilities.puc.state.mn.us/TransmissionLines.html>.

PROJECT INFORMATION

Project Documents. A detailed explanation of the proposed project is provided in GRE's route permit application. Electronic versions of the route permit application and other documents relevant to this project are available for viewing and downloading at:

- Energy Facility Permitting website: <http://energyfacilities.puc.state.mn.us/Docket.html?Id=26124>
- eDockets website: <https://www.edockets.state.mn.us/EFiling/search.jsp>, under Basic Search, Docket Number select Year "10" enter Number "86" and click search.

Copies of the route permit application are also available for public review at:

Project Mailing List. Persons should contact the state permit manager (below) or register online at <http://energyfacilities.puc.state.mn.us/#MailingLists> to get their name on the project mailing list. Persons on the mailing list will receive project updates, notices of meetings/hearings, and notices of document availability for this project. **If you do not register to be on the mailing list you will not receive correspondence on the project after this notice.** Registration to the project mailing list is voluntary and may be done so at any time.

Project Contacts. If you have questions or if you would like further information about this project please contact:
