

Larry Hartman, Environmental Review Manager - PUC,

469 people have signed a petition on the Action Network telling you to Extend public comment period on Sandpiper pipeline.

Here is the petition they signed:

PUC Docket Number 13-474

WHEREAS, Enbridge Energy Limited Partnership doing business as North Dakota Pipeline Company has applied to the State of Minnesota Public Utilities Commission for permission to construct and operate a new crude oil pipeline called the Sandpiper Pipeline and”

WHEREAS, the Sandpiper Pipeline, scheduled begin construction in 2015 would carry 375,000 barrels of light sweet crude oil per day from the Bakken Shale Oil formation in North Dakota across Minnesota to an Enbridge shipping terminal in Superior, Wisconsin and;

WHEREAS, a significant portion of the Sandpiper Crude Oil Pipeline’s proposed route that crosses the Straight River, one of northwest Minnesota’s best trout waters as well as the Mississippi River immediately below Itasca State Park and near many of the highest quality lakes and marshes in northern Minnesota;

WHEREAS, the Minnesota Public Utility Commission has scheduled public meetings, hearings and public comment periods on the proposed Sandpiper and the public comment period ends on April 4th, 2014 and;

WHEREAS, many northern Minnesota residents own property along the proposed route and would be very interested in learning more about the route, alternatives to the route and how streams, lakes and marshes of concern to them might be affected by the proposed crude oil pipeline and;

WHEREAS, many northern Minnesota residents interested in learning about and/or participating in the public review of this crude oil pipeline are seasonal residents in Minnesota and are either unaware of the proposal or unable to fully participate in the public review process;

WE HEREBY RESOLVE TO PETITION THE MINNESOTA PUBLIC UTILITIES COMMISSION TO EXTEND THE PUBLIC COMMENT PERIOD AND HOLD ADDITIONAL PUBLIC INFORMATIONAL MEETINGS AND HEARINGS DURING A PERIOD THAT IS MORE INCLUSIVE OF ITS MEMBERS AND REQUESTS THAT THE OPPORTUNITY FOR FULL PUBLIC EDUCATION ABOUT AND PARTICIPATION IN THE PERMITTING PROCESS FOR THE SANDPIPER CRUDE OIL PIPELINE NOT END UNTIL AUGUST 1ST, 2014.

You can view each petition signer and the comments they left you below.

Thank you,

Friends of the Headwaters

The Public Utility Commission (PUC) has set a deadline of April 4th, 2014 for comments from the public. Since many of the local residents are seasonal, a longer comment period is needed so that they can become aware of the issues related to this proposed pipeline and make their comments and concerns known to the PUC. Please extend this public comment period to August 1st, 2014.

Minnesota residents are not being well enough informed on these big corporate projects being proposed to our state when we should be the first to know. We don't need to jeopardize our lakes and forests for oil tycoons to make another dollar. Also this isn't renewable energy so supporting it doesn't help our country be less reliant on crude oil.

The Earth is grievously wounded by the burning of fossil fuels. All the tipping points have been passed. Our air, water, ecosystems and all the life forms they support are being devastated by pipelines, oil spills, and all forms of fossil fuel extraction, movement, and production. The cumulative effects of future pipeline construction will further devastate the habitats they encroach upon. I call upon Larry Hartman, as environmental review manager for PUC, to extend the public comment period on the Sandpiper pipeline, so that all voices can be heard, and viable and prudent alternatives can be explored.

With hope for life on Earth and the Earth who sustains us all,

Carol

Dear Larry,

I own a cabin on Round Lake in Ponsford, MN. My family in clouding my 30+ cousins, 18 aunts and

uncles and my grandparents, have been residents and vacationers on round lake for 80 years. We still drink from the natural spring that flows from our beach to the lake. We have worked so hard to preserve our pristine lake and ground water. My family and I Stringly oppose the sandpiper pipeline extending through the white earth reservation. We request that you extend the public comment period to give seasonal residents time to give their opinions. Thank you, Grace (Thorndal) Steinberg

As a resident and lakeshore owner in Hubbard County I can assure you that a number of fellow lakeshore owners on our lake are not here during the winter months. Therefore the PUC's public hearing schedule for the Enbridge Sandpiper pipeline(docket #13-474) which is set to close Apr 4 needs to be extended to Aug 1 to allow these summer residents the time to become fully informed and to provide reasoned opinions on the proposed Sandpiper route through Hubbard County. Hubbard County is blessed with some of the clearest and cleanest lakes in the state. Absent lakeowners need to know all the details of this pipeline. Do not not misrepresent them. An extension to the deadline is the fair and democratic action to take.

I am appalled that you would allow the Sandpiper pipeline to go across our wetlands. The wild rice is a organic resource that will be endangered by allowing the pipeline to run through our land. Then to allow this pipeline to cross the Mississippi river twice first at the headwaters, and then across Hubbard County this river is a national monument. I don't see how you can preserve our waters and lands by allowing this to take place.

Please reconsider and and look into the impact that this will have on our cultural resources, wetlands and natural resources. Thank you for your time and assistance.

Respectfully,

Yvonne Irvine

Many property owners and visitors who love the lakes and countryside that will be impacted by the pipeline are not year-round residents of the area, or in many cases, even of MN. There surely are better routes than this one running close to bodies of water for Enbridge to use. In any case, a great number of the people whose land will be affected are away for the winter, and extending the hearing period until August will allow them to speak, rather than being barred from the process.

To avoid looking like this is an attempt to keep landowners out of the discussion, I urge you to extend the public comment period, and delay decisions until after that.

If we used hemp as a fuel source, we could become fuel efficient. Hemp can grow in any elevation and per acre produces more yield than cotton, which can only be grown in the south. stop destroying our planet for financial gain, there are other options besides letting oil companies monopolize the fuel industry, getting richer by the second!

Our family cabin is south of Park Rapids in Straight River Township, along where this proposed pipeline is going. I am extremely concerned that adequate notice has not been given to landowners who will be effected by this oil pipeline highway. We have spent nearly 40 years taking care of this

pristine piece of land, and our log cabin on one of the 400 lakes in the region. The small lake was designated an "environmental" lake where the loons return year after year. A place for family to gather and appreciate its natural beauty. The Straight River is one of the few trout streams left in Minnesota. There needs to be more time for the community to learn about how this project will effect their land and surroundings and the diminished value of the land we have invested in. Please consider our request to extend the public comment timeline. Thank you.

In view of Enbridge's dismal failure to manage previous pipeline spills such as the Talmadge River spill in Michigan, it is too dangerous to route another pipeline through our area. As a physician, I believe prevention of disease is preferable to treatment if possible. The same goes for pipeline spills. Our lakes are too valuable a resource to squander for minimal financial gains.

**304. Marybeth Lorbiecki Mataya** (*zip code: 54016*)

I have done a great deal of research on this and there are no pipelines without leaks, and these waters that run into the beautiful lakes in the area and the nation's Mississippi must not be tainted by Enbridge oil. This then runs into the oceans. I am the director of the Interfaith Ocean Ethics Campaign, and the faith communities of the world are saying no to this polluting of God's creation! My family also has canoed the Crow Wing for 30 years and it is not right to use these areas as a polluting transport system. It is time we turned to other energies.

The United States needs a comprehensive plan to move to renewable energy if we are to have any future for our grandchildren. The time is now to stop pumping oil and conserve until renewables take up the slack. Enhanced pipelines are the opposite of what is needed.

**381. Rebecca Hauge** (*zip code: 58102*)

These pipelines should not be rushed. Obviously, as the oil from our state is being shipped away as fast as it can be pumped, supplying our nation's oil needs was merely the initially-stated and obscuring purpose. It's merely for the profit of the oil companies and they must be forced to be environmentally conscious. This should be given as much time as needed.

If this is a Canadian Oil company going to transport Canadian oil, why can't the pipeline go across Canadian soil to get to a port in the Great Lakes (if that's where they are headed.) This is the same ruse that is used for Keystone Pipeline. The claim for a "safe pipeline" is just not true. It's not "if" a leak happens, it is "when". WHEN it does happen, US waters and soil are damaged FOREVER. Consider all the oil-contaminated areas already in the United States that have not been cleaned up years after the spill. Oil companies have no idea how to clean them up. The remedies they are using is technology from the 1960's or before and have not been effective. It all boils down to Big Oil MONEY, no matter who gets hurt. These decisions must not be made without input from those residents who will be most affected.
