I oppose the Sandpiper pipeline!

PUC Docket: 13-474

This proposed expansion of Enbridge's pipeline network would perpetuate extreme climate disruption. The Sandpiper would enable even more extraction and burning of dirty Canadian tar sands and fracked Bakken oil, while climate science tells us we need to be keeping this oil in the ground for a livable future.

We need to do everything possible to reduce our carbon footprint. Please don't extend this pipeline.

Name: Anita Martinez

Expanding through MN's Cleanest Water resources is terrible policy. Please reconsider the route & preserve our clean water & tourism.

Pipelines through our state should be kept to a minimum. They are prone to leaks, particularly with the chemistry of tar sands. We can't risk the damage they will do.

All of this oil will go to other countries. The risk is not worth the money.
I oppose the Sandpiper pipeline!
This proposed expansion of Enbridge's pipeline network would perpetuate extreme climate disruption. The Sandpiper would enable even more extraction and burning of dirty Canadian tar sands and fracked Bakken oil, while climate science tells us we need to be keeping this oil in the ground for a livable future.

No pipeline ever existed which has not had leaks. This oil is more caustic than normal oil. We are ruining the environment for cheap oil and profits for oil companies. Put our money in renewable energy.
