Comment: We purchased these 2 pieces of property for our wood heating as well as creation of trails. To walk on and enjoy the woods & also for our hunting.

If the power line went thru this area we would lose all the above mentioned needs.

Our property would be of no value. If they moved the line over east it would go near Bullock Game Sanctuary (West) or to close to Mattfield property where small children also) the have a small hobby farm. Theis East have a tree farm going the other way.

This is not an appropriate place where there are small children and to many people.

If the line went this Gold route the line would have to cross Hwy 8 Hwy 336 Wildwood Drive and Hwy #57!

The blue route would only cross (# and #) 2 highways (roads) in this area. The Gold Route has many more people & residences than the blue.

Please choose the blue route or better yet why not put it where other power lines exist like on Hwy 65?

Comment: I Commented on our other parcels of land on the 20A route (70 acres) of the power line went on the Gold route we would loose this land and then the line would travel along the East side of Hwy 336 and this would be our Main view. Every piece of our properties would be affected. Please consider the blue route. There are many homes on Bass lake and Laurentke Lake on 336. All our properties would loose value
