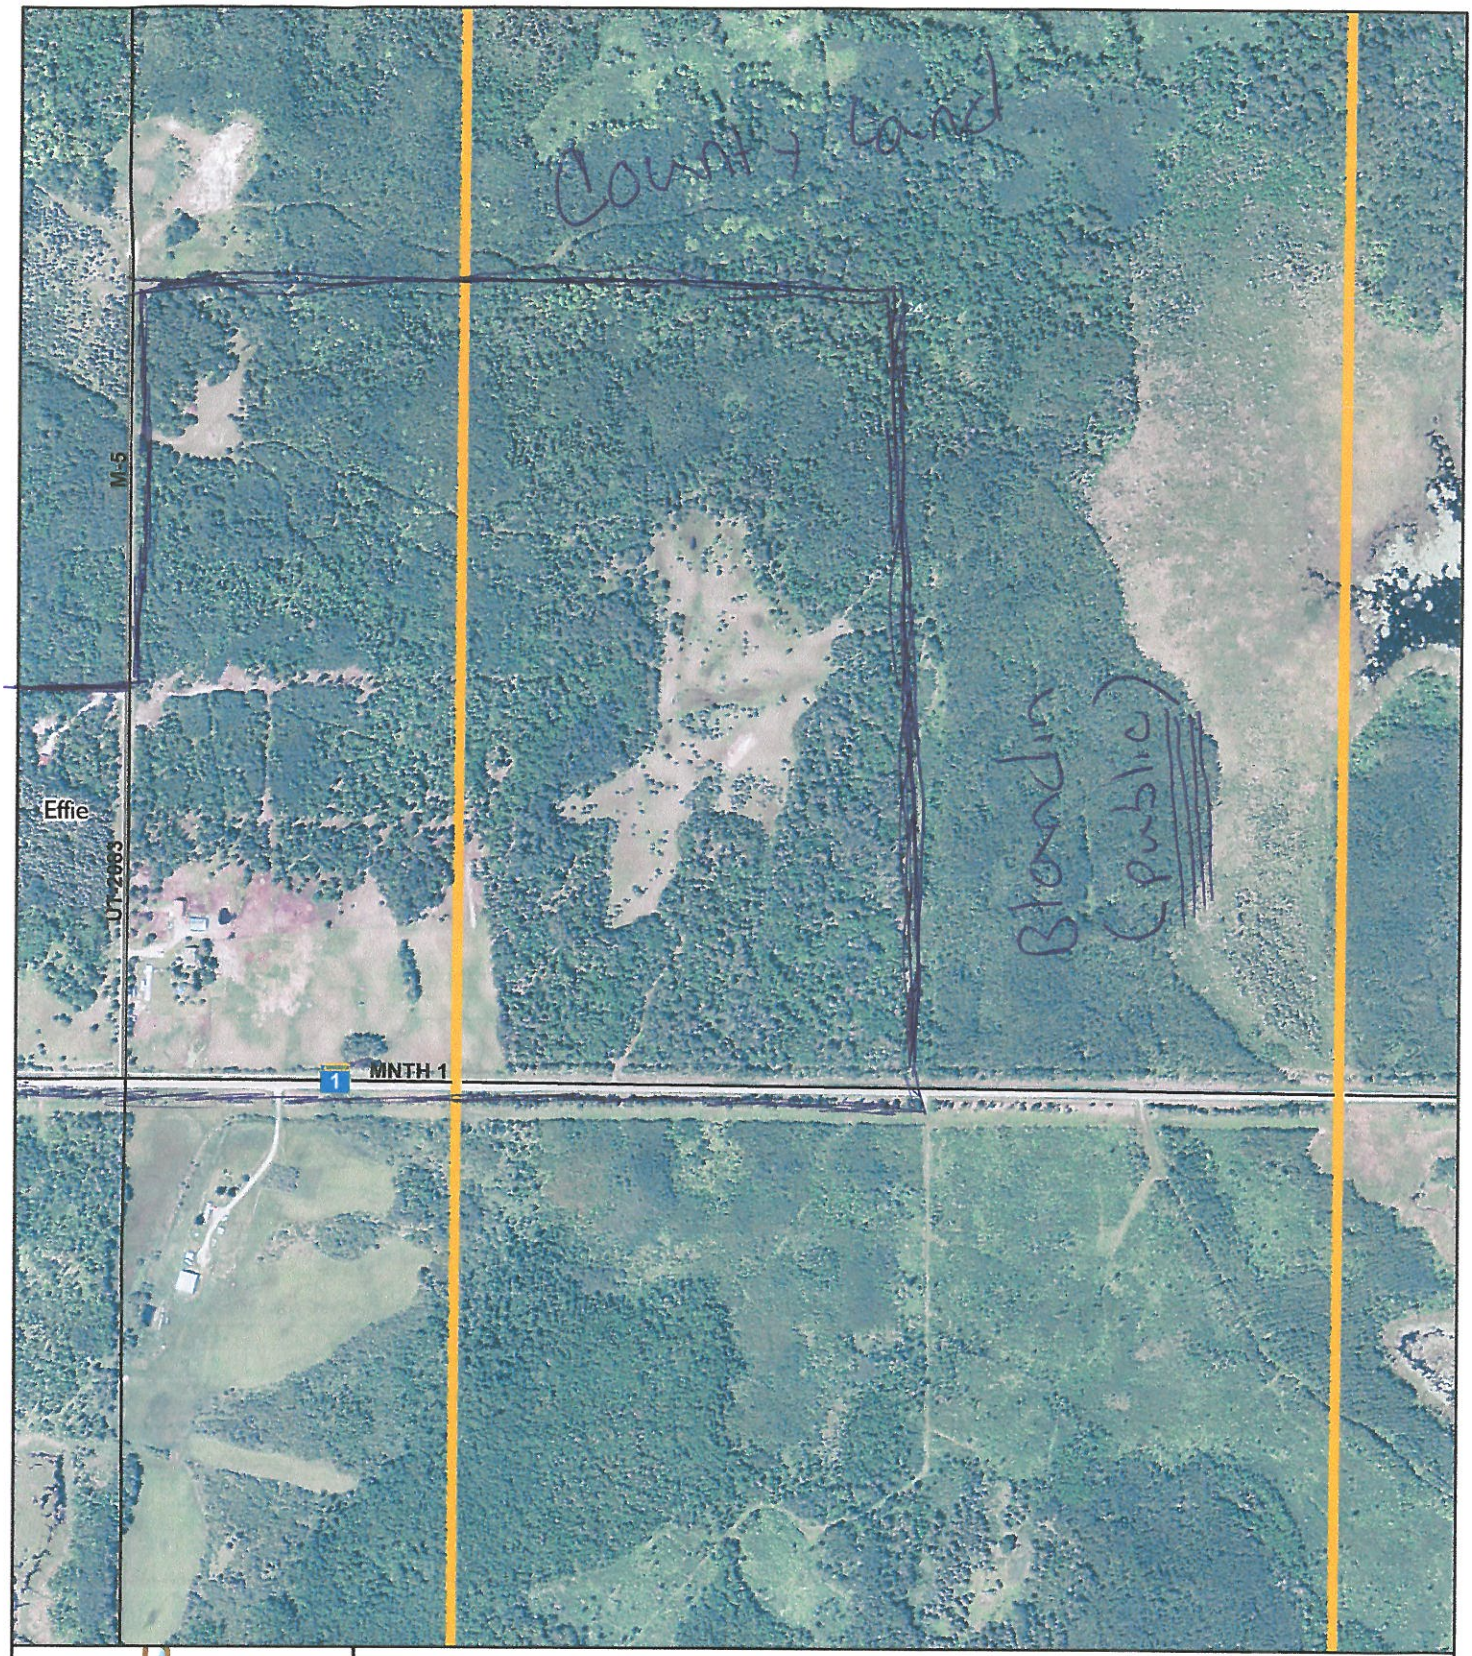
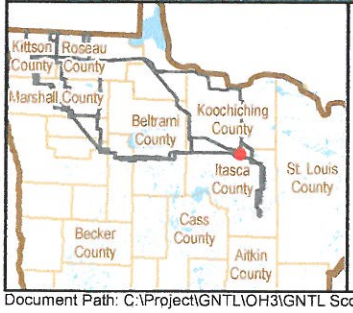
Comment: the preposed "Orange" Route is directly through my property, I'm a 2nd generation farmer with livestock and this route will dramitacly reduce my grazing land wich is not acceptable, as well as having livestock there is a gravel pit which is under an acre. Which is my planned retirement income, there is a greenhouse/nursery located on the property. The Business is a primary income that will be effected by the transmission line. There is Great concern for Health due to the Transmission line. It would make much more sense to use the Blandin (Public) land directly to the east of my property, and to the north is County land (Itasca)





West ↔ East.
