Impact: I would like to add to my previous statement, I am a producer of Reg. Seed Varieties, of Soybeans and Grass Seeds, and food Grade Soybeans, These towers would greatly hamper my farming practices! There is plenty of room for this Power Line to come across the border in State Land , that would be more beneficial to lots of things, such as open habitat for wildlife, could be used as Snowmobile Trails as is the case with other Power Lines in the State. This is a Manitoba Power Line coming into Mn. it should not come though at the expense of people making there living form the land! Thank's for considering the option to get this Power Line moved to the State land. Stuart
