I Bill, I attended your last meeting in Grand rapids and our family has property on the orange route if t is used. We have been trying to decide what to do with our family`s cabin. Would the PUC consider buying part or half of the property to construct the power line? It is a spruce swamp with no retail value beside the black spruce timber on it. I would then buy the remaining property from the family. We don`t want to lease the property and be stuck paying taxes on un-usable land.Thanks
