Subject: North Star solar site consolidation

Your Honor,

We are proposing a change to the presently planned North Star and Aurora solar sites. (see item 1)

In our proposal we have consolidated part of the North Star site and all of the Aurora site to a parcel presently under option by Geronimo Energy.(see item 2 Sunrise site)

The site change would positively affect 45 home plus additional lots.(Lent and north branch.)

One home would be negatively affected. (Chisago lakes township)

Site consolation would improve future growth potential for the surrounding communities .

There will be enough space left over to accommodate the Aurora Wyoming solar site .

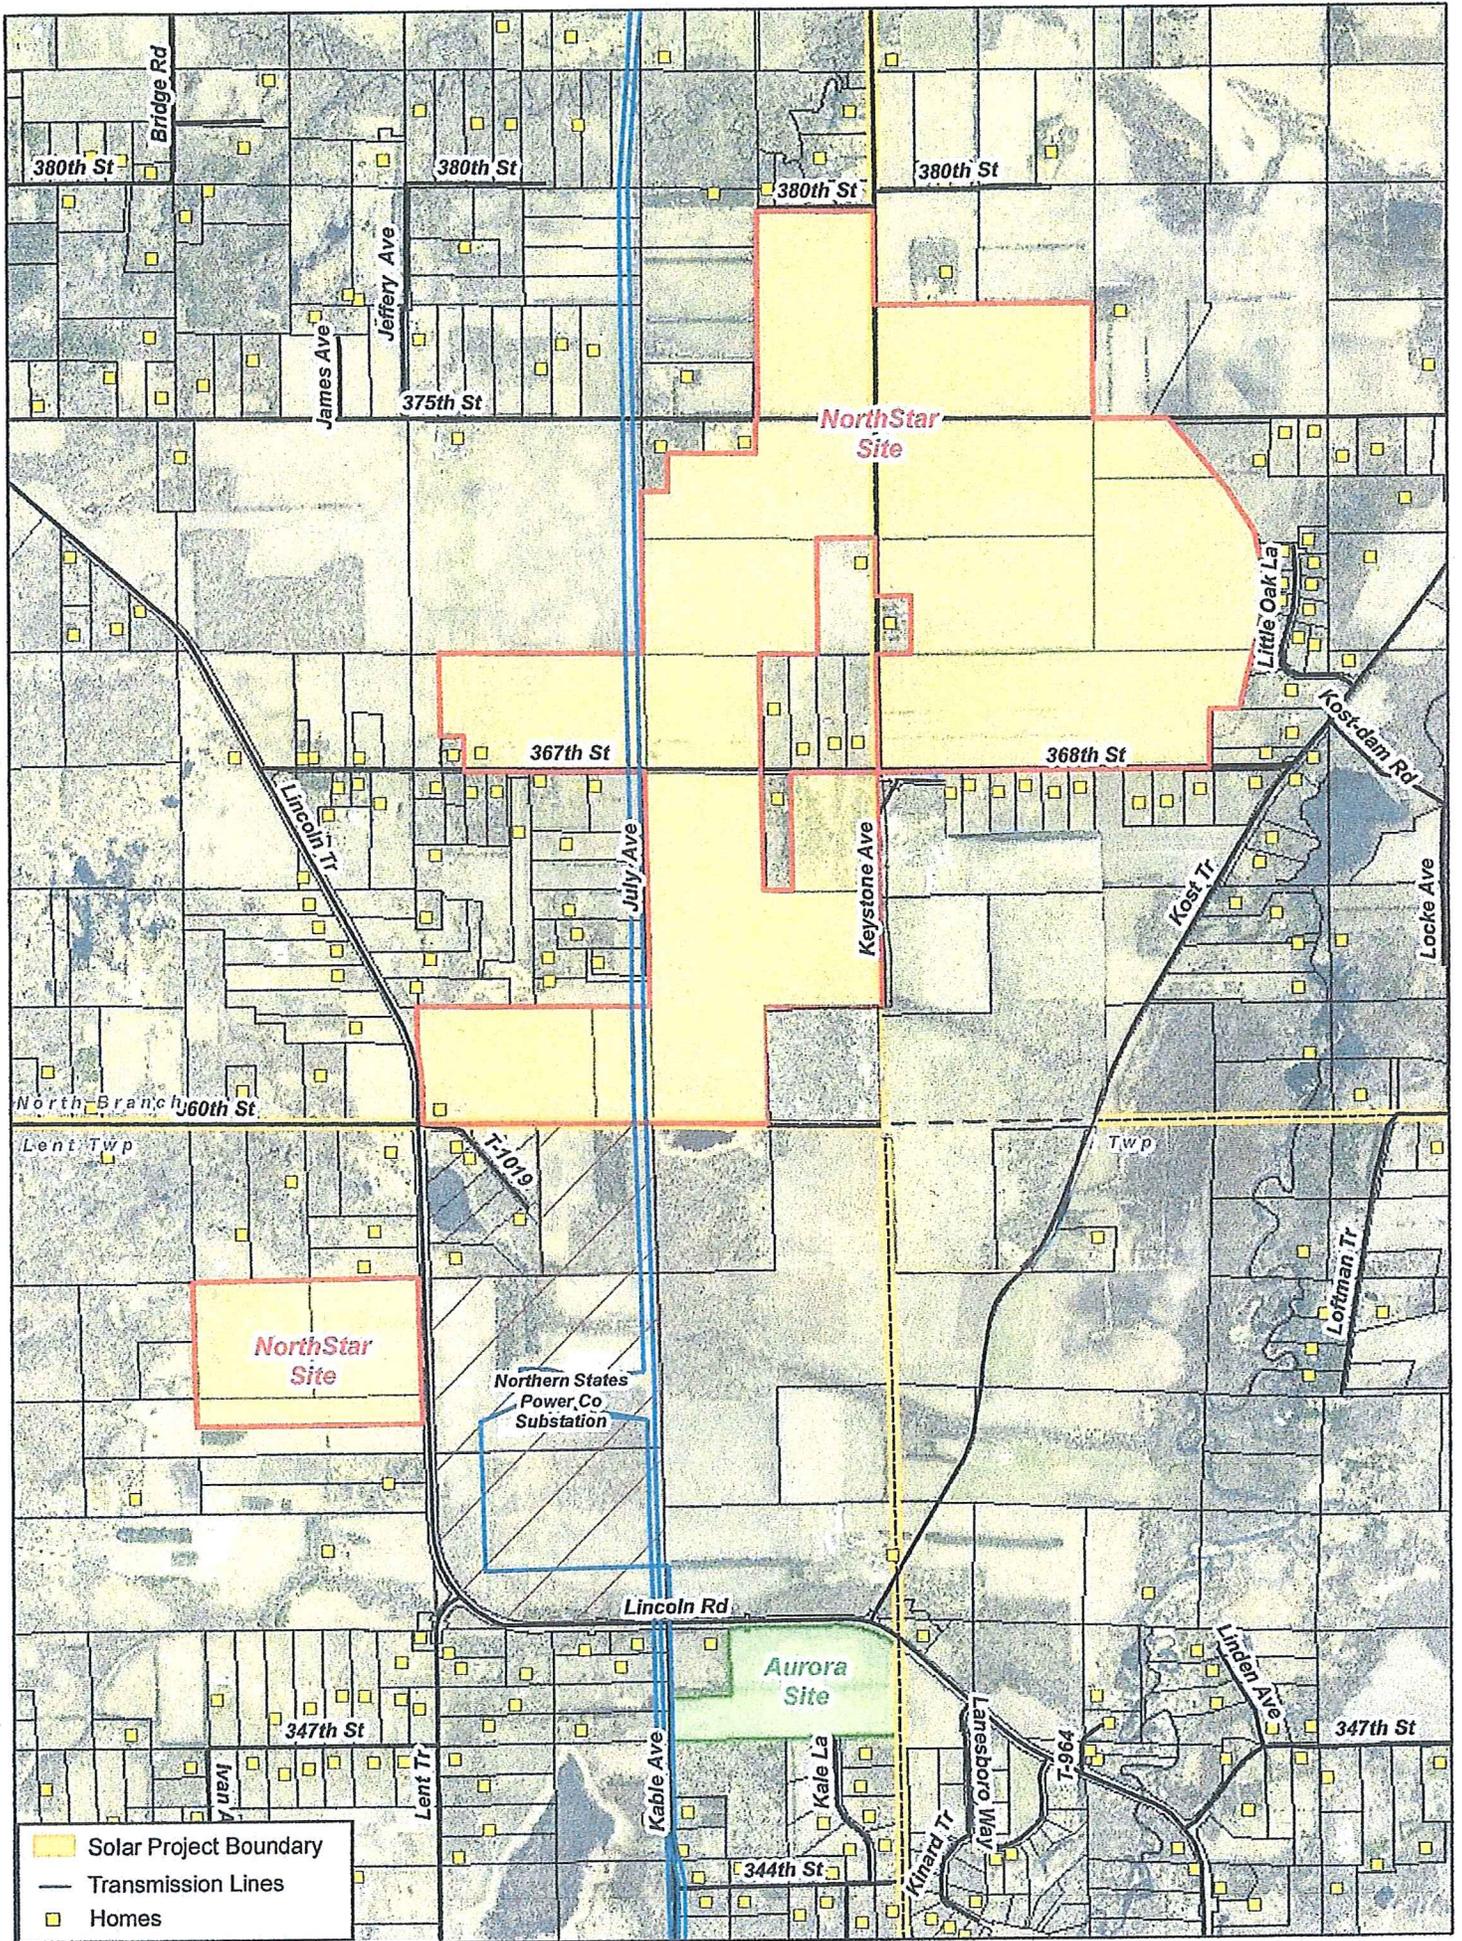

That would free up another 22 homes from the visual blight of the solar factory. Also leave future development possibility (Wyoming)

Reduce required perimeter fencing by approximately 3 miles.

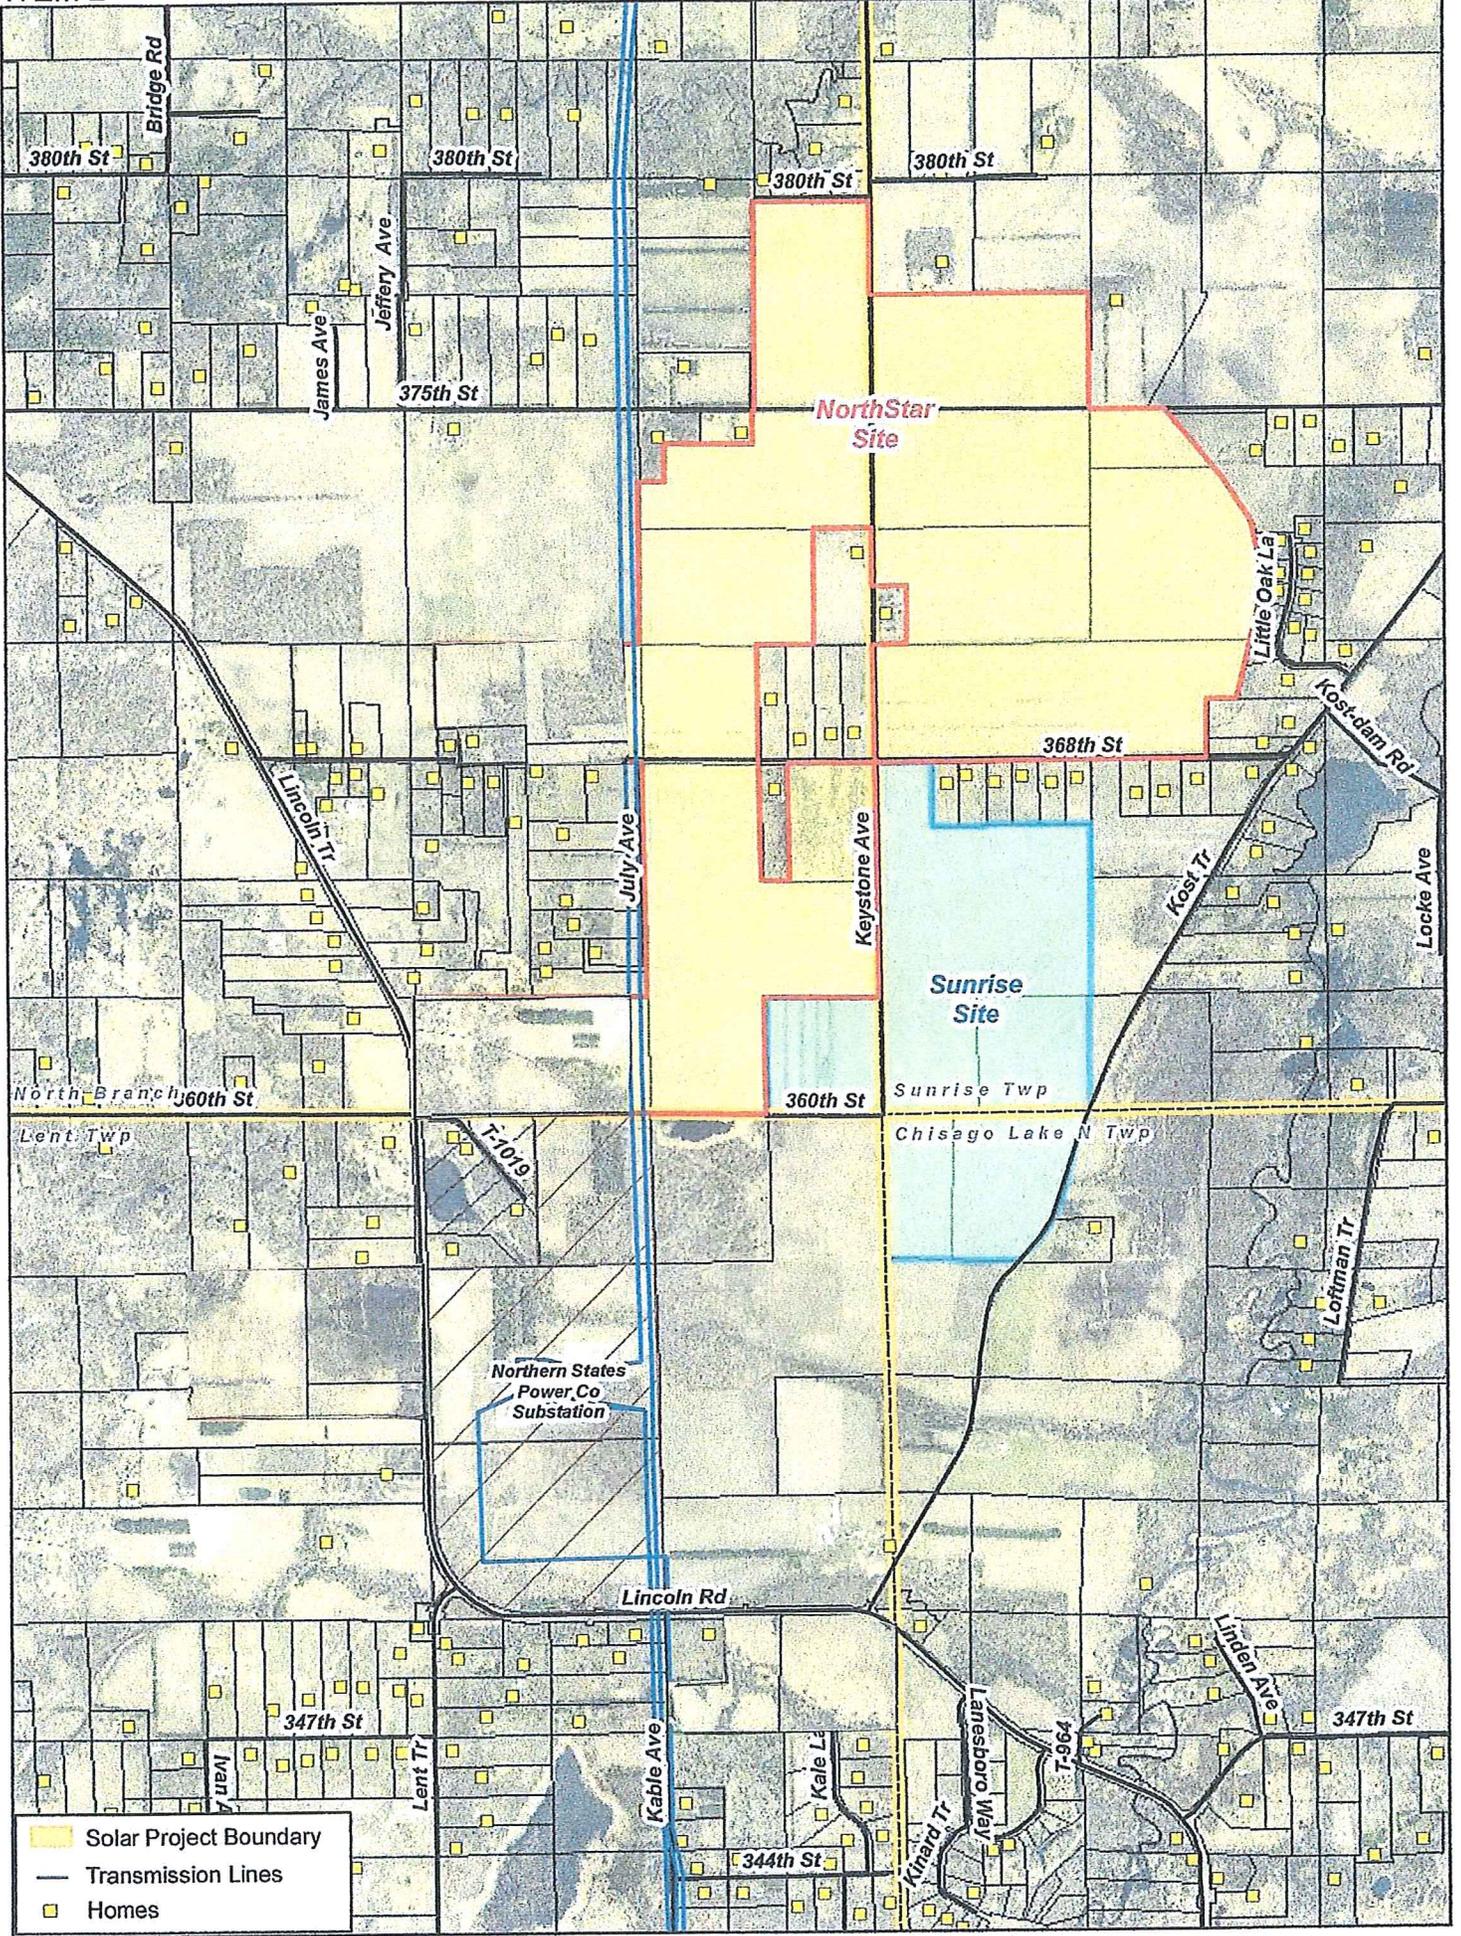

Combining Wyoming and Lent sites also reduce both companies overall project cost. (screening ,substation etc.)
