

ATTACHMENT #1 – PARCEL NO. 75 PHOTOGRAPHIC DOCUMENTATION

April 14, 2004

Photo #1. Closed tree canopy for much of the site from aerial photography taken in 2002; the center and northwest portions of the site still have a savanna canopy, while much of the remainder has a closed canopy.

Photographic Documentation Location Map

Photos #2 – 6. Site photos from April 14, 2004 – The tree canopy is composed primarily of pin and burr oaks with a few chokecherry and some stands of sumac. The oak canopy has closed in many areas so that coverage is nearly 100%.
