Executive Summary

This report, prepared in response to legislative session laws

CHAPTER 398, ARTICLE 2, Sec. 54.

[REPORT TO COMPARE FEDERAL AND STATE SPECIAL EDUCATION LAW.]

is in two parts: Part one dealing with comparisons between Minnesota Law and Federal IDEA requirements; Part two dealing with similar comparisons for Minnesota education rule. Due to the fact that a current revision of Federal rules is in progress, this report contains only comparisons with existing Federal law. Each part of the report is page numbered independently. The first page of each part of the report lists those laws or rules for which Minnesota requirements are consistent with the federal requirement. No further reference is made to those sections.

Each page of the body of the report contains three columns:

Column one is the exact text of a State statute or rule.

Column two contains the citation for the matching Federal requirement.

Column three contains either:

- a) a brief description of the difference, whether the Minnesota requirement exceeds or falls short of the Federal requirement and why, or
- b) a statement that there is no analogue in the Federal requirements.

In instances where Minnesota statute or rule exceeds the Federal requirement or for which there is no Federal analogue, the legislature of course has the option of maintaining, modifying, or eliminating the Minnesota requirement. In instances where the Minnesota statute or rule falls short of the Federal requirement, a decision must be made regarding how to proceed to correct the situation. There are three options:

- a) The Legislature may enact a statute to address the issue.
 - b) The Legislature may direct the State Board of Education to address the issue.
- or
- c) The Legislature may eliminate the Minnesota requirement which will mean that the Federal requirement applies.

Option "c" does not apply when the Federal requirement is for Minnesota to adopt a policy (statute or rule) to cover a specific topic.

Estimated costs associated with this report:

9 meetings, 6-7 participants x 3 hours. Each

Professional Staff - 222 hours @ \$28.75 (salary and fringe) =	\$ 6,382
Support Staff - 20 hours @ \$15.00 (salary and fringe) =	300

This report is presented in fulfillment of the legislative mandate set forth as follows:

Minnesota Session Laws - 1998
CHAPTER 398-H.F.No. 2874
ARTICLE 2 - SPECIAL EDUCATION
Sec. 54. [REPORT TO COMPARE FEDERAL AND STATE SPECIAL EDUCATION LAW.]
Subdivision 1. [REPORT.] The commissioner of children, families, and learning shall prepare a report comparing existing and currently proposed federal laws and regulations and state laws and rules governing special education, indicating those state laws and rules governing special education that exceed or expand upon minimum requirements under federal special education law or regulations. The commissioner shall make the report available by September 30, 1998, to the public, the state board of education, and the education committees of the legislature for consideration of amending state rules.

Instances of apparent breaks in numbering sequence within the document are the result of legislative repealers and renumbering by the Revisor of Statutes or, as shown to the right.

For the purposes of this report, and in the interests of conciseness, those portions of Minnesota law governing special education which are consistent with federal law have been omitted. These items are listed below. Items listed as consistent are not identical to federal language, and often add clarity to assist Minnesota districts in the application of Federal Law and Rule.

Instances of apparent breaks in numbering sequence within the document are the result of repealers by the State Board of Education or as shown to the right.

For the purposes of this report, and in the interests of conciseness, those portions of Minnesota rule governing special education which are consistent with federal law have been omitted. These items are listed to the right. Items listed as consistent are not identical to federal language, and often add clarity to assist Minnesota districts in the application of Federal Law and Rule.

Nondistrict placement: (1) When the pupil is placed in a residential facility or foster care by someone other than the resident district, the district in which the facility is located is responsible for providing an appropriate education program as set forth in statutes and parts 3525.0200 to 3525.4700 including the notice and hearing provisions. The resident district is responsible for assuming the cost of the educational program when notified in accordance with Minnesota Statutes, sections 120.17, subdivision 6, and 124A.036. The district is not responsible for the cost of care and treatment. (2) When the pupil is placed in a day treatment program by an agency other than the resident district, the resident district is responsible for determining the location of the special education services in accordance with the options outlined in Minnesota Statutes, section 120.17, subdivision 6. The resident district shall be responsible for ensuring that an appropriate program is provided in accordance with subparts 4 to 6, including all costs for the education program and any due process proceedings regardless of the method or locations of services selected.</p>

It is critical that behavioral intervention programs focus on skills acquisition rather than merely behavior reduction or elimination. Behavioral intervention policies, programs, or procedures must be designed to enable a pupil to benefit from an appropriate, individualized educational program as well as develop skills to enable them to function as independently as possible in their communities.</p>	<p>SEC. 1415. <p>3525.1325 AUTISM.</p>		
<p>Subpart 1. Definition. "Autism" is a lifelong developmental disability with onset usually in the first three years of life. It is a behaviorally defined syndrome characterized by an uneven developmental profile and disturbances in interaction, communication, and perceptual organization. Autism occurs on a continuum from mild to severe. It occurs by itself or in association with other disorders such as mental retardation or fragile X syndrome. It may include the diagnosis of pervasive developmental disorder. Because of the low incidence and complexity of this disability, professionals with experience and expertise in the area of autism need to be included on the team determining the disability and educational program.</p>		<p>State definitions are consistent with federal definitions which are much more general.</p>

<p>Subp. 2. Criteria. The team shall determine that a pupil meets criteria for autism according to the Diagnostic and Statistical Manual, Third Revision (DSM-III-R) of the American Psychiatric Association, the current accepted standard in the field. <i>The criteria for autism in (DSM-III-R) are incorporated by reference, DSM-III-R is subject to frequent change and is available through the Minitex interlibrary loan system. Consider a criterion to be met only if the behavior is abnormal for the person's developmental level. This finding must be supported by data from two or more of the following procedures: adaptive behavior scales, sociometric or social skill measures, achievement or cognitive tests; grades, systematic behavioral checklists or observations, vocational skill inventories, or reports. The data must document that the impairment:</p> <p>(1) severely interferes with the pupil's or other students' educational performance;</p> <p>(2) is pervasive as evidenced by occurrences across educational settings, the home, or in community settings;</p> <p>(3) has been in evidence for six months; or</p> <p>(4) occurs suddenly as a crisis of such intensity it results in imminent danger or harm to the pupil or others.</p> <p>D. Subpart 1. Definition. "Physically impaired" means a medically diagnosed chronic, physical impairment, either congenital or acquired, that may adversely affect physical or academic functioning and result in the need for special education and related services. 3525.1339 SEVERELY MULTIPLY IMPAIRED.		
Subpart 1. Definition. "Severely multiply impaired" means a pupil who has severe learning and developmental problems resulting from two or more disability conditions determined by assessment under part 3525.2500.		State definitions are consistent with federal definitions which are much more general.
Subp. 2. Criteria. The team shall determine that a pupil is eligible as being severely multiply impaired if the pupil meets the entrance criteria for two or more of the following disabilities: A. hearing impaired, part 3525.1331; B. physically impaired, part 3525.1337; C. moderate-severe mentally impaired, part 3525.1333, subparts 1 and 3; D. visually impaired, part 3525.1345; E. emotional or behavioral disorders, part 3525.1329; or F. autism, part 3525.1325. 3525.1341 SPECIFIC LEARNING DISABILITY.		
Subpart 1. Definition. "Specific learning disability" means a condition within the individual affecting learning, relative to potential. A specific learning disability is manifested by interference with the acquisition, organization, storage, retrieval, manipulation, or expression of information so that the individual does not learn at an adequate rate when provided with the usual developmental opportunities and instruction from a regular school environment. A specific learning disability is demonstrated by a significant discrepancy between a pupil's general intellectual ability and academic achievement in one or more of the following areas: oral expression, listening comprehension, mathematical calculation or mathematics reasoning, basic reading skills, reading comprehension, and written expression. A specific learning disability is demonstrated primarily in academic functioning, but may also affect self-esteem, career development, and life adjustment skills. A specific learning	SEC. 1402. <p>Subp. 2. Criteria. The team shall determine that a pupil has a specific learning disability and is in need of special education and related services when the pupil meets the criteria described in items A through C. Information about each item must be sought from the parent and included as part of the assessment data. The assessment data must confirm that the disabling effects of the pupil's disability occur in a variety of settings.</p> <p>A. The pupil must demonstrate severe underachievement in response to usual classroom instruction. The performance measures used to verify this finding must be both representative of the pupil's curriculum and useful for developing instructional goals and objectives. The following assessment procedures are required at a minimum to verify this finding:</p> <p>(1) evidence of low achievement from sources such as cumulative record reviews, classwork samples, anecdotal teacher records, formal and informal tests, curriculum based assessment results, and results from instructional support programs such as Chapter 1 and Assurance of Mastery; and</p> <p>(2) at least one team member other than the pupil's regular teacher shall observe the pupil's academic performance in the regular classroom setting. In the case of a child served through an Early Childhood Special Education program or who is out of school, a team member shall observe the child in an environment appropriate for a child of that age.</p> <p>B. The pupil must demonstrate a severe discrepancy between general intellectual ability and achievement in one or more of the following areas: oral expression, listening comprehension, written expression, basic reading skills, reading comprehension, mathematical calculation, or mathematical reasoning. The demonstration of a severe discrepancy shall not be based solely on the use of standardized tests. The team shall consider these standardized test results as only one component of the eligibility criteria.</p> <p>(1) The instruments used to assess the pupil's</p>		<p><i>There are no direct analogues to entrance criteria in Federal Law.</i></p>

The team must agree that it has sufficient assessment data that verify the following conclusions:</p> <p>(1) the pupil has an information processing condition that is manifested by behaviors such as: inadequate or lack of expected acquisition of information, lack of organizational skills (such as in following directions, written and oral; spatial arrangements; correct use of developmental order in relating events; transfer of information onto paper), memory (visual and auditory), expression (verbal and nonverbal), and motor control for written tasks such as pencil and paper assignments, drawing, and copying;</p> <p>(2) the disabling effects of the pupil's information processing condition occur in a variety of settings; and</p> <p>(3) the pupil's underachievement is not primarily the result of: visual, hearing, or motor impairment; mental impairment; emotional or behavioral disorders; or environmental, cultural, economic influences, or a history of an inconsistent education program.</p>

"Language disorder" means a breakdown in communication as characterized by problems in expressing needs, ideas, or information that may be accompanied by problems in understanding. Language patterns that can be attributed only to dialectical, cultural, or ethnic differences or to the influence of a foreign language should not be identified as a disorder. The team shall determine that a pupil has a language disorder and is eligible for speech or language special education services when the pupil meets the criteria in items A and B and either C or D: A. the behavior interferes with communication as judged by a teacher of communication disorders and either another adult or the child; and B. an analysis of a language sample or documented observation of communicative interaction indicates the pupil's language behavior falls below or is different from what would be expected given consideration to chronological age, developmental level, or cognitive level; and C. the pupil scores 2.0 standard deviations below the mean on at least two technically adequate, norm-referenced language tests if available; or D. if technically adequate, norm-referenced language tests are not available to provide evidence of a deficit of 2.0 standard deviations below the mean in the area of language, two documented measurement procedures indicate a substantial difference from what would be expected given consideration to chronological age, developmental level, or cognitive level.
