# Enterprise Architecture Office Design Note - SharePoint Authentication and Authorization

MN.IT Services has established internal procedures for managing accounts, authentications and authorizations for the SharePoint environments at connect.mn.gov, inside.mn.gov, partners.mn.gov and people.mn.gov.

As the details of those procedures comprise security information, they are considered non-public information and are released only to those people involved with their implementation.

Contact the Enterprise Architecture Office ([OET.EnterpriseArchitecture@state.mn.us](mailto:OET.EnterpriseArchitecture@state.mn.us)) for further information on this subject.
