Minnesota State Board of Investment

Minnesota Supplemental Investment Fund

July 1, 2018 Investment Prospectus
Managed by the Minnesota State Board of Investment
Executive Director’s Letter

July 1, 2018

I am pleased to present to you the Supplemental Investment Fund (SIF) Prospectus and Annual Report for the fiscal year ended June 30, 2018. This information provides you with the performance, fees, and general descriptions for each of the SIF investment options managed by the State Board of Investment (SBI). Total assets invested within the SIF options grew by 5.1% over the year and represent $3.7 billion in assets. Of that amount, $1.4 billion in assets are SIF options offered in the Minnesota Deferred Compensation Plan (MNDCP). The Volunteer Firefighter Account assets increased 17% over the year as more Local Fire Relief Associations joined the Statewide Volunteer Firefighter Retirement Plan.

At the end of June 30, 2018, the U.S. economy, as measured by real GDP, grew 2.9% from one year earlier and the U.S. labor markets unemployment rate remained low at 4.0%. During fiscal 2018, the Federal Reserve increased the federal funds target rate three times, from 1.00–1.25% to 1.75–2.00%. Strong economic growth, low unemployment and stable price pressures have made it easier for Fed officials to agree on a policy of gradually lifting rates.

The public equity markets posted strong positive performance, while the bond market posted a slightly negative return for the fiscal year ending June 30, 2018. The Russell 3000 Index, a proxy for the U.S. equity markets, returned 14.8% and the U.S. bond market, as measured by the Bloomberg Barclays Capital U.S. Aggregate Bond Index, returned -0.4%. International equity markets, as represented by MSCI ACWI ex USA Index (net), trailed domestic markets with a 7.3% return for the year.

In general, economic and market conditions have a dominant influence on the returns available to any investor. As an investor in the Minnesota Supplemental Investment Fund, or any other investment program, you should be prepared for periods in which the returns on financial investments may be low, or even negative. You should be aware that this possibility is much greater for accounts that emphasize relatively risky, higher return assets such as common stocks, than it is for more conservative investments such as money market instruments.

With these considerations in mind, the Minnesota State Board of Investment manages the Supplemental Investment Fund to provide competitive long-term returns. I encourage you to carefully review each of the accounts available to you and to choose those options that meet your own investment needs and risk and return objectives.

On behalf of the Board Members, members of the Investment Advisory Council and the SBI staff, I would like to express our gratitude to you for your continued support and participation in the investment funds presented in this prospectus. The Minnesota State Board of Investment seeks to enhance the management and performance of the assets under its control. If you have any questions regarding the Board’s investment policies and procedures, please contact the Minnesota State Board of Investment at 60 Empire Drive, Suite 355, St. Paul, MN 55103-3555, (651) 296-3328, or via e-mail at minn.sbi@state.mn.us. We welcome your inquiries.

Respectfully submitted,

Mansco Perry III
Executive Director and Chief Investment Officer
State Board of Investment
Supplemental Investment Fund

External Portfolio Management

The SBI offers a variety of funds to help participants reach their financial goals. The external investment managers hired by the SBI are listed under the respective investment option.

Over the long run, higher-risk assets are expected to provide higher investment returns than lower-risk assets. However, there is no guarantee that any investment will not suffer a loss of principal.

¹ All investment options are managed by external investment firms identified above.
Summary

What Is The Minnesota Supplemental Investment Fund?
The Minnesota Supplemental Investment Fund (SIF) is a multi-purpose investment program that offers a range of investment options to state and other public employee groups. Participants may allocate their investments among one or more funds that are appropriate for their needs and are within the rules and eligibility established by the participating plans. The SIFs are structured like a family of mutual funds.

What Investment Options Are Offered?
There are a total of eight investment options and each one offers different advantages and risks. As of June 30, 2018, participating plans invested a total of $3.7 billion with the SIF. This amount includes the $1.3 billion Stable Value Fund and $76 million Money Market Fund account balances within the Minnesota Deferred Compensation Plan (MNDCP). The SIF options are described in greater detail on the following pages.

The fund choices you have depend on the plan in which you participate. For example, the Volunteer Firefighter Account is only available to participants in the Statewide Volunteer Firefighter Retirement Plan, which is described in a separate Prospectus. Also, contact your plan administrator for more specific information. Please note that special restrictions apply to transfers out of the Stable Value Fund (see page 11).

May I Change The Way I Invest My Contributions?
Yes, but the guidelines vary among plans. You should contact your plan administrator for more specific information.

What Are the Administrative Fees And Who Should I Contact With Questions?
For the upcoming fiscal year, SBI’s administrative fees are approximately $0.06 per $1,000 invested (0.6 basis point). The administrative fee is charged per SBI account, not per investment option and is deducted after the fund share value has been calculated. Individual plan participants should contact the appropriate plan administrator for questions related to any other administrative fees that may be charged. The plan administrator will also handle changes in the way you invest your funds and maintain your individual investment records.

Are All These Options Available To Me?
The fund choices you have depend on the plan in which you participate. For example, the Volunteer Firefighter Account is only available to participants in the Statewide Volunteer Firefighter Retirement Plan, which is described in a separate Prospectus. Also note that there may be other participating plans which are not listed below that invest in the SIF as allowed under state statute.

Commentary and Relative Performance

How Have Stocks, Bonds And Other Investments Performed?
The U.S. stock market, as measured by the Russell 3000 index, increased 14.8% for the year ending June 30, 2018. Within the Russell 3000, growth companies outperformed value companies. The Technology sector was the best performing sector in the Russell 3000 with a 29.4% return, while the Consumer Staples sector was the worst performing sector with a -6.5% return.

The U.S. bond market, as measured by the Bloomberg Barclays U.S. Aggregate Bond Index, returned -0.4% for the fiscal year. Within the bond market, Asset Backed Securities (ABS) were the best performers with a 0.4% return for the year while Corporates had the lowest return of -0.8% for the year.

International equity markets returned 7.3% for the year in U.S. dollar terms, as measured by the Morgan Stanley Capital International All Country World Index excluding the United States net of taxes on dividends (MSCI ACWI ex USA Index net), which represents the developed and emerging international markets outside the U.S. The MSCI World ex USA Index (net), which represents developed international markets had a return of 7.0% for the year. Japan and the United Kingdom, which together comprise over 38% of the index, returned 10.5% and 9.9%, respectively. The emerging markets, as measured by the MSCI Emerging Markets Index (net), returned 8.2% for the year in U.S. dollar terms. China, Korea and Taiwan were the largest countries in the index at the end of the fiscal year with a combined weight of over 58%. They returned 21.2%, 3.4% and 3.9%, respectively.

How Did Returns In The Minnesota Supplemental Investment Fund Compare For Fiscal Year 2018?
The Broad International Stock Fund outperformed the international composite index by 0.2 percentage points for the fiscal year. The composite index is comprised of approximately 76% developed markets and 24% emerging markets. Overall, the developed markets managers outperformed and the emerging markets managers trailed their respective indices.

The U.S. Stock Actively Managed Fund outperformed the Russell 3000 index by 3.4 percentage points for the fiscal year. Both active mandates and semi-passive mandates exceeded their respective style benchmarks for the year.

The U.S. Stock Index Fund matched its benchmark, the Russell 3000, for the fiscal year.

Special Note Regarding Your Individual Account Performance.
Your plan administrator or reporting agency accumulates your contributions and transfers these contributions to various accounts in the fund. The actual performance of your investments in the Supplemental Investment Fund may be somewhat higher or lower than these figures due to the timing of those transfers. Note that performance calculations may also differ due to rounding.
The Broad International Stock Fund has a market value of approximately $196 million. The objective of the fund is to earn a high rate of return by investing in the stock of companies outside the U.S. The fund's benchmark is the Morgan Stanley Capital International All Country World Index excluding the United States net of taxes on dividends (MSCI ACWI ex USA Index net).

Typically, a majority of the fund is invested in the largest international stock markets (Japan, United Kingdom, Canada, France, Switzerland and Germany). Most of the remainder is invested in other well established markets in Europe and the Pacific region. Approximately twenty percent of the fund is invested in developing countries, or “emerging markets”, around the world including those in Asia, Latin America, Eastern Europe, the Middle East and Africa.

A quarterly factsheet is available for this fund on the SBI’s website at http://mn.gov/sbi.

Why Would I Choose This Fund?
This option will be attractive if you believe that, over time, international stocks will provide high returns and provide diversification to your total portfolio of assets. The fund is made up of active, semi-passive and passive managers. The active international stock managers use a variety of investment styles and approaches. These managers buy and sell stocks in an attempt to maximize market value. The remainder of the fund is passively managed to closely approximate the returns of the international markets and semi-passively managed to add incremental value over the index return by investing in broadly diversified portfolios of stocks in the developed and emerging markets.

The returns from the fund will rise and fall with movements in the international stock markets. As with all options that use common stocks, you must be willing to accept returns that may vary widely in the short-term. While this investment strategy has the potential to produce returns that exceed those of a combined index comprised of both the developed markets and emerging markets, there also may be periods when the returns fall below the index return.

Who Manages The Fund?
The Broad International Stock Fund uses a group of international stock investment managers retained by the State Board of Investment (see page 2 for a listing of these managers).

How Is The Value Of This Fund Determined?
You own shares in the fund, much like you would in a mutual fund. The share value is determined daily and is based on the market value of the entire fund. Any dividend income is reinvested in the fund at the time it is earned. Your investment returns are measured by changes in the share value and reflect all realized and unrealized gains (or losses) generated by the fund.

What Is The Past Investment Performance Of This Fund?
The graph below shows how $1,000 invested in the fund on June 30, 2013, has grown. Cumulatively, $1,000 would have grown to $1,364.

The table below displays the fund’s actual share values and returns for the last five fiscal years. The annualized (annual compounded) return during this five year period was 6.4%.

The U.S. Stock Actively Managed Fund has approximately $259 million in assets. The primary objective of the fund is to generate high returns from capital appreciation (increases in the market value of the assets it owns) as measured by the Russell 3000 Index.

The fund is composed almost exclusively of stocks of U.S. listed companies. The small amount of cash in the fund represents the new contributions prior to investment in the market as well as any cash held by the individual managers within the fund.

The fund is managed by a group of investment managers retained by the State Board of Investment. As a result, the fund encompasses a range of investment styles and approaches. One set of managers actively manages portfolios in specific segments of the U.S. stock market. Another set of managers attempts to add incremental value by investing in a broadly diversified portfolio of stocks across a wide range of industries. This structure assures that the fund covers all areas of the broad stock market.

A quarterly factsheet is available for this fund on the SBI’s website at http://mn.gov/sbi.

Why Would I Choose This Fund?
The U.S. Stock Actively Managed Fund is an actively managed aggressive investment program focused on U.S. stocks. You would choose this fund if you believe that, over time, the stock market will provide higher returns than other types of investments and the managers of the Fund will buy and sell stocks that, in total, do better than the broad stock market.

The returns from the Fund will rise and fall with movement in the stock market. As with all options that use common stocks, you must be willing to accept returns that vary widely in the short-term. The returns from the Fund are likely to fluctuate more widely than returns from the U.S. Stock Index Fund, the Balanced Fund or the Bond Fund. While it has the potential to produce returns that exceed those of the broad stock market, an active investment strategy may also experience periods when its returns fall below the market. The potential for higher gains over the long run may compensate for higher short-term volatility of returns.

Who Manages The Fund?
Assets in the U.S. Stock Actively Managed Fund are managed by a group of investment managers retained by the State Board of Investment (see page 2 for a listing of these managers).

How Is The Value Of This Fund Determined?
You own shares in the fund, much like you would in a mutual fund. The share value is determined daily and is based on the market value of the entire fund. Any dividend income is reinvested in the fund at the time it is earned. Your investment returns are measured by changes in the share value and reflect all realized and unrealized gains (or losses) generated by the fund.

What Is The Past Investment Performance Of This Fund?
The graph below shows how $1,000 invested in the fund on June 30, 2013 has grown. Cumulatively, $1,000 would have grown to $1,916.

The table below displays the fund’s actual share values and returns for the last five fiscal years. The annualized (annual compounded) return during this five year period was 13.9%.

U.S. Stock Index Fund

The U.S. Stock Index Fund has a market value of approximately $615 million. The objective of the fund is to generate high returns that closely approximate the returns of the U.S. stock market as a whole. The fund is invested primarily in U.S. stocks.

The fund invests in over 2,700 domestic stocks and is designed to replicate the returns produced by the Russell 3000. The Russell 3000 is a stock market index like the Dow Jones Industrial Average. In effect, the diversity of stock holdings in the U.S. Stock Index Fund represents the broad domestic stock market.

A quarterly factsheet is available for this fund on the SBI’s website at http://mn.gov/sbi.

Why Would I Choose This Fund?
This option will be attractive to you if you believe that, over time, stocks will provide higher returns than other investments. You should note, however, that the U.S. Stock Index Fund is passively managed. This means that no attempt is made to identify specific stocks that will perform better than others. Instead, the fund is designed to perform in-line with the broad stock market.

In actively managed funds such as the U.S. Stock Actively Managed Fund (see page 7), stocks are bought and sold in an attempt to maximize market value. While it has the potential to produce returns that exceed those of the broad stock market, an active investment strategy may also experience periods when its returns fall below the market. By contrast, the passive approach used in the U.S. Stock Index Fund should provide returns that consistently and inexpensively replicate the market.

The returns from the fund will rise and fall directly with movement in the stock market. As with all options that use common stocks, you must be willing to accept returns that vary widely in the short-term. In the long-term, the fund should average higher returns than you could obtain by placing your contributions in a fixed income or money market type fund.

Who Manages The Fund?
The U.S. Stock Index Fund is managed by BlackRock Institutional Trust Company, N.A.

How Is The Value Of This Fund Determined?
You own shares in the fund, much like you would in a mutual fund. The share value is determined daily and is based on the market value of the entire fund. Any dividend income is reinvested in the fund at the time it is earned. Your investment returns are measured by changes in the share value and reflect all realized and unrealized gains (or losses) generated by the fund.

What Is The Past Investment Performance Of This Fund?
The graph below shows how $1,000 invested in the fund on June 30, 2013 has grown. Cumulatively $1,000 would have grown to $1,867.

The table below displays the fund’s actual share values and returns for the last five years. The annualized (annual compounded) return during this five year period was 13.3%.

Balanced Fund

The Balanced Fund has a market value of approximately $444 million in assets. The objective of the fund is to earn a return from both capital appreciation (increases in market value) and current yield (dividends from stock and interest on bonds). To attain that goal, the fund uses a mix of stocks and bonds. While holdings may vary on a day-to-day basis, the following is the targeted asset mix:

- 60% Domestic Equities
- 35% Fixed Income
- 5% Cash

The stock segment of the fund is designed to replicate returns produced by the Russell 3000, a stock market index that reflects the broad U.S. stock market. The bond segment is actively managed and includes high-quality corporate bonds and mortgage securities as well as U.S. Government issues.

A quarterly factsheet is available for this fund on the SBI’s website at [http://mn.gov/sbi](http://mn.gov/sbi).

Why Would I Choose This Fund?
You would choose the Balanced Fund if you want a balanced or diversified investment portfolio in one fund. You must be willing to assume some risk with your investment, since returns will vary with changes in market conditions. Over the long run, the fund is expected to average higher returns than you could obtain by placing your contributions in a fixed income or money market instrument.

Market value growth and dividend income from the stock holdings can give you higher returns than are usually available from bonds and short-term (cash) investments. Conversely, while returns on bonds are often lower than returns on stocks, the bond holdings in the fund add stability and offer you some protection against wide swings in the general stock market.

Who Manages The Fund?
The Balanced Fund uses external investment managers to invest all of the assets in this fund. The bond assets are invested in the Bond Fund, which includes a group of bond managers retained by the State Board of Investment (see page 2 for a listing of these managers).

The stock holdings are invested through the same stock index fund used for the U.S. Stock Index Fund (see page 8 for a description of this passively managed index fund). The cash portion of the Fund is managed by State Street Global Advisors.

How Is The Value Of This Fund Determined?
You own shares in the fund, much like you would in a mutual fund. The share value is determined daily and is based on the market value of the entire fund. Any interest and dividend income is reinvested in the fund at the time it is earned. Your investment returns are measured by changes in the share value and reflect all realized and unrealized gains (or losses) generated by the fund.

What Is The Past Investment Performance of This Fund?
The graph below shows how $1,000 invested in the Balanced Fund on June 30, 2013 has grown. Cumulatively, $1,000 would have grown to $1,538.

The table below displays the fund’s actual share values and returns for the last five years. The annualized (annual compounded) return during this five year period was 9.0%.

Bond Fund

The Bond Fund has a market value of over $171 million. The objective of this fund is to earn returns by investing in fixed income securities (bonds).

Interest income and capital appreciation (increases in the market value of the assets) are the sources of returns for the fund. The fund invests the large majority of its assets in high quality government and corporate bonds and mortgage securities that have intermediate to long-term maturities, usually 3 to 20 years. The managers of the fund also may attempt to earn returns by anticipating changes in interest rates and adjusting bond holdings accordingly. While the managers invest primarily in the U.S. bond market, some are authorized to invest a small portion of their portfolios in non-U.S. bonds. Similarly, while the large majority of holdings in the fund will be top rated investment grade issues, some managers are authorized to hold a small portion in higher yielding, or below investment grade, debt issues. The aggregate holdings in non-U.S. and below investment grade debt are limited to no more than ten percent of the fund at any time.

The fund is invested entirely in fixed income securities. No stocks are held in the fund. At times, cash reserves may be raised if the investment managers forecast an increase in interest rates.

A quarterly factsheet is available for this fund on the SBI’s website at http://mn.gov/sbi.

Why Would I Choose This Fund?
The Bond Fund is a moderately conservative investment option. It will be attractive if you want an investment option that avoids common stocks, but you also want the potential for greater returns than you can obtain from money market type funds.

The returns from the fund generally will move in the opposite direction of interest rate changes. You must be willing to assume some risk with your investment, because the fund could report losses in periods when interest rates are rising.

Who Manages The Fund?
The Bond Fund is invested by a group of bond managers retained by the State Board of Investment (see page 2 for a listing of these managers).

How Is The Value Of This Fund Determined?
You own shares in the fund, much like you would in a mutual fund. The share value is determined daily and is based on the market value of the entire fund. Any interest earnings are reinvested at the time they are received. Your investment returns are measured by changes in the share value and reflect all realized and unrealized gains (or losses) generated by the fund.

What Is The Past Investment Performance Of This Fund?
The graph below shows how $1,000 invested in the fund on June 30, 2013 has grown. Cumulatively, $1,000 would have grown to $1,146.

The table below displays the fund’s actual share values and returns for the last five years. The annualized (annual compounded) return during this five year period was 2.8%.

Stable Value Fund

The objectives of the Stable Value Fund are to seek to provide preservation of principal, maintain adequate liquidity to meet potential participant withdrawals and generate a level of income consistent with an underlying portfolio of short to intermediate duration, high quality fixed income securities. The market value of the fund is approximately $1.6 billion.

The fund is invested in a well-diversified portfolio of high quality fixed income securities. The fund also holds insurance contracts issued by highly rated insurance companies and banks which are structured to provide principal protection for the fund’s diversified bond portfolios, regardless of daily market changes, and maintain a relatively stable return profile for the portfolio.

A quarterly factsheet is available for this fund on the SBI’s website at http://mn.gov/sbi.

Why Would I Choose This Fund?
The Stable Value Fund is a conservative investment option. This type of investment option may be attractive to you because the possibility of incurring a loss on your original investment is low. You should also understand that the returns of the fund may not change as quickly as the credited interest rates associated with a money market fund. This lag will tend to work to your advantage when overall interest rates are falling and will tend to work to your disadvantage when overall rates are rising.

Who Manages The Fund?
The fund is managed by Galliard Capital Management, an independently operated subsidiary of Wells Fargo Bank.

How Is The Value Of This Fund Determined?
You own shares in the fund, much like you would in a mutual fund. The share value is determined on a daily basis and reflects the blended crediting rate available from all investments in the fund. Due to the nature of the fund’s investments, returns change only modestly from period to period.

What Are The Risks?
While the Stable Value Fund is a conservative investment option, it is possible to lose money by investing in this fund. The investment is not guaranteed by either Galliard Capital Management or Wells Fargo Bank.

May I Transfer Money Into This Fund?
Yes. The fund will accept transfers from other investment options in your plan, provided you follow the guidelines established by your plan administrator.

May I Transfer Money Out Of This Fund?
Yes, but there are special withdrawal restrictions that apply only to the Stable Value Fund. You may not transfer balances directly from the Stable Value Fund to the Money Market Fund. You may transfer the Stable Value Fund balance to any other SIF option described in this prospectus for 90 days before moving the balance to the Money Market Fund.

Why Are These Restrictions Necessary?
When short-term interest rates rise above the rates available in the Stable Value Fund, transfers from the Stable Value Fund to the Money Market Fund adversely affect the investments in the Stable Value Fund.

What Is The Past Investment Performance Of This Fund?
The graph below shows how $1,000 invested in the fund on June 30, 2013 has grown. Cumulatively, $1,000 would have grown to $1,105.

The table below displays the fund’s returns for the last five fiscal years. The annualized (annual compounded) return during this five year period was 2.0%.

Investment Management Fees
The rate of return for this fund is calculated after investment management fees are deducted. For the upcoming fiscal year, the annual fund investment management fees are expected to be approximately $2.64 per $1,000 invested (26.4 basis points).

Money Market Fund

The return in the Money Market Fund is based on the interest income produced by the fund's investments. The objective of the fund is to provide safety of principal by investing in high-quality, short-term instruments. The value of the fund is approximately $404 million.

Unlike the funds described earlier, the Money Market Fund does not own stocks or long-term bonds. The fund is invested in short-term, high-quality money market instruments.

A quarterly factsheet is available for this fund on the SBI's website at http://mn.gov/sbi.

Why Would I Choose This Fund?
The Money Market Fund is a conservative investment option. You would choose the fund if you want to maintain the value of your original investment while earning competitive short-term interest rates.

The returns from the fund will vary much less than investments that include stocks or bonds and should closely follow the rise and fall in short-term interest rates.

Who Manages The Fund?
The Money Market Fund is managed by State Street Global Advisors, the organization that provides short-term investment management for a substantial portion of the Board's cash reserves.

How Is This Fund Structured?
The fund is an actively managed cash portfolio structured as a Short-Term Investment Fund (STIF). The fund is regulated by the Federal Reserve, the Commodity Futures Trading Commission (CFTC), and the National Futures Association (NFA). The fund is not registered with the Securities and Exchange Commission (SEC) and is not subject to the various rules and limitations that apply to money market funds regulated by the SEC.

How Is The Value Of This Fund Determined?
The share value for the Money Market Fund is uniformly priced at $1.00 per share. There is no assurance that the portfolio will be able to maintain a stable net asset value of $1.00 per share. Interest earnings are credited on a daily basis by purchasing additional shares on your behalf. The credited interest rate changes only modestly from day to day and reflects the yield available for all investments in the fund.

What Are The Risks?
While a money market fund's objective generally includes the preservation of capital, it is possible to lose money by investing in the fund.

What Is The Past Investment Performance Of This Fund?
The graph below shows how $1,000 invested in the fund on June 30, 2013 has grown. Cumulatively, $1,000 would have grown to $1,029.

The table below displays the fund's actual returns for the last five years. The annualized (annual compounded) return during this five year period was 0.6%.

Investment Management Fees
There are no additional investment management fees for an investment in the Money Market Fund.

Procedures – Supplemental Investment Fund

The various participants investing in the Supplemental Investment Fund (SIF) have different procedures that need to be followed. Listed below are directions for each participant group.

- Participants in the following plans should contact the Minnesota State Retirement System (MSRS) for their individual plan procedures:
  - Unclassified Employees Retirement Plan
  - Health Care Savings Plan
  - Deferred Compensation 457(b) Plan
  - Hennepin County Supplemental Retirement Plan

- Participants in the Public Employees Defined Contribution Plan should contact the Public Employees Retirement Association (PERA) for their plan procedures.

- Participants in the Statewide Volunteer Firefighter Retirement Plan (SVFRP) should refer to the prospectus for the SVFRP or contact PERA for their procedures.

- Participants who are not referenced on this page AND who are not Local Volunteer Fire Relief Associations should contact the State Board of Investment for procedures to invest in the SIF.

- Procedures for Local Volunteer Fire Relief Associations not invested in the SVFRP can be found on the following pages.
Procedures – Supplemental Investment Fund

Local Volunteer Fire Relief Association Procedures

Local fire reliefs that are not invested in the Statewide Volunteer Firefighter Retirement Plan will use the following procedures for the Supplemental Investment Fund.

All funds in the Supplemental Investment Fund (Fund), except the Stable Value Fund*, are available to local relief associations for their pension assets. Local plans have complete discretion in determining the amount invested in any eligible account(s). (See Minnesota Statutes, Section 356A.06, subdivision 6 and 7.)

How To Open A Plan Account With The SBI
When purchasing shares in the Fund for the first time, a local plan must complete two forms and return them to the SBI:

- The Relief Association Contact Form provides the SBI with the permanent address of the Plan and the name, telephone number and e-mail address of the contact person for the Plan. Monthly reports, statement notifications, and other correspondence from the SBI will be mailed and/or e-mailed to the contact person at the e-mail address provided. SBI will e-mail credentials and instructions about activating and using the access and transaction website within five business days of receiving the Contact Form.

- The Relief Association Wire Instructions Form provides the SBI with the name of the financial institution and wire instructions that will be used for all withdrawals. All withdrawals from the Fund by your relief association will be sent to the named financial institution via the wire instructions provided. The wire instruction form must be notarized before returning to SBI.

Contribution, Withdrawal And Transfer Procedures
A local plan may contribute, withdraw or transfer shares in the Fund on any business day of the month using one of two methods:

- Instruct the SBI to make the transaction by completing the Relief Association Transaction Form. This form tells the SBI what transaction to perform, the Fund(s) involved, the dollar amount of the transaction and whether a check or wire transfer will be used. The Plan contact person must sign the form and send it to SBI before 2:00 PM CST the business day prior to having the funds wired (no same day trades are allowed).

- You may choose to enter your trades online. If you wish to use this method, you must have completed and sent to the SBI the Relief Association Contact Form and the Relief Association Wire Instructions Form. Once the forms are received by the SBI and approved, the SBI will instruct you on access to the system. This could take up to five business days to process.

Contributions
Contributions may be made by wire transfer or by check. The SBI prefers contributions be made via wire transfer.

- If you instruct the SBI to process a contribution that was wired to the SBI’s custodian bank, you must notify SBI on the Relief Association Transaction Form of the exact date the wire contribution will be sent from the Plan’s financial institution to the SBI’s custodian bank (State Street Bank) using the wire instructions on the next page.

- If you instruct the SBI to process an online contribution using the access and transaction website, you must make the contribution via wire transfer using the wire instructions on the next page.

*The Stable Value Fund cannot accept contributions from relief associations due to insurance company regulations.
Procedures – Supplemental Investment Fund

Local Volunteer Fire Relief Association Procedures

Wire Instructions For Wiring Contributions To State Street Bank

STATE STREET/BOSTON/PUBLIC FUNDS
FOR THE STATE OF MINNESOTA CREDIT
GP31
CREDIT DDA#59845743
ATTN: Matthew Terlaje
ABA#0110 000 28

- If you send a contribution by check for the SBI to process, make the check payable to the Minnesota State Board of Investment, and submit the Relief Association Transaction Form. Contributions by check will take a minimum of five days to process.

Withdrawals

The SBI will return withdrawn amounts to relief associations only by means of a wire transfer.

Withdrawals will be sent to the financial institution via wire instructions as shown on your Relief Association Wire Instructions Form on file with the SBI.

Your investment in the Funds should be viewed as a long-term investment. Investments carry a risk of loss, and the entity is responsible for determining its risk tolerance and investing accordingly. Funds needed for operations or short-term obligations should be kept at your local financial institution in an appropriate account; your Plan account with the SBI is not intended for maintaining operating or short-term funds.

Administrative Fees

Administrative fees are deducted directly from the Plans funds quarterly in the following order of priority:

First: Money Market Fund
Second: Bond Fund
Third: U.S. Stock Index Fund
Fourth: U.S. Stock Actively Managed Fund
Fifth: Broad International Stock Fund
Sixth: Balanced Fund

Investment Management Fees

There are no “front-end” or “back-end” loads or other administrative fees charged on contributions, withdrawals or transfers in the Fund. All transactions are made using the daily share value established for each Fund.

Investment Management Fees are deducted from the investment earnings in each Fund before the daily share value for the Fund is computed. These deductions will vary from Fund to Fund and from year to year depending on the actual investment management costs incurred.

Please refer to pages 6-12 of this prospectus for investment management fee information for each of the Accounts.

Reporting

Monthly reports, statement notifications, and other correspondence from the SBI will be mailed and/or e-mailed to the contact person at the e-mail address provided by the Plan on the Relief Association Contact Form on file with the SBI. Monthly reports display current balances, performance and any transactions that may have occurred during the month.

Online access to your Plan’s account status is available and includes downloadable current balances, transactions and past statements.

To Change Contact Person Or Financial Institution Information

Allow five business days for processing a change to a contact person or financial institution information on file with the SBI. A local Plan must submit a newly completed Relief Association Contact Form to update a contact on file with SBI, or Wire Instructions Form to change banking information.

Supplemental Investment Fund

State Board of Investment

Members
The State Board of Investment (SBI), in conjunction with SBI staff and the Investment Advisory Council (IAC), establishes investment policies for all funds under its control. These investment policies are tailored to the particular needs of each fund and specify investment objectives, risk tolerance, asset allocation, investment management structure and specific performance standards. The Board’s membership is specified in the Minnesota Constitution and is composed of the officers listed below. The Board’s duties, powers, and investment authority are contained in Minnesota Statutes, Chapter 11A.

Governor Mark Dayton
State Auditor Rebecca Otto
Secretary of State Steve Simon
Attorney General Lori Swanson

Investment Advisory Council
The Legislature has established an Investment Advisory Council to advise the Board and its staff on investment related matters. The Board appoints ten members experienced in finance and investments. The Commissioner of Minnesota Management and Budget and the Executive Directors of the three statewide retirement systems are permanent members of the IAC. Two active employee representatives and one retiree representative are appointed to the IAC by the Governor.
