

Integrated search in Tridion

<http://mn.gov/dhs/search/>

Integrate the search of existing documents on eDocs (<https://edocs.dhs.state.mn.us/>) with the website search results. Documents would stay on the eDocs server (HP Process Automation).

- Types of documents are AcroForm PDF, XFA PDF, HTML and web forms generated from HP Process Automation.
- Use metadata from eDocs itself (not metadata in the native document) to return search results.
- Translations will be returned as a separate results with their language displayed (FUTURE: New section for documents that have translations. When showing search results, all languages will be included in one returned result.)
- Forms will have a form icon – all other documents will have a PDF icon
- All returned eDocs results will open in a new window
