Automotive Service Technician

Career Objective

Experienced, dependable mechanic seeking a challenging position in the automotive repair industry drawing on extensive experience in the United States Army. Skilled repairman, with extensive knowledge of the following: fuel systems, suspensions, cooling systems, steering controls, transmissions, exhaust systems, hydraulic systems, electrical systems, and brake systems. Work in a team-based environment where continuous improvement, dedication, and commitment to quality are encouraged.

Summary of Qualifications

My motto is: I won't quit until it's fixed!

- More than 10 years of experience within the automotive repair industry working with a variety of vehicle types.
 - Proven experience working successfully in demanding mechanical repair environments.
 - Highly experienced in fuel, cooling, exhaust, hydraulic, electrical, and brake systems.
 - Proficient use of Microsoft Word, Microsoft Excel and CC3 body shop management software.
-

Industry-Related Experience

Automotive Service Technician, ABC Repair & Auto Shop, City, State **2012-2014**

- Performed routine maintenance such as changing oil, checking batteries, and lubricating equipment and machinery.
- Examined and adjusted protective guards, loose bolts, and specified safety devices.
- Inspected brake systems, steering mechanisms, wheel bearings, and other important parts to ensure they were in proper operation condition.
- Adjusted and relined brakes, aligned wheels, tightened bolts and screws, and reassembled equipment.
- Checked other technicians' repairs to make sure they were complete and finished on schedule.
- Assisted in the ordering of parts and use of CC3 body shop management software.
- Directed repair shop and garage operations on part-time basis when owner was unavailable.

Industry-Related Experience

Light Wheeled Vehicle Mechanic, United States Army, 2002–2012

- Supervised and performed maintenance and recovery operations on light-wheeled vehicles, including jeeps, cars, and trucks.
- Maintained power-assisted brake systems, wheeled vehicle suspension systems, wheel/hub assemblies, and wheeled vehicle hydraulic steering systems.
- Operated electrical diagnostics equipment to troubleshoot problems in vehicle engines, electrical systems, steering, brakes, and suspensions.
- Tuned and repaired engines.
- Replaced and repaired damaged automotive body parts.
- Established and followed schedules for maintaining a fleet of vehicles.
- Trained new soldiers on light-wheel mechanical skills and supervised their work.
