

HISTORICALLY UNDERCOUNTED AREAS

Minnesota Senate District 12

Which areas will be hard to count in the 2020 Census?

Cities and Townships

Projected Non-Self Response

 Easiest (1%-22% will not self-respond)

 Medium (23%-29% will not self-respond)

 Hardest (30% or more will not self-respond)

 Areas are not hard to count, but predicted self-response rate is not available

Data Source: U.S. Census Bureau's 2018 Response Outreach Area Mapper (ROAM). These data were developed by the Census Bureau to classify areas according to their propensity to self-respond to censuses and surveys. Percentages correspond to the area's predicted mail non-response rate. The higher the percentage, the harder-to-count that area is.

For more information on the data see <https://www.census.gov/roam>
