

FAQ : Using the Evaluation and Outcome Guide

What is this document? Where is it coming from?

This document is guidance for the ACHF application, to be used to guide program, work plan, and budget development. ACHF grantees are required per MN Statute to plan, collect data, and report on measurable outcomes.

What is being asked of my organization?

When grantees are submitting work plans and budgets, the Office of Grants Management will be looking for assessment measures and outputs that are relevant to outcomes developed in the context of ACHF goals.

So what? How will this benefit my organization?

Not only will it help get work plans and budgets approved, an evaluation process in project development and reporting will help organizations improve their own work in the community.

Now What? How do I use this document to get started?

Consider the guidance in this document as you are preparing your work plan and go through the included outcome development exercise.
