Minnesota Rules: Amendments and Additions

NOTICE: How to Follow State Agency Rulemaking in the State Register

The State Register is the official source, and only complete listing, for all state agency rulemaking in its various stages. State agencies are required to publish notice of their rulemaking action in the State Register. Published every Monday, the State Register makes it easy to follow and participate in the important rulemaking process. Approximately 80 state agencies have the authority to issue rules. Each agency is assigned specific Minnesota Rule chapter numbers. Every odd-numbered year the Minnesota Rules are published. Supplements are published to update this set of rules. Generally speaking, proposed and adopted exempt rules do not appear in this set because of their short-term nature, but are published in the State Register.

An agency must first solicit Comments on Planned Rules or Comments on Planned Rule Amendments from the public on the subject matter of a possible rulemaking proposal under active consideration within the agency (Minnesota Statutes §§ 14.101). It does this by publishing a notice in the State Register at least 60 days before publication of a notice to adopt or a notice of hearing, or within 60 days of the effective date of any new statutory grant of required rulemaking.

When rules are first drafted, state agencies publish them as Proposed Rules, along with a notice of hearing, or a notice of intent to adopt rules without a hearing in the case of noncontroversial rules. This notice asks for comment on the rules as proposed. Proposed emergency rules, and withdrawn proposed rules, are also published in the State Register. After proposed rules have gone through the comment period, and have been rewritten into their final form, they again appear in the State Register as Adopted Rules. These final adopted rules are not printed in their entirety, but only the changes made since their publication as Proposed Rules. To see the full rule, as adopted and in effect, a person simply needs two issues of the State Register, the issue the rule appeared in as proposed, and later as adopted.

The State Register features partial and cumulative listings of rules in this section on the following schedule: issues #1-26 inclusive (issue #26 cumulative for issues #1-26); issues #27-52 inclusive (issue #52, cumulative for issues #27-52 or #53 in some years). A subject matter index is updated weekly and is available upon request from the editor. For copies or subscriptions to the State Register, contact the editor at 651-201-3204 or email at sean.plemmons@state.mn.us

Department of Labor and Industry (DLI)

Notice of Determination of Minimum Truck Rental Rates

The Commissioner of DLI has determined the minimum truck rental rates for state-funded highway projects. The truck rate is determined for each equipment type by adding the hourly average of the costs of operating the vehicle as submitted by survey respondents to the certified prevailing wage rate for the driver.

This year there was insufficient cost data submitted to DLI to determine a new hourly average cost of operating a vehicle. Cost data used in DLI's analysis must be representative of five trucking firms of various sizes and five independent truck owner operators for each type of truck. Therefore, last year's average operational cost has been carried forward and combined with this year's certified prevailing-wage rate for a driver to establish the minimum truck rental rate.

Wage rate determinations are available online at:

<https://dli.mn.gov/business/employment-practices/prevaling-wage-minimum-truck-rental-rates>

Notice of Request for Proposals for Conservation Applied Research and Development Working Group Facilitation for Energy Conservation and Optimization Income-Eligible Utility Programs

COMM-CARD01-20241216

The Minnesota Department of Commerce (“Commerce”) seeks proposals from qualified organizations or individuals to support facilitating engagement among community-based stakeholders to improve utilities’ energy efficiency programs and ensure that all customers—especially those considered under-resourced, residing in multi-family properties, and renters—are benefiting from deep energy savings.

Minnesota’s Energy Conservation and Optimization (ECO) Program is a ratepayer funded utility-administered program with regulatory oversight provided by Commerce. Utility ECO portfolios promote energy-efficient technologies and practices by providing rebates, marketing, and technical assistance to utility customers. ECO programs help Minnesota households and businesses lower their energy costs by using electricity and natural gas more efficiently.

Commerce is in the process of establishing a standing work group made up of utilities and interested parties to facilitate ongoing development and feedback concerning ECO income-eligible programing. This work group will build on similar activities during 2023, where utilities and interested parties discussed elements in the ECO Act and how these might be incorporated into the utility ECO Triennial Plans.

A Request for Proposal (“RFP”) and required forms are available for download on Commerce’s RFP website at <https://mn.gov/commerce/business/rfp.jsp>. Proposals must be submitted through Commerce’s grant submission portal. A link to the portal and instructions for submitting proposals can be found in the RFP.

Proposals are due by **Friday, January 24, 2025, at 5:00PM CDT. Late proposals will not be considered.**

This request does not obligate the State to complete the work contemplated in this notice. The State reserves the right to cancel this solicitation. All expenses incurred in responding to this notice are solely the responsibility of the Responder.

1. analysis of the heating and cooling demand of the building or buildings that consume energy from the geothermal energy system;
2. evaluation of equipment that could be combined with a geothermal energy system to meet the building's heating and cooling requirements;
3. analysis of the geologic conditions of the earth in which a geothermal energy system operates, including the drilling of one or more test wells to characterize geologic materials and to measure properties of the earth and aquifers that impact the feasibility of installing and operating a geothermal energy system; and preparation of a financial analysis of the project.

Beginning on **Monday, December 16, 2024, until Monday, March 10, 2025**, a Request for Proposals (RFP) will be available for download on the Department's RFP website at ***Request for Proposals (RFP) / Minnesota Department of Commerce - Business (mn.gov)***.
