**Note to Reviewers:**

Regarding Secondary Mathematics and Secondary Science programs, the preparation for reading in the content areas is now in REDP 607-608, Literacy Development and in REDP 643, Reading in the Content Area. This residency program is designed with an initial course in literacy development that is completed by residents in all licensure areas (Elementary K-6, Secondary 5-12 Math or Science, and K-12 SPED-ABS). This course provides the foundation for language/literacy development for all learners. This foundation is then followed by a second course within the specific licensure area to fulfill subject-specific strategies for literacy development. Thus, all teacher candidates in this residency program will take REDP 607-608. Elementary candidates will then take REDP 611, Secondary will take REDP 643, and SPED-ABS will take REDP 627-628.
