

## **Minnesota Board of Dentistry**

335 Randolph Ave, #250 St. Paul, MN 55102 Office: (612) 617-2250

MN Relay Service: (800) 627-3529 www.mn.gov/boards/dentistry

# Conscious/Moderate Sedation (CS) Inspection Checklist

Print out and review this packet. Contact the Board with any questions.

, ,
Complete this packet by reporting all items to the best of your knowledge, initialing where indicated, and signing all attestations.
 Document the name and expiration date of all available medications and provide rationale for any deficiencies.
 Attest that you have a process to regularly maintain medications.
 nclude one redacted patient record in which you administered sedation to a patient The record must be from a treatment provided in the last 12 months.
 Arrange your inspection by contacting Brian J. Cochran at <a href="mailto:brian.j.cochran@state.mn.us">brian.j.cochran@state.mn.us</a>

#### Reminders

- Inspections typically take place during business hours.
- The dentist with a CS certificate and one other staff member must be present for the duration of the on-site inspection.
- Inspectors may charge up to \$250 per inspection in addition to mileage at a rate of \$0.70 per mile. CS certificate holders pay the inspectors directly; the Board does not charge fees for on-site inspections. Request an invoice from the inspector if needed.
- The inspector will review 1) patient selection, 2) a patient record, 3) medications and equipment available on-site, and 4) management of medical emergencies.

## **Minnesota Board of Dentistry**

2829 University Avenue SE, Suite 450 Minneapolis, MN 55414 Office: (612) 617-2250

MN Relay Service: (800) 627-3529 www.mn.gov/boards/dentistry

# **CS Inspection and Self-evaluation Form**

**Inspection**: All CS certificate holders must comply with Board regulations applicable to credentialing and on-site inspections.

**Timeframe**: On-site inspections must be completed within 12 months of receiving CS certification. Thereafter, inspections are required once every five years.

**CS dentists with multiple offices**: All offices where sedation is performed must comply with the Board's minimum standards. The CS certificate holder is responsible for ensuring that all practice locations have the required equipment and emergency medications. They must also ensure that staff at those practice locations are trained to manage medical emergencies.

**Suspensions**: The Board suspends CS certificates for noncompliance with the on-site inspection or if the certificate holder fails the on-site inspection. During a suspension, certificate holders may not administer sedation to patients. The CS certificate can be regained only by successfully completing an on-site inspection.

**Completeness and accuracy**: Failure to complete any portion of the inspection and renewal requirements can result in a complaint and or disciplinary action against the license.

#### Additional Information:

See MN Rule 3100.3600 for general information related to providing sedation services.

MN Rule 3100.0100 Subp. 14a defines conscious sedation (referred to as moderate sedation).

*Recommendation*: Inspectors make recommendations based on the dentist's knowledge and skills. The Board makes the final determination for all on-site inspections.

Adverse reaction: MN Rule 3100.3600 Subp. 1a defines an adverse reaction as "any incident that ...results in 1) a serious or unusual outcome that produces a temporary or permanent physiological injury, harm, or other detrimental effect to one of the patient's body systems; or 2) minimal sedation unintentionally becoming moderate sedation, deep sedation, or general anesthesia when the licensee does not have a certificate for administering general anesthesia or moderate sedation".

### **B.** Inspection Integrity Attestation:

I attest that I am the sedation certificate holder referred to in this inspection. I understand that including false information or documentation may result in the penalty of perjury. I understand that falsifying information to maintain sedation certification is a gross misdemeanor and violates the Dental Practice Act. I certify that the entirety of this application and any attached materials are true and correct to the best of my knowledge. I authorize all persons and organizations to release any requested information, files, or records in connection with this inspection to the Minnesota Board of Dentistry.

Licensee signature Date

### 10. INSPECTION SUMMARY AND EVALUATION

The inspector must return all completed forms to the Board of Dentistry within two weeks of completing the on-site inspection.

Comments:

Notes regarding deficiencies:	
Recommendations:	

**EMERGENCY MANAGEMENT:** Thorough oral discussion with inspector and provider demonstrates satisfactory knowledge in managing the following clinical emergencies.

Laryngospasm:

Vomiting/Aspiration:

- Problem recognition	<ul> <li>Problem recognition and proper patient positioning</li> </ul>
- Stop procedure and pack off bleeding	- Remove of foreign bodies and adequate suction
- Evaluation of head position and upper suction	- Secure and evaluate adequacy of airway
- Positive pressure Oxygen with a full-face mask	- Positive pressure Oxygen
- Use and appropriate dosage of Anectine	- Tracheal intubation when necessary
- Airway maintenance	Recognition of complication of associated bronchospasm
All way maintenance	- Active EMS
Satisfactory Unsatisfactory	- Bilateral breath sounds
Bronchospasm:	SatisfactoryUnsatisfactory
- Problem recognition	Symponol
- Bronchial Dilators	Syncope:
- Positive Pressure Oxygen and airway maintenance	- Problem recognition
	- Patient position
SatisfactoryUnsatisfactory	- Oxygen
	- Drug therapy
Convulsion:	SatisfactoryUnsatisfactory
- Problem recognition and monitoring	, , , ,
- Patient position and supportive measures	Hypoglycemia:
- Anti-convulsant drug therapy	
	- Problem recognition
SatisfactoryUnsatisfactory	- Office testing available
, , ,	<ul> <li>Oral and/or IV drug therapy</li> </ul>
Respiratory Depression & Arrest	SatisfactoryUnsatisfactory
- Problem recognition and monitoring	SutisfactoryOnsutisfactory
- Proper patient position	
- Oxygen with respiratory support	Hypotension/Hypotension:
- Narcotic/Benzodiazepine antagonist when appropriate	<ul> <li>Problem recognition</li> </ul>
	<ul> <li>Pre-operative pulse and blood pressure</li> </ul>
SatisfactoryUnsatisfactory	- Patient position
outisfactoryonsatisfactory	- Oxygen
	<ul> <li>Continuous monitoring and recording</li> </ul>
Allergic Reactions:	- Drug therapy
