NEXSYSADC™ AUTOMATED DISPENSING TECHNOLOGY
NexsysADC™ is the simplest, most secure technology to fully manage the onsite storage and distribution of medications (especially controls), STAT/first doses, and supplies. With NexsysADC, the level of security you need and expect is only a fraction of the price of alternative automated dispensing cabinets. The pharmacy benefits from a faster ROI without compromising safety, security, or operational flexibility. And the facility benefits from having the new Stat or 1st dose on-hand at the exact time it’s needed.

The NexsysADC Difference

- **Medication Security**: Innovative solution to manage the restocking and access of controls and high-value medications.
- **Fast ROI Without Compromise**: Your Capsa Representative will run a detailed analysis to show how pharmacies can deploy NexsysADC in more facilities for broader control and higher customer satisfaction, compared to alternative ADCs.
- **Efficient Stat Dose/E-kit Delivery**: Eliminates manual methods like the “tackle box” commonly used in extended care settings. Significantly lowers costs associated with stat deliveries, and improves audit accuracy (no more missing paperwork).
- **Configurable For Each Facility**: Available in a standard cabinet and new countertop unit. Each NexsysADC is custom-built for your specific needs and patient population.
- **Streamlined Replenishment & Inventory**: NexsysADC identifies what medications need to be restocked. The flexible replenishment process saves time, reduces inventory turns, and prevents diversion.

NexsysADC™ 4T is countertop-sized with the full security, tracking, and inventory management of Capsa’s main cabinet model. NexsysADC 4T fits any environment where tight medication control is required, but small space, budget or formulary also are a consideration.

When space and formulary size matter, choose the new NexsysADC 4T countertop model. The medication security you need in the size you want.
NexsysADC™
Guided Access With ‘CAM’ Technology

NexsysADC relies on guided access with multiple levels of illuminated and on-screen prompts. This ensures the nursing staff IDs the exact location of the medication, and picks the right medication for the right patient. Guided access technology also ensures that pharmacy restocking and inventory control are accurately and efficiently performed.

The NexsysADC Controlled Access Module (CAM)

Controlled Access Modules, or CAMs, are at the heart of NexsysADC operation for controlled and high-value medications.

For CAM medications, the CAM automatically opens, and the correct med cell is ID’d with a pick-to-light prompt and opened lid. NexsysADC includes built-in alerts against tampering.

Scalable cabinet design permits unique set-up of NexsysADC with a mix of CAMs, open-cell medication bins, and supply drawers.

Transferable CAM inserts streamline inventory counts, restocking, and medication distribution workflow to and from the pharmacy.

Each CAM is configurable for up to 25 SKUs in individual locking cells (1x1, 1x2, or 2x2).

General Specifications

Main Cabinet Model:
- Cabinet size 43”(h) 24”(d) 25”(w)
- 22” touchscreen monitor (extends to 67” high max)
- Capacity up to 400 SKUs (highly configurable)

4T Countertop Model:
- Cabinet size 17.7”(h) 20.4”(d) 23.5”(w)
- 14” touchscreen monitor (total unit height 26”)
- Capacity up to 150 SKUs (highly configurable)

2D barcode scanner
Biometric finger scanner
Windows 10 operating system
Ethernet, WiFi networking
Built-in uninterrupted power supply

3 popular NexsysADC™ 4T configurations
Fill the four tiers with 1, 2 or 4 CAMs, plus dividable open cell medication bins for routine meds, and 3”, 6”, or 9” drawers for supplies.
Uncompromising Data Security

Our NexsysADC technology meets the highest standards for cyber security and HIPAA compliance.

Implementing NexsysADC

Capsa Healthcare makes the planning, installation and training of NexsysADC simple and straightforward. Our Support team focuses on the unique needs of each user, from management to end user. And once installed, Capsa provides a dedicated NexsysADC Support Hotline for pharmacies and facilities.

- High-detail project management
- On-site pharmacy training
- On-site facility training
- 24/7 dedicated support

Cloud-Based For Continuity

NexsysADC is enabled by a robust cloud solution for superior information management and maximum uptime. From anywhere, at anytime, the NexsysADC web portal provides access to all your system management functions. All essential patient medication transactions and administrative functions are captured, such as full activity and user reporting, charge capture, and restock management.

NexsysADC interfaces with your pharmacy management system with our robust 2-way Pulse Interface Engine (HL7). Every step of the process is connected:

- **Patient Sync** for true patient validation reduces the chance of medication errors.
- **Patient Order Sync** only allows dispensed medications against approved orders.
- **Billing Syncs** ends charges electronically to the pharmacy system, eliminating manual billing and avoiding revenue loss.
