Non-Resident Pharmacy List of Current Technicians

Instruction: Only complete if the applicant is a non-resident pharmacy engaged in central services or limited services whereby the technician is assisting with any portion of the dispensing steps for a Minnesota located pharmacy or a Minnesota resident. If the technician is not registered in Minnesota, insert "N/A" in the registration column.

Definition of Terms:

A **Central Service Pharmacy** is a pharmacy that provides dispensing functions, drug utilization review (DUR), packaging, labeling, or delivery of a filled prescription on behalf of another pharmacy that is located in Minnesota.

A **Limited Service Pharmacy** is a pharmacy operating under a restricted or limited license that allows it to perform only a narrow set of pharmacy-related functions that constitutes the practice of pharmacy. Pharmacies in this category typically do not meet the criteria for other license types (such as community/outpatient, hospital, long-term care, nuclear, central service, nonsterile or sterile compounding, or veterinary). In many cases, they must obtain a variance from the Board before being granted this license classification.

MN Pharmacy License Number: _____
