

Request for Access to RxManagement

RxManagement is a feature that can be made available to pharmacist account holders. It can be utilized to resolve open prescription errors in Clearinghouse as well revise or void existing records in the PMP AWA^Rx^E database in accordance with the pharmacy's dispensation records. By requesting access to RxManagement, pharmacists are responsible for correcting/maintaining prescriptions attributed to their employer's DEA in the PMP database. Once access is granted, their employer's DEA number will be associated with their current PMP account. Pharmacists must notify PMP staff to remove their employer DEA number once they are no longer responsible for correcting/maintaining prescription information for said employer in the PMP.

PLEASE NOTE:

- Request must be completed and submitted by Pharmacist-In-Charge.
- PIC is responsible for notifying PMP staff of any changes in PIC role or other staff employment for purposes of rescinding Rx Management.
- RxManagement access is not granted to delegates or third party uploader/vendors.
