

# **Minnesota Rules Chapter 2100**

## **OPERATION OF BARBER SCHOOLS AND BARBER SHOPS**

### **2100.7600 BARBER CHAIRS**

Barber chairs must be spaced not less than five feet apart center to center.

### **2100.7700 OTHER USE OF PREMISES**

**Prohibited uses.** No person shall use any room or part of a place which is also used for residential purposes, or any business purpose other than barbering, unless the areas are separated by substantial partition, extending from the floor to the ceiling. Further, any door or other entrance leading into the residential or other business portion of the building must be used only for the passage of barbers or other employees.

**Exception: Barber Shop with Beauty Shop.** A cosmetology salon and a barbershop may be operated in conjunction, without being separated by a partition of ceiling height.

### **2100.7900 MEDICAL TREATMENT**

No barber or student barber shall undertake to treat any disease of the skin, nor apply any medicine or treatment which administration is not distinctly a part of barbering. No barber shall apply drops to the eyes.

### **2100.8000 CLEANLINESS OF PERSONNEL**

The operator shall wear clean uniforms or clean clothes at all times. The operator shall cleanse the hands thoroughly with soap and clean water before attending each patron.

### **2100.8200 TOWELS**

A separate, clean towel or neck band shall be used for each patron. All barber shops and barber schools shall have sufficient closed sanitary towel cabinets for storage of clean towels and closed hampers for soiled towels. All soiled towels after use on each customer shall be placed in a closed hamper and shall not be left on the lavatory or work stand. The headrest shall be provided with a clean towel or clean paper for each patron served.

### **2100.8400 WALLS, CEILING, FLOOR, AND FURNITURE**

The walls, ceilings, floor, and furniture in every barber shop or barber school shall be kept clean and in good repair. Floors of barber shops or barber schools shall be covered with hardwood, linoleum, composition tile, or some other washable and nonporous material. These requirements shall include the proper cleaning of floors, shelves, cabinets, chairs, trays, and other barber shop or barber school equipment.

### **2100.8500 LIGHTING AND VENTILATION**

Barber shops and barber schools shall have adequate lighting and be properly ventilated.

### **2100.8700 POSTING RULES**

The owner or manager of any barber shop or barber school shall post a copy of these rules in a conspicuous place where they can be read by the patrons of the establishment.

### **2100.8600 HEALTH OF PERSONNEL**

No owner or manager shall permit any person suffering from a communicable disease to act as a barber.

### **2100.8800 RESPONSIBILITY FOR VIOLATIONS**

For the purpose of this chapter, barbers, student barbers, or the proprietor or manager shall be responsible for all violations of the sanitary provisions of this chapter.

### **2100.8100 SANITIZATION**

**Instruments.** Razors, shears, combs, clipper blades, hairbrush, and all other instruments or appliances that come in contact with the head, neck, or face must be thoroughly cleaned and sanitized by submersion for a minimum of two minutes after use on each patron. As an alternative to submersion, clipper blades and shears may be treated by spraying them with a commercial spray containing active ingredients not less than 0.25 percent o-phenyl phenol, 11.00 percent isopropyl alcohol, and 88.75 percent inert ingredients. As an extra measure, instruments may be wiped or sprayed with a solution of 10:1 household bleach before being used. When not in use, they must be kept in a clean closed compartment provided for and used only for storage of instruments. Styptic pencil and lump alum are positively prohibited. Contact with raw blood or body fluids should be avoided. If accidentally exposed, immediate washing with soap and running water is required.

**Sanitizer.** All barber shops and barber schools shall have in use at all times at each chair a wet or dip sanitizer which is adequate in size to accommodate all instruments to be used on each patron. The wet sanitizer shall contain a suitable chemical bactericide solution which shall be bacteriologically effective, such as 0.1 percent suitable quaternary ammonium compound, or by other means having a solution equivalent to five percent phenol, or other chemical sanitizing agent having equivalent bactericidal effect. The chemical solution shall be changed daily or more often, as needed. One dip disinfectant solution container will be kept for each barber chair in operation. Instruments immersed in the dip disinfectant solution container will be carefully rinsed in warm running water before use. Failure to provide a sink or dip disinfectant solution container constitutes prima facie evidence that instruments are not properly sanitized. At least one sink or lavatory must be provided in each room, booth, stall, compartment, or the immediate area in which barbers work. If more than two barber chairs are in any room, booth, stall, or compartment, at least one sink or lavatory must be provided for each two barber chairs at which the barbers work. Each barber must have free access to the sink or lavatory without obstruction from other chairs, partitions, wall dividers, or other barriers.

**Dispensary.** A dispensary must be located in each barber shop and each barber school where hot and cold running water is not present within five feet of the working chair. A dispensary is a room, booth, or area where implements will be cleansed, disinfected, and stored. A dispensary must contain the following furnishings:

A. A container large enough to accommodate all soiled implements in which those instruments, such as combs and brushes, can be totally immersed for washing. All non-immersive or electrical implements such as clippers, clipper blades, and shears must be sprayed according to subpart 1.

B. One sink with hot and cold running water to cleanse implements mentioned in item A to be used for washing of hands before serving each patron.

C. A container with suitable chemical bactericide solution to accommodate and immerse all immersible implements after being washed for at least two minutes before being used or stored.

D. A container large enough for storage of clean disinfected implements.

E. A container filled with fresh disinfectant solution in which razors will be stored or dipped at least two minutes before being used.

**Hand washing.** Hands shall be washed with soap and running water immediately before serving each and every patron.

**Implement storage.** Implements that require washing and disinfecting by total immersion must not be stored at the workstation unless running water is present at the working chair.

**Shampoo sinks.** The shampoo area shall have one shampoo sink for each six chairs.

**Minimum implements.** Each barber shall have at least 15 combs and ten brushes
