

U.S. Bank E-Payment Service TLS 1.2

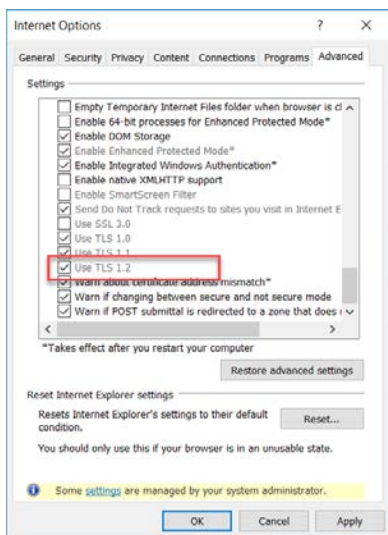

U.S. Bank E-Payment Service requires web browsers used to access the E-Payment Service Customer Payment Site and Administrative Site to support TLS 1.2. A list of browsers that support TLS 1.2 is listed below.

Web browsers supported by E-Payment Service

Browser	Versions that support TLS 1.2
Microsoft Internet Explorer	9, 10 (payers may need to update settings to support TLS 1.2) 11+
Google Chrome	Latest version
Mozilla Firefox	Latest version
Safari	7+
Mobile Android	Latest version
Mobile Chrome	Latest version
Mobile Firefox	Latest version
Mobile Safari	Latest version

Users may need to update their TLS setting in Internet Explorer

1. Open Internet Explorer 9 or 10.
2. In the upper right hand corner of the browser, click the GEAR icon 
3. Select Internet options.
3. On the Advanced tab, under Security, make sure that the following check box is selected:
✓ Use TLS 1.2

4. Click Apply, and then click OK.
