

Powering Tomorrow: Energy Project Resource Summit for Schools

Improving energy efficiency, indoor air quality, and educational outcomes in school facilities: funding and partnership opportunities

Tuesday, October 28, 2025

*Eddie Manderville Chalet at Theodore Wirth Park
1301 Theodore Wirth Pkwy, Golden Valley, MN 55422*

Why attend?

This in-person summit is the nexus between **energy** efficient educational facilities and improved learning environments. Participants will learn ways to effectively finance school and campus energy projects, reduce overall energy costs and provide an improved learning experience. Participants will learn best practices to support holistic school quality, establish helpful relationships, and gain access to the latest in energy savings performance contracting and participation in revolving loan funds.

Who should attend?

School district leaders, facility managers, K-12 public school stakeholders, fleet and transportation officials, and higher education representatives with responsibility for budget decisions on energy use, indoor air quality, facilities, transportation, and the overall comfort and safety of students and staff.

How will attendees benefit?

- Knowledge of—and access to—state and federal partnerships, funding, support and technical assistance.
- Tips for education leaders to navigate federal and state programs.
- Learn the benefits and decreased costs of energy-oriented policies and programs.
- Discuss energy efficiency and performance opportunities for achieving improved educational outcomes.
- Explore best practices and examples around data management, policy, and long-term capital planning from school districts, higher education and efficiency practitioners.
- Consider ways that public-private partnerships can maximize federal benefits of energy efficiency and indoor air quality improvements.
- Network with potential collaborators, peers, and project contacts.
