

Minnesota Prescription Drug Affordability Board

September 2025

Mission and Vision Statement

The Minnesota Prescription Drug Affordability Board is committed to advancing the health and well-being of all Minnesotans by ensuring access to affordable prescription medications.

Our Vision is for all Minnesotans to be able to afford and have access to all effective prescription drugs that they need and that the total cost of prescriptions drugs in the health care system is sustainable for Minnesota society as a whole.

Values Statement

The Minnesota Prescription Drug Affordability Board members and staff are committed to:

- Promoting affordability and access to prescription drugs for all Minnesotans.
- Soliciting and encouraging public engagement through listening sessions and direct outreach to a broad and inclusive range of patients and stakeholders
- Carefully considering patient and stakeholder feedback in all our work
- Considering the impact of prescription drug affordability and access on patient communities including communities disproportionately impacted by high prescription drug costs
- Ensuring open and transparent deliberations and letting data drive our decision making
- Always conducting our work with integrity and accountability
- Being responsible stewards of the data and information we collect and use in our work
