

# The WIRE Access Project

## Weatherization and Innovation through Roofing and Electrification

### Expanding MN WAP

Incorporating roofing and electrical upgrades, measures not previously allowed, resulting in enhanced household resilience.

---

### Prevent Deferrals

Reducing roofing and electrical deferrals so more clients experience the benefits of deep energy retrofits, especially in disadvantaged communities.

---

### Equity Focused

Increase equity in MN WAP by targeting projects in historically redlined districts and on tribal lands by utilizing the WAPMAP tool.

---

### Move Toward Decarbonized Homes

Prepare client homes for future full electrification and demonstrating a decarbonization path for the income qualified residential sector.

---

### Increase WAP Workforce

Tackling workforce development by creating job opportunities within impacted communities

---

### MN Decarbonization Goal

The WIRE Access Project will be an important factor in helping Minnesota achieve its goal of reducing greenhouse gas emissions.
