Introduction

The federal [Safe Drinking Water Act \(SDWA\) Amendments of 1996](#) authorize the U.S. Environmental Protection Agency (EPA) [Drinking Water State Revolving Fund program](#) to provide funds to states to finance drinking water projects and activities to protect public health and achieve or maintain compliance with the SDWA. The SDWA authorizes EPA to award capitalization grants to each state. States utilize these funds along with the required state match to provide loans and other assistance to communities with water pollution control projects.

[Minnesota Statutes Section 446A.081](#) authorizes the Minnesota Public Facilities Authority (MPFA) to establish the state's Drinking Water Revolving Fund (DWRf) and manage it effectively in order to provide a source of low-cost financing for water infrastructure projects across the State in perpetuity. In Minnesota, the DWRf is administered through a partnership between MPFA and the Minnesota Department of Health (MDH). MPFA's responsibilities include but are not limited to managing the DWRf and its assets, reviewing financial applications, setting loan rates, terms and conditions, and determining eligibility for principal forgiveness (PF). MDH prepares the Drinking Water Project Priority List (PPL) and reviews drinking water infrastructure projects to ensure they meet technical and environmental requirements.

As part of its capitalization grant application requirements, MPFA annually prepares the Drinking Water State Revolving Fund (DWSRF) Intended Use Plan (IUP) describing the intended uses of available funds.

To be eligible for placement on the DWSRF IUP:

- The project must be listed on the Drinking Water PPL as outlined in [Minnesota Rules, Part 4720.9015](#). PPL rankings give funding priority to projects that: 1) protect public health, 2) provide adequate water supply, and 3) assist water systems most in financial need.
- The applicant must submit a request to MPFA for placement on the DWSRF IUP that includes a brief project description, estimated project cost, requested funding amount, and a project schedule indicating the project will proceed in the state fiscal year (SFY) for which the DWSRF IUP is being prepared.

This IUP lists projects from the 2027 PPL (see Exhibits 6 and 7) and supporting activities MPFA intends to fund in State Fiscal Year (SFY) 2027 (July 1, 2026 through June 30, 2027), plus those projects that have requested placement on the DWSRF IUP but rank below the fundable range. The projects are grouped in PPL priority order by these parts:

Table 1: IUP Breakdown by Part

Part A	Fundable range	Carryover projects: Projects from Part A on the prior year's IUP and those certified by MDH by June 30, 2026 that have not yet been awarded funding.
Part B	Fundable range	Eligible projects not certified by June 30, 2026, and ranked at or above the funding cutoff.
Part C-1	Non-fundable range	Projects ranked below the funding cutoff.
Part C-2	Non-fundable range	Projects referred to USDA - Rural Development

MPFA will use this IUP to apply for EPA base capitalization grants and Infrastructure Investment and Jobs Act (IIJA) General Supplemental, Lead Service Line Replacement (LSLR), and Emerging Contaminants (EC)

capitalization grants. The FFY 2026 Clean Water State Revolving Fund (CWSRF) EC capitalization grant funds will be transferred from the CWSRF to the DWSRF to fund Drinking Water EC projects.

Following are the DWSRF capitalization grants MPFA will apply for after posting the final DWSRF IUP:

Table 2: Capitalization Grants MPFA will apply for in SFY27

FFY 2026	Base	\$5,812,000
FFY 2026	IIJA General Supplemental Year 5	\$37,648,000
FFY 2026	IIJA Emerging Contaminants Year 5	\$11,557,000
FFY 2026	IIJA Emerging Contaminants Year 5 (transferred from CW)	\$3,909,000
FFY 2026	IIJA Lead Service Line Replacement Year 5	\$57,770,000

- MPFA applies for federal funds upon notification by EPA of available funding levels, and after IUP adoption.
- State match is appropriated by the state legislature. Following 40 CFR section 36.3135(b), match is deposited to the SRF on or before the time that EPA funds are drawn down.
- A state may elect to transfer up to 33 percent of a capitalization grant between CW and DW or an equivalent amount.

MPFA will use a combination of these federal funds, other DWSRF fund assets, and state appropriations to implement this IUP. This IUP includes sufficient projects to utilize the base and IIJA grant funds, and state match appropriations.

This IUP establishes the fundable range for DWSRF projects, sets the base loan discount for regular DWSRF loans, and sets percentages to be reserved from federal grants for eligible set-aside activities.

2027 IUP Project Summary

Table 3: IUP Summary

SRF program	Part A Fundable Range- Carryover Projects	Part B Fundable Range-New projects	Part C-1 Projects ranked below the cutoff	Part C-2 Projects referred to USDA - Rural Development	Fundable Range Cutoff Points
DWSRF	48 projects \$175,790,260	70 projects \$347,518,327	126 projects \$384,170,741	8 projects	11 points
LSLR	131 projects \$95,132,920	213 projects \$65,192,000	N/A	N/A	N/A

Exhibit 1 includes the 2027 IUP projects list for DWSRF regular and EC projects.

Exhibit 2 includes the 2027 IUP projects list for DWSRF-LSLR projects.

There is sufficient funding for Part A and B requests above the funding cutoff except for LSLR projects (Exhibit 2) where the demand for funds exceeds available resources. To most effectively continue LSLR project funding, for the 2027 IUP, a cap will be placed on the average cost per service line replacement of \$15,000 and the maximum

amount of funding available to systems for projects will be based on current service line inventory and the following goals:

- Ensure systems that have received a lead Action Level Exceedance (ALE) as of September 1, 2026, will be provided funding up to the amount of their request to complete their project. The project method listed on the IUP for these projects is “ALE”.
- Ensure systems with 10 or fewer known LSLs that intend to replace them under one contract receive the necessary funds to complete their project. The project method listed on the IUP for these projects is “10 or fewer”.
- Ensure systems with large numbers of known LSLs receive equitable funding. In order to do so, the remaining funds will be allocated as follows and the project method listed on the IUP for these projects is “more than 10”:
 - All remaining systems receive funding for at least 10 LSL replacements.
 - The remaining funds will be allocated to systems with more than 10 known LSLs as a percentage of the available funding based on a ratio of the system’s known LSLs to the total of the other systems’ known LSLs on the 2027 IUP.

If the state legislature provides additional LSLR funding early enough in the 2027 legislative session, the allotments may either be increased or removed based on funding availability.

See the section [IUP Project Bypass Process](#) for a description of MPFA’s process to add projects to the fundable range.

The base discount for regular DWSRF loans will be: 1.000% for loans up to \$31 million, with no base discount applied to loan amounts more than \$31 million. All LSLR DWSRF loans will be at 0.000%.

Background

The MPFA [board](#) (Board) consists of six state commissioners representing the departments of Employment and Economic Development (DEED) as chair, Management and Budget, Health, Agriculture, Transportation, and the Minnesota Pollution Control Agency (MPCA). MPFA provides financing and technical assistance to local governments for wastewater, stormwater, drinking water, and transportation infrastructure projects to enhance the environmental and economic vitality of the state. MPFA manages the DWSRF in partnership with MDH.

MPFA receives federal capitalization grants and state matching funds to capitalize its SRFs and has statutory authority to carry up to \$2 billion in outstanding revenue bonds. MPFA CW and DW SRF bonds are rated AAA by all three rating agencies. Bonds are repaid from loan repayments and investment earnings (no state backing). As of June 30, 2026, total MPFA assets and liabilities included:

- Current loans outstanding: \$1.9 billion.
- Total assets: \$2.5 billion.
- Current bonds outstanding (par): \$512 million.

MPFA's CWSRF and DWSRF combine annual federal capitalization grants and state matching funds with loan repayments and MPFA revenue bond proceeds to provide a permanent source of low-cost capital to help local governments finance wastewater, stormwater, and drinking water infrastructure projects. Projected sustainable annual lending capacity for the two funds:

- CWSRF: \$169 million per year.
- DWSRF: \$62 million per year.

The MDH PPL ranks projects based on public health and drinking water quality criteria. Cities request placement on the annual IUPs when projects are ready to proceed with construction. MPFA provides project financing to cities of all sizes with below-market rate loans available to all projects in the fundable range of the IUP, and targeted grants based on affordability and specific project types. Within this collaborative structure:

- MDH sets project priorities, conducts technical and environmental reviews, issues plan approvals, and certifies approved projects to MPFA for funding.
- MPFA conducts application and credit reviews, sets loan terms and conditions, services loans, coordinates funding from other sources, and provides overall fund management and program administration.
- Staff from each agency help local governments understand the funding processes, program requirements, and local responsibilities.

MPFA priorities are to:

- Provide financing programs supporting public health, water quality, environmental protection and other priorities as identified by MPFA member agencies.
- Help local governments maintain and improve the condition of their infrastructure assets while keeping rates affordable for their residents.
- Manage revolving fund assets to be state sources for infrastructure financing in perpetuity.

MPFA makes below-market rate loans and grants available to finance infrastructure that might otherwise be unaffordable to communities if they had to borrow money at market rates. Project timing and other

considerations determine which source(s) of funds are used for each project. MPFA details actual sources in its annual reports to the EPA.

Goals and Financial Status of the DWSRF

DWSRF Goals

MPFA commits to using the DWSRF effectively to help ensure safe and reliable drinking water to all Minnesotans. Federal, state, local, and private resources will be used to meet short-term and long-term goals. MPFA and MDH revisit the DWSRF goals annually. Goals have not changed from those established on the 2026 IUP and continue to be the goals of the program.

Table 4: DWSRF Goals

Drinking Water State Revolving Fund Goals	
Short-term	Long-term
Actively coordinate DWSRF loans with other funding programs to maximize the number of PPL projects funded.	Administer the DWSRF so financial assistance for priority infrastructure needs is assured in perpetuity, leveraging with bond proceeds as appropriate to finance as many projects as possible now while maintaining sufficient capacity to meet future needs.
Coordinate DWSRF federal EC funding with State EC funding and the Emerging Contaminants in Small or Disadvantaged Communities (EC-SDC) grant program.	Provide financial and technical assistance to public water supply systems to protect the public health and achieve and maintain compliance with the Safe Drinking Water Act (SDWA).
Partner state LSLR grant funds with the IJJA LSLR funds.	Provide timely funding for all projects that receive technical approval and certification from MPFA.
Determine loan amounts with applicants funded on an annual cash flow basis to meet project needs while limiting the annual impact on the DWSRF.	Actively coordinate with state and federal agency programs to maximize funding for projects on the PPL, including those that have affordability needs.
Promote asset management for DWSRF recipients.	Use a variety of delivery mechanisms to best reach and serve different types of clients.
Continue effective use of set-asides to provide technical assistance to water systems.	Implement technology solutions that increase efficiencies with program operations.

The Annual Project Solicitation Process

Each January the three SRF agencies ([MPCA](#), [MDH](#), [MPFA](#)) launch the annual cycle to solicit projects for ranking on the PPLs and IUPs with a coordinated GovDelivery communication, website postings, and industry newsletters. Interested parties can subscribe for email updates on the [MPFA website](#). This notice outlines due dates for project proposals and technical project requirements.

The three agencies host and participate in training events and finance schools across the state to help communities prepare their PPL and IUP requests and present and discuss application and program requirements.

DWSRF Project Priority List

The PPL prepared by MDH identifies drinking water infrastructure projects that are potentially eligible to receive DWSRF financing over the next five years. Projects are ranked based on state priorities as established in [Minnesota Rules 4720.9015](#) with a focus on protection of public health, consolidation, and financial need. The 2027 PPL contains 1,446 projects with total estimated costs of \$4,122,152,520. See Exhibit 6 for the PPL in priority order and Exhibit 7 for the PPL in alphabetical order.

DWSRF IUP Development

MPFA prepares the IUP in accordance with [Minnesota Statutes, section 446A.081, subdivision 5](#) and [Minnesota Rules, part 7380.0255](#). The IUP fundable ranges identify projects from the PPL eligible to apply for and receive funding through the DWSRF in SFY 2027.

The IUP identifies a fundable range for regular and LSLR projects. Each project in the fundable range requires a complete, approved funding application and MDH project certification under the provisions of [Minnesota Rules Part 4720.9060](#) before DWSRF funding can be approved.

The IUP lists projects in priority order as ranked by MDH on the PPL. Applicants request inclusion on the IUP from MPFA through an online request form. To ensure MDH has adequate time to review projects before the June 30 approval deadline, applicants must submit project plans and specifications to MDH by March 31, 2027. During this time, applicants should also initiate the MPFA funding application process.

The approved IUP remains in effect until the following year's IUP is approved. If an unawarded project listed in the IUP fundable range has an active funding application underway and has been certified by MDH by June 30, 2027, then that project will be carried over to the fundable range on the 2028 IUP.

IUP Project Bypass Process

Per statute, MPFA may move projects into the fundable range that are either on the DWSRF PPL or below the funding cut-off on the IUP to help ensure effective use of available funds to target eligible, priority projects that are ready to proceed. A project may be added to the fundable range, from Part C of the IUP or from the PPL, under these conditions:

1. MDH recommends the project to MPFA based on these considerations:
 - a. The project addresses a documented environmental or public health threat, **OR**

- b. The project is proceeding concurrently with a project in the fundable range on the CWSRF IUP or DWSRF IUP, **OR**
- c. The project would help meet capitalization grant agreement requirements.

AND:

- d. Plans and specifications have been submitted to MDH (deadline is March 31, 2027), **AND**
 - e. A draft project application has been accepted by MPFA.
2. MPFA determines that funds are available based on these considerations:
- a. There are sufficient projects in the IUP fundable range that have not met the application or plans and specifications deadlines, **AND/OR**
 - b. Sufficient additional capitalization grants, state match, or other SRF assets have been added to available project funds since the original IUP approval.
3. MPFA determines project readiness to proceed based on these factors:
- a. The project has been certified by MDH, **AND**
 - b. Construction bids, as applicable, have been awarded, **AND**
 - c. MPFA has approved the completed project application.
- NOTE:** if not all the requirements under 3 have yet been met then MPFA will send a funding assurance letter to the applicant giving MPFA's pledge that the project will be added to the DWSRF IUP fundable range if these requirements are met prior to adoption of the next year's IUP. If the requirements are not all met by then, the project will be included on the next year's IUP, but only as a carryover project if certified by June 30, 2027.
4. MPFA adds the project to the IUP fundable range and proceeds with the financing agreement.

This process will follow 40 CFR 35.3150 (b)(4) which states the IUP project list may be changed during the year for projects previously identified through the public participation process.

Public Comment

MPFA Board action establishes the public comment period for the draft IUP. The IUP is considered final upon consideration and incorporation of comments received during the public comment period. MPFA notices the comment period via GovDelivery and on its website. MPFA accepts written comments via [email](#). Comments are reviewed by MPFA and MDH staff. The final IUP notes responses and MPFA provides individual written responses as warranted.

By statute, MPFA offers eligible recipients seeking placement on the DWSRF IUP an opportunity to review and comment on the plan before it is adopted. The draft IUP may be changed to add additional projects based upon funding availability and project readiness.

In reviewing comments received, MPFA considers a) whether a comment is within scope of the IUP, b) if the proposed project or use of funding is eligible for DWSRF funding or c) if the project start date is after June 30, 2027.

Announcements

Comment Period for 2027 Clean Water and Drinking Water Intended Use Plans (IUPs)

The comment period for the draft 2027 Clean Water and Drinking Water Intended Use Plans (IUPs) is open from **October 1, 2026, through October 23, 2026**. View the draft IUPs on the MPFA website under the [Clean Water](#) and [Drinking Water](#) tabs. Direct questions and submit IUP-specific comments via email to MPFA at MN.PFA@state.mn.us.

At the September 29, 2026 meeting the MPFA Board took action to open the comment period for the draft IUPs, from October 1st, 2026, through October 23, 2026.

MPFA received XX comments to the draft DWSRF IUP from local governments or their representatives requesting projects be added, removed or information updated or corrected on the 2027 IUP. MDH provided comments identifying facility plan approvals and clarifying project numbers.

Based on information received XX projects were added to the IUP as carryover projects from prior IUPs, XX projects were deleted from the IUP, and project cost information was modified for XX projects. XX projects requested placement on the IUP. These requests were denied because the projects were already completed with non-SRF funds, the lead agency is the U.S. Department of Agriculture-Rural Development (USDA-RD), or the projects were not listed on the DWSRF PPL. XX comment was a request to change the project title. This request was denied as project titles on the IUP are those provided on the DW PPL.

The 2027 DWSRF IUP now lists XX projects in the fundable range requesting \$XX in financial assistance through the DWSRF.

Financial Management and Official Controls

DWSRF Federal and State Requirements

DWSRF-funding projects are subject to federal and state requirements that are detailed in the application materials and recipient contract packet posted on the MPFA website.

The IJA, signed into law November 15, 2021 (Public Law 117-580), includes additional provisions and funding to support the state revolving funds. Applicants are encouraged to consult MPFA loan officers and MDH staff for additional information.

Capacity Model

Projected sustainable lending capacity is updated at least annually, based on existing assets and debt obligations, predicted market rates and subsidy levels, additional capital contributions, and current year lending levels. These are rough estimates of sustainable capacity, which will be affected by actual market rates, subsidy

levels and contribution amounts from federal capitalization grants and state match. MPFA considers this analysis when setting the fundable range for IUPs annually.

MPFA considers both short and long-term SRF lending goals as well as staff capacity when setting the IUP fundable range each year. The estimated loan amount for DWSRF projects in the fundable range is over \$523 million, which far exceeds sustainable lending capacity, but even if all projects did proceed this SFY the DWSRF has the capacity to fund them. Historically less than half of the projects in the funding range proceed to contract award during the SFY.

Sources and Uses

Exhibit 3 (Regular) and Exhibit 4 (LSLR) show the sources and uses of funds in the DWSRF for SFY 2027, the total amounts from inception through SFY 2026, and the estimated amounts for SFY 2027. Demand for DWSRF-regular financing continues to grow. MPFA manages excess demand by setting a fundable range for new project requests based upon PPL priority points, and by setting a cap on the annual loan amounts to any system that will be eligible for the base discount. Demand for DWSRF-LSLR financing exceeds available resources.

Transfers

Federal regulations allow transfers of up to 33% cumulative federal capitalization grants between the CW and DW SRFs as permitted under 40 CFR 35.3555(c)(8). This IUP reflects an anticipated \$3,909,000 transfer from the CWSRF EC capitalization grant to the DWSRF for drinking water EC projects, based on EC capitalization grant allotments.

Cross-Collateralization

Since 1997, MPFA has cross-collateralized bonds sold for the DWSRF and CWSRF programs to enhance bondholder security. This improves the bond's credit rating and reduces the interest rates, allowing MPFA to offer better interest rates to its SRF borrowers.

The revenues from loan repayments in each program are pledged first to the bonds for that program. After the revenues in each program have been used to make MPFA's bond debt service payments and meet all other payment and coverage requirements under the bond resolutions, funds exceeding these requirements may be used to cover a default in the other program.

Given the coverage requirements MPFA must meet for its bonds, the general obligation pledges provided by the borrowers, and the financial management practices of MPFA (as reflected by the AAA rating of its bonds), it is very unlikely that a default would occur. The cross-collateralization of the two programs will, however, provide even more assurance to the bondholders and enhance the financial strength of the programs.

Loan Terms and Conditions

MPFA determines terms and conditions for DWSRF loans pursuant to [Minnesota Statutes Section 446A.081](#) and [Minnesota Rules Part 7380.0265](#). Loans are not awarded until as-bid costs are submitted to MPFA. MPFA makes DWSRF loans at below-market rates in accordance with federal and state law. The standard loan term is 20-

years or up to 30 years for projects meeting disadvantaged community criteria describe below. No loan term can exceed the useful life of the project.

Terms and conditions for DWSRF LSLR loans are established in [Minnesota Statutes, Section 446A.081, Subd 8 \(h\)](#). Terms and conditions for traditional construction loans differ from those for LSLR loans. The interest rate on LSLR loans is 0% with principal payments commencing not later than 18 months after the completion of the project.

To manage large project requests within the DWSRF annual lending capacity, MPFA may provide separate financing agreements over two or more years based on the project's cash flow needs as negotiated between MPFA and the borrower.

Interest Rates

The basis for setting interest rates on regular DWSRF loans is described in Minnesota Rules Parts [7380.0272-0275](#). MPFA bases interest rates on the greater of the current bond market rates for AAA or AA rated municipal bonds as determined by a daily index or the bond yield scale of MPFA's bonds if MPFA bond proceeds are available, less any additional discounts described below.

MPFA deposits up to 2% of the interest portion of each repayment into an administrative fee account outside the SRF to pay program administrative expenses. This is not an additional charge to the borrowers.

Additional discounts up to 2.0% may be applied to borrowers under 2,500 population as described in Minnesota Rules Part [7380.0272, Subpart 3B](#). These discounts take project affordability into account. The minimum interest rate under MPFA rules is 1.0%. Interest rates are at or below market rates in accordance with federal and state law.

Binding Commitments

MPFA does not initiate financing agreements until after as-bid costs are received, the application is complete, and MDH has certified the project. Binding commitments are recorded when the agreement is fully executed.

Reported binding commitment amounts for an SFY are net of decreases to prior SFY binding commitments. New binding commitments for SFY 2026 were \$245 million.

Disbursements

After loan closing, SRF funds may be requested by the recipient as eligible project costs are incurred. Eligible project costs incurred prior to loan closing may be reimbursed, provided these costs are identified and discussed with the MPFA loan officer during the application process, and funds are available to cover the period of costs. Recipients must submit a signed disbursement form (provided by MPFA) along with copies of supporting documentation (invoices, signed contractor partial pay estimates, etc.) to their MPFA loan officer by the 12th of each month for reimbursement by the end of that same month.

Timely and Expeditious Disbursements

MPFA manages the finances of the DWSRF to achieve timely and expeditious disbursement of available project dollars through:

- Not entering into financing agreements until projects are ready to proceed with construction.
- Balancing available resources and long-term lending capacity with the desire to maintain a level priority-point cutoff for the fundable range.
- Exploring opportunities, when excess cash is available, to retire existing debt to improve lending capacity.

MPFA generally sells bonds every 3-5 years, to reduce issuance costs. We believe this benefits the CWSRF in the long run, but it does create, temporarily, large cash balances. Partly to improve our achievement of timely and expeditious disbursement, MPFA plans to pursue the opportunity to use EPA's Water Infrastructure Finance and Innovation Act program for SRFs (SWIFIA), as an alternative choice to the public sale of revenue bonds. One of the significant benefits of SWIFIA is that the proceeds of this debt can be drawn down as needed for project disbursements.

Reporting

Reporting to EPA occurs at the program and project levels. Program reporting includes the annual reports to EPA, where MPFA reports the final list of equivalency assistance agreements, and providing annual independently conducted audits, quarterly reporting to the OWSRF and as required through SAM.gov to comply with Federal Funding Accountability and Transparency Act (FFATA) requirements. MPFA's contract packet for recipients includes forms for compliance with specific contract conditions such as Build America, Buy America, American Iron and Steel, fair share efforts, and prevailing wages.

Subsidization

Federal capitalization grants require states to use certain percentages of the federal funds for additional subsidization beyond below-market interest rates for projects meeting specific criteria. Base DWSRF capitalization grants require a minimum of 26% and a maximum of 49% to be used for additional subsidization. IIJA Supplemental and LSLR capitalization grants require 49% to be used for additional subsidization. IIJA EC capitalization grants require 100% to be used for additional subsidization.

Table 5: Capitalization Grant Subsidization

FFY	Grant Name	Award Amount	Min Add Sub Percentage	Max Add Sub Percentage	Min Add Sub Amount	Max Add Sub Amount
FFY 2026	Base	\$5,812,000	26%	49%	\$1,511,120	\$2,847,880
FFY 2026	IIJA General Supplemental Year 5	\$37,648,000	49%	49%	\$18,447,520	\$18,447,520
FFY 2026	IIJA Emerging Contaminants Year 5	\$11,557,000	100%	100%	\$11,557,000	\$11,557,000
FFY 2026	IIJA Emerging Contaminants Year 5 (transferred from CW)	\$3,909,000	100%	100%	\$3,909,000	\$3,909,000
FFY 2026	IIJA Lead Service Line Replacement Year 5	\$57,770,000	49%	49%	\$28,307,300	\$28,307,300

MPFA provides additional subsidization to eligible projects in the form of principal forgiveness (PF) grants, meaning a reduction in the amount of loan principal that must be repaid, which is granted when MPFA awards a DWSRF financing agreement. MPFA awards DW PF grants to address affordability in disadvantaged communities and for EC and LSLR projects.

As shown below, MPFA administers three types of PF:

Table 6: Types of PF

	Disadvantaged Communities PF (affordability)	Emerging Contaminants PF	LSLR PF (disadvantaged communities)
Authority	Minnesota Statutes, Section 446A.081 , Subd 7 (b)	Minnesota Statutes, Section 446A.081 , Subd 9(a)(12)	Minnesota Statutes, Chapter 39, Section 446A.77
Purpose	Build projects to replace aging and obsolete water systems that would otherwise create a significant financial hardship for the municipality and its residents.	Statute authorizes PF grants for Emerging Contaminant projects for 50% of project costs up to a maximum of \$3,000,000.	Federal IJA funds dedicated to LSLR require 49% to be used for PF, with the remainder to be divided between various set-asides and loans.
Methodology	Follows State affordability grant calculations Minnesota Statutes, Section 446A.072	PF funds for EC projects are reserved and awarded for projects based on their PPL ranking, beginning first with carryover projects (that received technical approval and certification in a prior fiscal year), followed by new IUP projects. If sufficient PF funds are not available, a project may remain on the IUP as a carryover project and eligible funding will be reserved and awarded when new appropriations are available.	MPFA looks at the combined financial impact from existing water rates for system users in the municipality plus the cost of a potential special assessment for replacement of the lead service line. If the total cost exceeds 1.2% of MHI the project will be eligible for federal PF.

Disadvantaged Community and Affordability Criteria

[Minnesota Statutes, section 446A.081](#), subdivision 7 (b), authorizes DW PF grants to the extent permitted under federal law, to address affordability needs based on the criteria and requirements established for DWSRF projects under section [446A.072](#), the Water Infrastructure Funding (WIF) program.

The purpose of MPFA affordability criteria is to help SRF recipients meet their water infrastructure needs that would otherwise be unaffordable and to reduce the risk of major system failure due to these needs going unmet. The criteria look at costs to operate and maintain the infrastructure system and the capacity to generate system revenues to meet those needs. A major factor in determining affordability is the number of system users. Smaller communities often do not have the user base to generate sufficient revenue to meet their needs affordably.

MPFA evaluates all DWSRF funding applications for potential eligibility for WIF or PF. A DWSRF project may receive a WIF or PF grant in conjunction with a DWSRF loan when the average per household system cost exceeds 1.2% of median household income. The maximum grant may not exceed \$10 million or \$20,000 per existing connection, whichever is less.

WIF/PF funding provides assistance with project costs related to the existing infrastructure needs, not growth. Eligible project cost is determined by multiplying the total project cost by the essential project component percentage calculated by MDH.

MPFA applies the disadvantaged community definition based on WIF affordability criteria to LSLR projects. Drinking water service lines often have both a public and private portion. Municipalities cannot use system revenues to replace privately-owned portions. Generally, special assessments to each individual property owner have been the only way to pay the cost of the private portion of the LSLR, resulting in the impact falling on each property owner rather than over a municipality's entire user base. This could result in an affordability barrier to replacing the lead service line.

Federal IIJA funds dedicated to LSLR require 49% to be used for PF, with the remainder to be divided between various set-asides (up to 26%) and loans. In determining LSLR projects that are eligible for federal PF funds, MPFA will look at the combined financial impact from existing water rates for system users in the municipality plus the cost of a potential special assessment for replacement of the lead service line. If the total cost exceeds 1.2% of MHI the project will be eligible for federal PF for the cost of replacing the privately owned portion of the LSL. MPFA must use state LSLR funds first for grants to repay debt incurred under the program. For LSL replacement costs, state funds may be used for 100% of the cost.

Project qualification for PF or WIF cannot be determined based solely on information provided in the IUP request. MPFA uses additional project information submitted during the application phase, including details on system users and system costs, debt, and as-bid costs to calculate the cost impact to system users.

Affordability and Non-SRF Programs, Federal

U.S. Department of Agriculture-Rural Development (USDA-RD)

Small rural communities under 10,000 population with median household incomes below the non-metro state average may apply to USDA-RD for wastewater and drinking water grants and loans. Projects eligible to receive USDA-RD grants based on the USDA-RD affordability criteria may receive WIF matching grants from MPFA for up to 65% of the total grant need as determined by the USDA-RD. This state-federal partnership allows state WIF funds to assist more projects, makes it easier for small communities to access funding, reduces state administrative expenses, and helps USDA-RD maximize federal funding available for Minnesota communities. The table below summarizes the WIF funds reserved for drinking water and wastewater infrastructure projects funded by USDA –RD that are ready to proceed.

Table 7: WIF funds reserved for USDA-RD Projects

Project Entity	Total Project Cost	WIF-Drinking Water	WIF -Wastewater
Belview	\$ 8,718,000	\$ 552,000	
Bigfork	\$ 2,592,000	\$ 1,035,000	
Cass Lake	\$ 5,020,000	\$ 1,156,000	\$ 991,000
Cosmos	\$ 9,637,000		\$ 2,210,000
Dennison	\$12,844,000	\$ 1,780,000	\$ 1,780,000
Gilman	\$ 6,431,000		\$ 1,700,000
Granada	\$ 9,266,000	\$ 2,800,000	
Harris	\$ 1,674,000	\$ 698,000	
Kandiyohi	\$ 6,168,000	\$ 2,594,000	\$ 1,111,000
Kennedy	\$ 2,253,000	\$ 350,000	
Kiester	\$ 2,452,000	\$ 1,356,000	
Emmons	\$ 7,355,000		\$ 3,000,000
McGregor	\$ 1,377,000	\$ 505,000	
Nielsville	\$ 2,326,000	\$ 880,000	
Okabena	\$ 5,529,000		\$ 1,390,000
Red Lake Falls	\$ 7,011,000	\$ 1,682,000	
Rose Creek	\$ 13,205,000	\$ 3,246,000	\$ 330,000
Total WIF Funds Reserved		\$ 18,634,000	\$ 12,512,000

Affordability and Non-SRF Programs, State

DEED-Small Cities Development Program (SCDP)

The [SCDP](#) provides funding through the US Department of Housing and Urban Development to qualifying non-entitlement communities for public infrastructure projects often in conjunction with MPFA, USDA-RD, MPCA, and MDH to make rural communities more viable.

Department of Iron Range Resources and Rehabilitation (IRRR)

The IRRR provides public works grants for infrastructure to local governments. Publicly owned projects in cities located near an active mine pit or a mine pit that has been idled within the last two years are eligible.

Equivalency

MPFA designates projects in amounts equal to each capitalization grant as federal equivalency projects.

The DWSRF contains funding from federal capitalization grants, state match, MPFA revenue bond proceeds, loan repayments, and investment interest. Equivalency provides a way of identifying projects that must meet the additional federal equivalency requirements regardless of funding sources used.

MPFA and MDH will strive to:

- minimize the number of DWSRF projects that must comply with the additional equivalency requirements and;
- identify these projects as early as possible in the project life cycle.

Projects in this IUP's fundable ranges will be identified for equivalency as "Yes", "No", or To be determined ("Tbd") to retain the flexibility, as projects move forward, to ensure that the number of equivalency projects is minimized while meeting each capitalization grant's requirements. MPFA will report final lists of equivalency assistance agreements in its annual reports to the EPA and monthly through SAM.gov to comply with Federal Funding Accountability and Transparency Act (FFATA) requirements.

Presently, the 2027 DWSRF IUP identifies 24 DWSRF projects as Yes for equivalency. Note that equivalency allocations per grant will not be final until each grant year is closed.

Funding Sources

State Funding

The Minnesota state legislature appropriated funding during the 2026 session to MPFA programs as follows:

Table 8: 2026 state appropriations

Program	State Appropriation Amount to MPFA	Clean Water Amount	Drinking Water Amount
State match to SRFs	\$19,000,000	\$9,500,000	\$9,500,000
WIF	\$56,000,000	\$26,000,000	\$30,000,000
PSIG	\$30,000,000	CW/DW split to be determined by project need	
Emerging Contaminants (DW)	\$17,000,000		\$17,000,000
LSLR	\$15,000,000		\$15,000,000

During the 2026 legislative session, the following changes were made impacting MPFA programs:

- The Emerging Contaminant Grant Program was renamed to the Drinking Water Contaminants Grant Program and the eligibility was expanded beyond emerging contaminants to also address Safe Drinking Water Act regulated contaminants.
- LSLR appropriation was funded by State General Obligation Bond proceeds so funding can only be used on the publicly owned portion of lead service lines. In order to utilize these funds, statutory language was modified to allow up to 100 percent of the publicly owned portion to be funded with State dollars.

DWSRF Federal Funding

MPFA applies for federal funds upon notification by EPA of available funding levels and after IUP approval. In general, factors impacting timing of funding applications may include availability of state match appropriations, and notice from EPA on final funding allocations. MPFA will apply for the following cap grants:

Table 9: Capitalization Grants MPFA will apply for in SFY27

FFY 2026	Base	\$5,812,000
FFY 2026	IIJA General Supplemental Year 5	\$37,648,000
FFY 2026	IIJA Emerging Contaminants Year 5	\$11,557,000
FFY 2026	IIJA Emerging Contaminants Year 5 (transferred from CW)	\$3,909,000
FFY 2026	IIJA Lead Service Line Replacement Year 5	\$57,770,000

Set-asides

A component of SRF administration is identifying and managing funds elected for set-aside activities. Set-asides support the SRF mission to support capacity development, asset management, and program administration. Under this IUP, MPFA and MDH submit required workplans developed for these purposes with capitalization grant applications to EPA. Any amounts not utilized under this IUP will be reserved for potential future program administrative activities. MPFA may bank set-aside funds for use in future years. Any unused funds return to the loan pool after two years if left unspent. The table below summarizes the set-asides Minnesota will utilize to meet DWSRF goals. Short summaries of each set-aside follow the table.

Table 10: Set-Asides

EPA Grant Name	Grant Funding	Program Admin (MPFA and MDH)	Public Water Supply Supervision (PWSS)	Small System Technical Assistance	Local Assistance 10%		Local Assistance 5%	
					Funding	Specific Use	Funding	Specific use
Base 2026	\$5,812,000	NR***	NR***	NR***	NR***	NA**	NR***	NA**
IJA Suppl	\$37,648,000	\$1,505,920 Up to 4%*	\$3,764,800 Up to 10%*	\$752,920 Up to 2%*	\$3,764,800 Up to 10%*	Wellhead Protection	\$1,882,400 Up to 5%*	System Reliability
IJA LSLR	\$57,770,000	\$2,310,800 Up to 4%*	NR***	\$1,155,400 Up to 2%*	\$5,777,000 Up to 10%*	Inventory Technical Assistance	NR***	NA**
IJA EC FFY26	\$11,557,000	NR***	NR***	NR***	NR***	NA**	NR***	NA**

*Future reallocation dollars follow the same set-aside percentages as shown in this table.

** NA = not applicable

*** NR = not requesting

IJA Supplemental Set-Asides

Program Administration

- Goal(s): Help systems meet SDWA compliance requirements and navigate the DWSRF processes.
- Activities (include but are not limited to): Program administration, outreach, training, project coordination, engineering oversight, plan review, environmental review, construction inspection, and technical assistance.
- Schedule: Funding will be utilized between SFYs 2027 & 2028. Actual dollar amounts for each fiscal year will be determined in coordination with MDH and incorporated into interagency agreements. Any unspent funds at the end of the second SFY will be returned to the DWSRF to fund projects.

Public Water Supply Supervision

- Goal(s): Maintain primacy for the SDWA. Ensure public water systems are returned to and/or remain in compliance with the SDWA.
- Activities (include but are not limited to): Engineering plan review, sanitary surveys, operator certification, sampling coordination, capacity development, and enforcement.
- Schedule: Funding will be utilized between SFYs 2027 & 2028. Actual dollar amounts for each fiscal year will be determined in coordination with MDH and incorporated into interagency agreements. Any unspent funds at the end of the second SFY will be returned to the DWSRF to fund projects.

Small System Technical Assistance

- Goal(s): Ensure small public water systems have access to training and on-site assistance as needed. Provide the tools necessary for small water systems to document their assets and summarize their needs for the decision makers.
- Activities (include but are not limited to): Contract with Minnesota Rural Water Association (MRWA) to provide outreach, training, direct assistance, and asset management planning.
- Technical Assistance Contract Summary/Schedule: MDH will utilize the small system technical assistance funding to hire staff at MRWA to provide training, asset management planning, and direct technical assistance to small community and non-community water systems. Contracts will be finalized between MDH and MRWA in June prior to the fiscal year that the technical assistance work will commence. These funds will be utilized in SFYs 2027 & 2028. Any unspent funds at the end of the second SFY will be returned to the DWSRF to fund projects.

Local Assistance – Wellhead Protection

- Goal(s): Ensure source water is protected, and public water supplies have the resources necessary to plan for future source water needs.
- Activities (included but are not limited to): Project management, groundwater and surface water modeling, project coordination, outreach, and planning.
- Schedule: Funding will be utilized between SFYs 2027 & 2028. Actual dollar amounts for each fiscal year will be determined in coordination with MDH and incorporated into interagency agreements. Any unspent funds at the end of the second SFY will be returned to the DWSRF to fund projects.

Local Assistance – System Reliability

- Goal(s): Provide a funding mechanism for water system in need of backup power or a redundant water source to ensure water system have a reliable drinking water supply.
- Activities (include but are not limited to): Funding for redundant water sources and backup power.
- System Reliability Grant Program Summary/Schedule - MDH will utilize the Local Assistance Set-aside from IIJA Supplemental funds to create a pilot program to provide grants to water systems to ensure system reliability. The grant program will target systems that cannot currently meet their average daily water usage in the event of a power outage or if they lose their primary water source. The grant program will provide 80 percent of project costs up to \$80,000. Eligible projects are those needed to provide backup power or a backup water source. The intent of the program is to fund generators and backup wells at small community public water systems.

IIJA LSLR Set-Asides

Program Administration

- Goal(s): Ensure DWSRF technical requirements are completed in an efficient and accurate manner for LSL replacement projects.
- Activities (include but are not limited to): Outreach, training, project coordination, engineering oversight, plan review, environmental review, construction inspection, and technical assistance.
- Schedule: Funded will be utilized between SFYs 2027 & 2028. Actual dollar amounts for each fiscal year will be determined in coordination with MDH and incorporated into interagency agreements. Any unspent funds at the end of the second SFY will be returned to the DWSRF to fund projects.

Small System Technical Assistance

- Goal(s): Ensure small public water systems have access to training and on-site assistance as needed related to service line inventory development and lead service line replacement funding.
- Activities (include but are not limited to): Contract with MRWA to provide outreach, training, direct assistance, and GIS.

- Technical Assistance Contract Summary/Schedule: MDH will utilize the LSLR Small System Technical Assistance Set-aside funding to hire staff at MRWA to provide training and direct technical assistance to community water systems to ensure compliance with the Lead and Copper Rule Revisions (LCRR) and the Lead and Copper Rule Improvements (LCRI). Contracts will be finalized between MDH and MRWA in June prior to the fiscal year that the technical assistance work will commence. These funds will be utilized in SFYs 2027 & 2028. Any unspent funds at the end of the second SFY will be returned to the DWSRF to fund projects.

MDH will also utilize the LSLR Small System Technical Assistance Set-aside funding to contract with the University of Minnesota (U of M) to update and maintain the Lead Inventory Tracking Tool.

<https://maps.umn.edu/LSL/> The tool allows residents to search by an address to determine if they have a lead service line. Contracts will be finalized between MDH and MRWA in June prior to the fiscal year that the work will commence. These funds will be utilized in SFYs 2027 & 2028. Any unspent funds at the end of the second SFY will be returned to the DWSRF to fund projects.

Local Assistance

- Goal(s): Ensure public water supplies have the resources necessary to fully identify the material type of all service lines.
- Activities (include but are not limited to): Contract with consulting engineers and potholing contractors to improve service line inventories for community water systems, work can include project management, inspection, GIS assistance, outreach, and project coordination.
- Local Assistance Summary/Schedule: MDH will utilize the LSLR Local Assistance Set-Aside to contract with 18 consulting engineers in SFYs 2027 & 2028 to provide service line inventory assistance to community water systems.

Interagency Coordination

The three Minnesota SRF agencies (MDH, MPCA, MPFA) coordinate activities related to outreach, training, technical assistance (TA), and asset management. Outreach and training events build awareness of the various funding programs, provide a general overview of funding programs, and outline the financial and technical requirements associated with each program. These events take place throughout the year at water operator schools, training sessions, conferences, and workshops organized by our water industry partners, like Minnesota American Water Works Association (MNAWWA), MRWA, and many others. TA activities, including asset management planning, are coordinated between MDH, MPCA, and our technical assistance provider, MRWA. These activities vary from direct on-site technical assistance to development of individual asset management plans. In SFY 2026, the coordination between MPFA, MDH and MRWA resulted in eight completed asset management plans for small municipal water and wastewater systems. MPFA provides more information on these efforts in the annual reports to the EPA.

Table 11: Coordination Milestones

Timeline	Activity
January	Joint notice kicking off PPL and IUP project solicitation processes.
March	PPL applications due to MPCA by the first Friday in March.
April	MPCA and MPFA discuss set-aside activities and budget for the following SFY CWSRF IUP.
June	IUP project requests due to MPFA by the first Friday in June.
June	MPFA Board approves administrative budgets (including administrative set-asides) for upcoming fiscal year (starting July 1).
July/August	Review set-aside narrative and budgets for the IUPs.
September	Develop End of Year Set-aside Reports and associated documents for CWSRF Annual Report. MPFA Board approves draft IUP for public comment.
October	IUP comment period. Final IUP posted. Develop workplans for capitalization grant applications.
After IUP is finalized	Prepare and submit capitalization grant applications.
After federal grants are awarded to MPFA	MPFA processes interagency agreements with SRF partner agencies.

Amending this IUP

MPFA may solicit public comments for substantive amendments to adopted IUPs. MPFA may administratively amend the IUP to add projects to the fundable ranges or to adjust for acceptance of additional state or federal funds. Once adopted, an IUP remains in effect, as amended, until the next year's IUP is adopted.

Part A: Projects from Part A of last year's IUP and those that were certified by June 30, 2026, that have not yet been awarded funding.

Part B: Projects not certified by June 30, 2026 and ranked at or above the funding cutoff.

Part C-1: Projects ranked below the fundable range cutoff.

Part C-2: Projects referred to USDA - Rural Development.

Total project costs are estimates based on IUP request.

Except for already awarded projects, the estimated non-SRF funds, PSIG, GPR and Affordability amounts are preliminary estimates only.

Projects will initially be identified as "Yes", "No", or "Tbd" for federal equivalency.

IUP Part	Total Project Cost	Non-SRF	EC	Affordability	Net SRF	Count
A	\$220,014,890	\$19,720,000	\$24,504,630	pending	\$175,790,260	48

- (3) The fiscal year 2026 amount reflects the appropriations made in the 2026 session.
- (4) Revenue Bond Proceeds (net), and Bond Debt Service are net of refunding activity. Anticipated proceeds in fiscal year 2027 reflect the amount needed if all fundable range projects proceed in SFY 2027.
- (5) Binding commitments are recorded when the financing agreement is fully executed, after project certification by the MDH and submittal of as-bid costs to the MPFA. Amounts shown are net of decreases to prior years' binding commitments. New binding commitments for fiscal year 2026 were \$ 112,109,761.00.
- (6) Additional subsidization provided as principal forgiveness as authorized under federal law and MN Statutes 446A.081, Subdivision 9 and 446A.072.

Note: the balance in the DW Fee Account at June 30, 2026 was: \$1,345,165.69.
