RE: Airwaves Road NE Property  
Phase I Environmental Site Assessment  
Pine City, Minnesota  
SEH No. PINE0 122682

Mr. Nathan Johnson  
City of Pine City, Minnesota  
315 Main Street South  
Pine City, MN 55063-1619

Dear Mr. Johnson:

Please find enclosed one copy of the Phase I Environmental Site Assessment for the property located on Airwaves Road in Pine City, Minnesota. I have also included the full document, tables, figures and appendices on CD. Thank you for choosing SEH to complete this assessment. Please feel free to contact me at 651.490.2135 if you have any questions.

Sincerely,

A handwritten signature in dark ink, appearing to read "Allen H. Sunderman", with a long horizontal flourish extending to the right.

Allen H. Sunderman, PG  
Project Manager/Principal

# Phase I Environmental Site Assessment

## Airwaves Road NE Property

Prepared for City of Pine City

---

### 1.0 Introduction

Short Elliott Hendrickson Inc. (SEH<sup>®</sup>) was retained by City of Pine City to conduct a Phase I Environmental Site Assessment (ESA) of the property located at 1150 Airwaves Road NE in the City of Pine City, Minnesota 55063 (herein referred to as “site” or “subject property”). The subject property is depicted on **Figure 1**.

SEH’s representative, Greg Ahl, visited the site on November 30, 2012. During the site reconnaissance, existing conditions were noted. This report summarizes the findings of the Phase I ESA.

### 1.1 Purpose

An SEH environmental professional completed the Phase I ESA in general accordance with ASTM Standard Practice E 1527-05. The purpose of the Phase I ESA is to identify, to the extent feasible pursuant to the processes described in E 1527-05 and in a manner consistent with good commercial or customary practice, Recognized Environmental Conditions (RECs) and Historical RECs (HRECs) in connection with the subject property (see also **Section 3.6**).

By ASTM definition, REC means “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment, and conditions that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.”

The term HREC is defined by ASTM to mean “an environmental condition which would have been considered a REC in the past, but which may or may not be considered a REC currently.”

### 1.2 Scope of Services

The Phase I ESA consists of the following four general tasks:

- Records Review – The purpose of the records review is to obtain and review reasonably ascertainable records from standard sources (including government records, physical setting sources, and historical use records) to assist in identifying RECs or HRECs in connection with the subject property. Publicly-available federal, tribal, state, county

---

and/or city records are reviewed as appropriate to determine if the property has had a history of spills, leaks, hazardous waste storage, regulatory compliance and improper waste disposal practices. Reasonably ascertainable standard historical sources are reviewed as necessary to identify prior uses of the property from the time the property was first developed or 1940, whichever is earlier. Significant data gaps of greater than 5 years in property historical information are identified and discussed.

- Site Reconnaissance – The objective of the site reconnaissance is to observe the subject property to obtain information indicating the likelihood of RECs or HRECs in connection with the subject property. As part of the site reconnaissance, SEH observes the property and structures, if any, located on the property for indications of RECs or HRECs to the extent not obstructed by thick vegetation, bodies of water, stored materials or product, equipment, or other obstacles. Potential environmental concerns on the subject property and observable environmental concerns on adjoining properties that relate to improper waste storage and disposal, and hazardous materials are noted.
- Interviews – The purpose of conducting interviews is to obtain information indicating RECs or HRECs in connection with the subject property. As appropriate, past and present owners, operators, employees and occupants of the facility, and government officials are interviewed regarding the property. If the subject property is abandoned, one or more owners or occupants of neighboring properties are interviewed.
- Technical Report – SEH prepares the technical report summarizing the compiled information, and offers findings, opinions and conclusions based on the available data. If significant data gaps are identified, they are discussed in the report. Recognized Environmental Conditions and/or HRECs, if any, identified during performance of the Phase I ESA are described in the report. The report also includes SEH’s opinion of the potential impact of each REC, if RECs are identified.

For the tasks listed above, records reviewed will be limited to information that is publicly available, obtainable from its source within reasonable time and cost constraints, is practically reviewable, and determined by the environmental professional to be useful in evaluating the condition of the property.

The Phase I ESA was conducted in accordance with an Agreement between SEH and City of Pine City dated November 7, 2012. The Phase I ESA does not include testing or sampling of materials (for example, soil, water, air or building materials) or any of the other following non-scope considerations specified in Section 13.1.5 of ASTM E 1527-05:

1. Asbestos-containing materials;
2. Radon;
3. Lead-based paint;
4. Lead in drinking water;
5. Wetlands;
6. Regulatory compliance;
7. Cultural and historic resources;
8. Industrial hygiene;
9. Health and safety;
10. Ecological resources;
11. Endangered species;
12. Indoor air quality; or
13. High voltage power lines.

---

### 1.3 Significant Assumptions

The following significant assumption has been incorporated into this report:

- Based on topography and surface features, local groundwater flow at the subject property and in the vicinity of the subject property is expected to be to the east towards Cross Lake.

### 1.4 Limitations and Exceptions

None of the buildings adjacent to the subject property were inspected by SEH, as it was not within the scope of this Phase I ESA. Contaminant sources and/or environmentally hazardous materials/substances may potentially exist within any structure.

Due to winter climate at the time of site reconnaissance, vegetation was dormant. Observations for stressed vegetation could not be made.

Observations of the ground surface were obstructed by snow cover at the time of site reconnaissance.

### 1.5 Special Terms and Conditions

SEH performed the Phase I ESA in general accordance with ASTM E 1527-05 and the Agreement between SEH and City of Pine City. Performance of the Phase I ESA in general accordance with ASTM E 1527-05 is intended to reduce, but not eliminate, uncertainty regarding the existence of RECs or HRECs in connection with the subject property.

When reasonably ascertainable, data was obtained and reviewed. However, the accuracy of the collected data is not the responsibility of SEH. Information provided to SEH by client representatives and site contacts has been accepted in good faith and is assumed to be accurate unless written documentation, available within the scope of this Phase I ESA, or visual observations contradicted it.

The Phase I ESA is not a comprehensive site characterization and should not be construed as such. The findings and conclusions of the Phase I ESA are based on information collected and observed at the time of the Phase I ESA and are not scientific certainties, but probabilities based on professional judgment regarding the significance and accuracy of the collected data. Because professional judgments incorporated into the report are based on limited evidence, there is inherent uncertainty in the conclusions drawn and reported. The client has determined that the level of effort and corresponding degree of uncertainty are acceptable for the client's purpose. The Phase I ESA may not include all environmental conditions that can materially impact the property and a finding of no RECs or HRECs is not a warranty or guarantee that a property remains free from contamination.

Laws and regulations, if referenced in this report, are provided for information purpose and should not be construed as legal opinion or recommendation.

### 1.6 User Reliance

The Phase I ESA and all reports, verbal and written, are solely for the use of City of Pine City. Any third party may have different interests, purposes, and motives than City of Pine City with regard to this assessment and report. Any reliance on the Phase I ESA by any other party shall be at such party's sole risk, unless that party has written authorization from SEH and City of Pine City and is a party to the Agreement between SEH and City of Pine City.

---

## **2.0 Site Description**

### **2.1 Location**

The property is located in Pine City, Minnesota, in Pine County (**Figure 1**). The subject property is bound to the east by Airwaves Road NE, extends to the south and abuts the property of Lake Superior Laundry, and extends to the north just past the City of Pine City municipal water tower. The property is partially bound to the west by water treatment ponds and also marshland. The subject property is located in the SW portion of Township 39N Range 21W Section 22. The approximate property boundary and site features are shown on **Figure 2**.

### **2.2 Subject Property and Vicinity General Characteristics**

The subject property and surrounding area is generally open grassland, flat marshland, and wooded area with an elevation of approximately 965-feet above mean sea level (amsl) (USGS 1983). The subject property is approximately 70 acres.

### **2.3 Current Use of the Subject Property**

The subject property currently is occupied by open grassland and wooded area. The southern end of the subject property was formerly used as a grass airstrip, but is now used for soccer fields. The approximate property boundary and site features are shown on **Figure 2**. Details of historical uses of the subject property are presented in **Section 4.3** and **Section 6.0**.

### **2.4 Descriptions of Structures, Roads and Other Improvements on the Site**

The subject property runs parallel to Airwaves Rd NE. The road that provides access to a water treatment facility is 16th Ave NE. There is a dirt road connecting Airwaves Rd NE to a water tower.

### **2.5 Current Use of Adjoining Properties**

Based on information obtained from interviews and historical records, current uses of adjoining properties were identified. Currently, properties surrounding the site are residential, commercial, and municipal. A water treatment plant and a water tower are located on the parcel of land on the north side of the subject property. Water treatment ponds are located to the WSW of subject property. Lake Superior Laundry is located to the south of the subject property. Adjacent properties are shown on **Figure 2**. Details of historical uses of adjacent properties are presented in **Section 4.3** and **Section 6.0**.

## **3.0 User Provided Information**

As specified under the ASTM standard, certain responsibilities generally lie with the “user” of this ESA. The “user” is the party seeking to use Practice E1527-05 to perform an ESA of a property. The “user” may include a purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. For purposes of this Phase I ESA, the “user” is City of Pine City.

Under the ASTM standard, a questionnaire is completed by the “user” and submitted to the environmental professional conducting the ESA. The questionnaire completed by City of Pine City is included as **Appendix A**.

It is the responsibility of the “user” to verify whether any environmental liens exist with regard to the property, and provide this information to the environmental professional preparing the ESA unless specified otherwise in the contract between the “user” and SEH. The “user” must provide the environmental professional information regarding the price of

---

the property versus fair market value of the property if the property were not contaminated. The “user must provide the environmental professional commonly known or reasonably ascertainable information on the property including, but not limited to; past uses of the property; specific chemicals present or once present on the property; spills or chemical releases on the property; environmental cleanups taken place on the property. Additionally, the “user” must make the professional aware of any specialized knowledge or experience that is material to RECs in connection with the subject property and the degree of obviousness of the presence or likely presence of contamination at the property. The following information was provided by the “user” and is accepted in good faith and is assumed to be accurate and complete.

### **3.1 Title Records**

A title search was not conducted because it was beyond the scope of work for this Phase I ESA.

### **3.2 Environmental Liens or Activity and Use Limitations**

The “user” elected to have SEH provide information on environmental liens for the property. SEH retained NETR Real Estate Research & Information to provide environmental liens and activity and use limitations (AUL) records for the subject property. The information did not reveal any RECs for the subject property. A copy of the Environmental Liens and AUL review is included as **Appendix B**.

### **3.3 Specialized Knowledge**

The “user” does not have specialized knowledge or experience related to the property or nearby properties.

None of the persons interviewed as part of this Phase I ESA indicated any specialized knowledge or experience that is material to identifying RECs or HRECs in connection with the subject property or surrounding properties.

### **3.4 Commonly Known or Reasonably Ascertainable Information**

The “user” had no commonly known or reasonably ascertainable information regarding RECs or HRECs at the subject property.

### **3.5 Owner, Property Manager, and Occupant Information**

The current owner of the property is the City of Pine City. The property is currently open grassland, marshland, soccer fields, and wooded area and does not contain any occupants.

### **3.6 Reason for Performing the Phase I ESA**

It is the understanding of SEH, Inc. that City of Pine City intends to enter the subject property into the “Shovel Ready” program and is requesting a Phase I ESA as part of the process. The Phase I ESA is being performed to identify, to the extent feasible pursuant to the processes described in E 1527-05 and in a manner consistent with good commercial and customary practice, RECs and HRECs in connection with the subject property.

## **4.0 Records Review**

The records review was performed to obtain and review reasonably ascertainable records from standard sources (including government records, physical setting sources, and historical use records) to assist in identifying RECs or HRECs in connection with the subject property. SEH reviewed historical records of aerial photographs, topographic maps, city directories and Sanborn<sup>®</sup> Maps where available and deemed necessary to minimize data gaps.

---

## 4.1 Standard Environmental Record Sources

SEH retained FirstSearch Technology Corporation (FirstSearch) to perform a computer database search of documents published by Environmental Protection Agency (EPA) and the MPCA. The information searched by FirstSearch includes sites with identified or potential contamination, facilities that generate hazardous wastes and sites that contain or have contained aboveground or underground registered storage tanks (ASTs/USTs). SEH reviewed the document package provided by FirstSearch to identify potential RECs in connection with the subject or adjoining properties.

A summary of all records retrieved by the search, the minimum search distances, and the date that source information was last updated is included in the search report in **Appendix C**. The FirstSearch database report did not include a comprehensive, exhaustive review of all records. The following federal and state databases were searched in preparing the database report:

- National Priority List (NPL);
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS);
- CERCLIS No Further Remedial Action Planned (NFRAP);
- Resource Conservation and Recovery Act Corrective Action Report (RCRA COR ACT);
- Resource Conservation and Recovery Information System (RCRIS)-Treatment, Storage, and Disposal (TSD) sites;
- RCRA Large and Small Quantity Generator (RCRA GEN) sites;
- Federal Institutional Controls and Engineering Controls (FED IC/EC);
- Federal Brownfield (FED BF);
- Emergency Response Notification System (ERNS);
- Tribal Lands: MnDOT database of Indian Reservations;
- State/Tribal Sites: MPCA SUPERFUND Permanent List of Priorities (PLP) and De-listed Permanent List of Priorities (DPLP) sites;
- State Spills-1980/1990;
- Permitted Solid Waste Management Facilities (SWL);
- Leaking Underground Storage Tank (LUST) site;
- Registered Underground Storage Tank (UST) and Aboveground Storage Tank (AST) sites;
- MPCA Voluntary Investigation and Cleanup (VIC) Program;
- State Brownfields;
- State/Tribal IC: Site Remediation Section (SRS) Subset ;
- State Other: National Clandestine Laboratory Register; and
- MPCA Superfund Permanent List of Priorities (PLP) sites and de-listed Permanent List of Priorities (DPLP) sites (OTHER).

### 4.1.1 Federal ASTM Databases

The following Federal ASTM Databases identified sites during the database search.

---

#### 4.1.1.1 RCRA Generators

RCRIS contains information on hazardous waste handlers regulated by the US EPA under RCRA.

- Large quantity generators (LQGs) are facilities that generate at least 1000 kilograms/month (kg/mo) of non-acutely hazardous waste (or 1 kg/mo of acutely hazardous waste).
- Small quantity generators (SQG) are facilities that generate at least 100 kg/mo but less than 1000 kg/mo of non-acutely hazardous waste.
- Very small quantity generators (VGN), sometimes referred to as conditionally exempt small quantity generators (CEGs) are facilities that generate less than 100 kg/mo but of non-acutely hazardous waste.

One RCRA Generators was identified during the database search.

- Pine City City Of – Airwaves Rd, 1205 Airwaves RD, ID# MNR000115436 is a CEG of an unknown material. The site is a municipal land type with no listed violations.

#### 4.1.2 **State ASTM Databases**

The following State ASTM Databases identified sites during the database search.

##### 4.1.2.1 State/Tribal VCP Sites

The MPCA Voluntary Investigation and Cleanup (VIC) Program database lists properties with known or suspected environmental contamination. The VIC sites include sites or facilities, which present a substantial danger to the public health, welfare, or the environment in the State of Minnesota. These sites are identified as “VCP” in the FirstSearch database report.

- Pine City Rifle Range, 505 Airport Road NE, ID# VP16660 includes a 2.5 acre former rifle range designated as a VCP site. A Phase I, Phase II, and two field audits have been conducted at the site between 1/1/2001 and 7/9/2003. The site is not currently active.

##### 4.1.2.2 State/Tribal Brownfield Sites

The MPCA’s Voluntary Petroleum Brownfields Program (formerly VPIC) is a database of sites that have received technical assistance and liability protection to facilitate petroleum contamination investigations and cleanups, property transfers and redevelopment.

- Pine City Rifle Range, 505 Airport Road NE, ID# VP16660 is a 2.5 acre former rifle range.

##### 4.1.2.3 Underground and Aboveground Storage Tank (UST/AST) Sites

The Minnesota Underground Storage Tank (UST) list includes information on all registered USTs in the State of Minnesota. The Aboveground Storage Tank (AST) database comes from the MPCA AST File and contains registered ASTs in the State of Minnesota. FirstSearch identifies all sites listed in the UST list and AST database as UST sites.

- Westerman Bus Co, 1225 Airwaves Road NE, ID# 122572 has one active, 12,000 gallon gasoline UST. The tank was registered on 2/3/2003.

##### 4.1.2.4 Leaking Underground Storage Tank (LUST) Sites

The MPCA leaking underground storage tank (LUST) database includes information on reported sites in the State of Minnesota with leaking underground storage tanks.

- 
- Pine County Garage, County Road 55 and Route 3, ID# 2142 is a LUST site. An unknown quantity of diesel fuel was discovered on 1/3/1990. Cleanup action began on 2/7/1990 and removed 100 cubic yards of soil from the site. Groundwater became contaminated and the drinking water aquifer was impacted. Contaminated soils remain at the site.

#### 4.1.2.5 State Spill Sites

These sites are compiled from the spills reported to the MPCA and MDA. Spills listed under the MPCA Database Listing of Spills include information regarding initial cause, initial source, material spilled, and quantity. Agricultural spills reported to the MDA include distance to well, residence and the closure date.

- Lake Superior Laundry, 1335 Airways Rd NE, non-geocoded, spill ID# 73101 is a spill site with an unreported substance of an unknown quantity released on 6/23/2008. The cause and source are unknown. The spill was closed on 6/24/2008.

#### 4.1.3 **Non-Geocoded Sites**

FirstSearch database reports typically include a number of “non-geocoded sites.” FirstSearch could not specifically locate these sites due to poor address information or limitations of the US Census Bureau TIGER files. A total of one hundred twenty seven (127) additional non-geocoded sites are listed in the FirstSearch environmental database report. SEH attempted to identify non-geocoded sites located on or near the subject property based on site name, address, and available resources. The focus of this search is placed on sites that may pose the greatest potential for environmental impacts to the subject property. It is not within the scope of this Phase I ESA to conduct an exhaustive investigation to verify the locations of all non-geocoded sites.

Non-geocoded sites identified as possible RECs to the subject property are incorporated into the report. Additional information regarding the non-geocoded sites may be found in the FirstSearch report in **Appendix C**.

#### 4.1.4 **Additional Environmental Record Sources**

FirstSearch did not search additional databases beyond the standard list required by the ASTM standard.

SEH reviewed additional environmental record sources, including the MPCA “What’s In My Neighborhood” interactive mapping program, MDA County Spill Records, and the MDA “What’s in my Neighborhood” interactive mapping program. The purpose of the review was to identify non-geocoded properties and properties not identified in the FirstSearch review which are located on or within the search radius of the subject property. The additional record sources can also be used to verify information received in the FirstSearch report.

- Pine City Wastewater Treatment Plant (WWTP), 16th Avenue NE, Pine City, Minnesota 55063, ID# MN0021784 (WIMN), is located north of the subject property with approximately six treatment ponds located to the west-southwest of the subject property. The WWTP is an active discharger of wastewater and is permitted as of 02/21/2008. One notice of violation was issued on 08/17/10 and action was taken on 09/29/10. The incident was closed on 11/01/10 and no further information was provided.
- Pine City Public Works, located at 1205 Airwaves Road NE, Pine City, Minnesota 55063, ID# A00010910 is an inactive site with an industrial stormwater permit.

---

#### **4.1.5 File Search Summary**

Based on information reviewed during the Standard Environmental Records Review, the following list summarizes sites identified as potential concerns for the subject property during the database records review. A complete summary of these sites is presented in **Section 7.0 “Findings and Opinions.”**

- Pine City City Of – Airwaves Road, 1205 Airwaves Road
- Pine City Rifle Range, 505 Airport Road NE
- Westerman Bus Co, 1225 Airwaves Road NE
- Pine County Garage, County Road 55 and Route 3
- Lake Superior Laundry, 1335 Airways Road NE
- Pine City Wastewater Treatment Plant (WWTP), 16th Avenue NE
- Pine City Public Works, 1205 Airwaves Road NE

#### **4.2 Physical Setting**

SEH reviewed the physical setting of the subject property from various sources.

##### **4.2.1 Topography**

The subject property is depicted as generally flat on the United States Geological Survey (USGS) 7.5-minute “Pine City, MN Quadrangle” topographic map (USGS 1983). The map indicates that the surface elevation of the subject property is approximately 965-feet amsl and contains a municipal airport on the south part of the subject property and has an elevation of approximately 967-feet amsl. The airport was removed prior to the completion of this Phase I ESA. The western and northern portions of the subject property consist of marshland.

##### **4.2.2 Geology**

Surficial geology of the subject property consists of silty and sandy sediment deposited as shallow water lake sediment of the glacial Lake Grantsburg and ranges from approximately 100-150 feet in thickness (MGS 2001).

Mesoproterozoic age Hinckley Sandstone is the uppermost bedrock unit at the subject property. It is characterized by a tan to orange, fine- to medium- grained, well-sorted and well-rounded quartz arenite (MGS 2001).. The subject property is located between the Hinckley fault and the Douglas fault (MGS 2011). Depth-to-bedrock at the subject property varies from approximately 100-150 feet bgs (below-ground-surface) (MGS 2001).

##### **4.2.3 Hydrogeology**

The subject property is located in the Snake River Watershed. Shallow groundwater at the site is expected to flow to the east and southeast towards Snake River and Cross Lake (MGS 1974). The Hinckley Sandstone is the primary bedrock aquifer in the area. Groundwater movement in the Hinckley Sandstone aquifer at the subject property is generally to the south (MGS 1974).

In a review of wells located on the subject property using the Minnesota Department of Health (MDH) County Well Index (CWI), two wells located in the northern section of the subject property reported depth to groundwater at approximately 26-28 feet bgs. One well located on the southern section of the subject property reported depth to groundwater at approximately 7 feet bgs.

---

### 4.3 Historical Use of the Subject Property and Adjacent Properties

A historical review of the site and surrounding area was conducted to identify obvious previous uses of the subject property and surrounding area in order to help assess whether past uses may have led to RECs or HRECs in connection with the subject property. According to ASTM 1527-05 standard the uses of the property “shall be identified from the present, back to property’s first developed use, or back to 1940, whichever is earlier”. The historical review was completed by examining historic aerial photographs, topographic maps, city directories and Sanborn® Maps where available and by conducting interviews (see **Section 6.0**). Any significant temporal gaps in historical data are addressed in **Section 7.1** of this report.

#### 4.3.1 Sources

The following sources were used to compile the history of the subject property and adjacent properties presented in **Sections 4.3.2** and **4.3.3**.

##### 4.3.1.1 Aerial photographs

Reasonably ascertainable historical aerial photographs showing the subject property and surrounding areas were obtained for review from the years 1939, 1956, 1965, 1978, 1983, 1991, 2003, and 2010. Copies of the photographs reviewed are included as **Appendix D**.

Due to the scale and quality of some of the photographs, it is difficult to determine minor activities that may have occurred on the subject property.

##### 4.3.1.2 Topographic Maps

The following historical maps were obtained and reviewed:

- USGS, 1983, *Pine City, Minnesota*, 7.5 Minute Topographic Map
- USGS, 1961, *Pine City, Minnesota*, 7.5 Minute Topographic Map

Copies of topographic maps reviewed are included as **Appendix E**.

##### 4.3.1.3 Sanborn® Fire Insurance Maps

Sanborn® Fire Insurance maps consist of a uniform series of large-scale detailed maps, dating from 1867 through 1969 and depict the commercial, industrial, and residential sections of urban areas. The maps were designed to assist fire insurance agents in determining the degree of hazard associated with a particular property. Sanborn® maps illustrate, in outline form, the size, shape, construction and building material of dwellings, commercial buildings, and factories. Sanborn® Fire Insurance maps were not available for the project. The fire insurance map report is available in **Appendix F**.

##### 4.3.1.4 City Directories

City directories provide a means to investigate the past use of a site by reviewing information for a specific address in incorporated areas. City directories were obtained for the subject property. City directories were reviewed and no significant information was noted. Copies of city directories are included as **Appendix G**.

#### 4.3.2 History of the Subject Property

The following history of the site was compiled from information contained in the resources listed in **Section 4.3.1** of this report.

---

The subject property first appears as farmland in the 1939 historic aerial photo. The site remains undeveloped until the 1965 historic aerial photo depicting a grass airstrip, running north-south, on the southern part of the subject property. The remaining portion of the subject property transitions from farmland to undeveloped grassland and wooded areas.

The airstrip appears to be abandoned by 2003, but the footprint is still visible through 2010. The 2010 historic aerial photo shows the appearance of 16th Avenue NE with a cul-de-sac at the west end of the road. The western portion of the subject property has remained open grassland and wooded area throughout the history of the site.

#### **4.3.3 History of Adjacent Properties**

The following history of the surrounding properties was compiled from information contained in the resources listed in **Section 4.3.1** of this report.

The surrounding properties appear as farmland with scattered groves of trees in the 1939 historical aerial photograph. The surrounding properties remain undeveloped until water treatment ponds are visible in 1965 to the southwest of the subject property. Construction of residential housing along the shore of Cross Lake occurred by 1965. Other surrounding properties remained undeveloped.

In the 1978 aerial photograph, residential buildings appear at the corner of Wild Rose Drive and Airwaves Rd NE and also to the north of the subject property. Residential properties continue to be constructed to the east and north of the subject property along Airwaves Rd NE in the 2003 aerial photograph. Also by 2003, a facility constructed at the intersection of Airwaves Rd NE and Dusty Rd NE. Housing continued to be constructed around the subject property through 2010, in addition to Lake Superior Laundry, located at the south end of the subject property along Airwaves Rd NE. A water treatment facility and a water tower located to the north of the subject property were also constructed by 2010.

### **5.0 Site Reconnaissance**

SEH conducted a site reconnaissance of the subject property and surrounding properties on November 30, 2012. Select photographs of the site are included in **Appendix H**.

#### **5.1 Methodology and Limiting Conditions**

The site reconnaissance included a site visit to observe the subject property to the extent not obstructed by bodies of water, buildings, heavy vegetation, stored materials, or other obstacles.

The walkable perimeter of the subject property was navigated and several passes through the interior of the subject property were made to observe suspect areas covered by snow.

Thick vegetation obstructed observations of some of the northern and western parts of the subject property. Observations of stressed vegetation were limited as the vegetation was dormant due to dormant vegetation and snow cover.

#### **5.2 General Site Reconnaissance Information**

SEH made the following general site reconnaissance observations.

##### **5.2.1 Current Uses of the Subject Property**

The southern portion of the subject property, adjacent to Airwaves Road NE, is currently used as soccer fields. Approximately 10 soccer nets were observed on the fields. The

---

remaining portions of the subject property are open grassland, marshland, and wooded areas. 16<sup>th</sup> Avenue NE runs east-west through the middle of the subject property.

### **5.2.2 Current Uses of Adjacent Properties**

Properties surrounding the subject property appear to be residential, commercial, and municipal. One house is present to the north of the subject property. A water treatment facility and a water tower are located to the north of the subject property. Several houses along the east side of Airwaves Road NE are adjacent on the east side of the subject property. Lake Superior Laundry is located on the property to the south of the subject property. Marshland dominates the western portion of the subject property. Water treatment ponds are located to the west-southwest of the subject property.

### **5.2.3 Geologic, Hydrogeologic, Hydrologic and Topographic Conditions**

The topography of the subject property and surrounding areas is relatively flat. A ditch is located along Airwaves Road on the subject property, running north-south along the road. A ditch running north-south, starting on the north side of 16 Avenue NE runs to a stormwater retention pond on the north part of the subject property.

### **5.2.4 General Description of Structures**

Three small sheds are located on the soccer fields on the south side of the subject property. One shed, in the middle of the soccer fields, was used as an information kiosk for soccer games as indicated by a sign in the window. The sheds did not appear to have any water or electrical fixtures. The interior of the sheds was not observed.

### **5.2.5 Roads**

16th Avenue NE runs east-west through the middle of the subject property and has a cul-de-sac at the west end of the road. Airwaves Road NE runs north-south and adjacent to the eastern edge of the subject property. The intersection of Airwaves Road NE and Wild Rose Drive is located adjacent to the southeastern edge of the subject property. A dirt road runs east-west from Airwaves Road NE to another dirt access road to the water tower.

### **5.2.6 Potable Water Supply**

Seven fire hydrants were located along Airwaves Road NE and 16th Avenue NE on the subject property.

### **5.2.7 Sewage Disposal System**

There is no evidence of a sewage disposal system on the subject property as there are no structures on the subject property that produce sewage.

### **5.2.8 Storage Tanks**

No USTs were observed at the time of site reconnaissance.

No ASTs were observed at the time of site reconnaissance.

### **5.2.9 Odors**

An apparent chlorine odor was evident when on the subject property and in close proximity to the water treatment facility.

### **5.2.10 Pools of Liquid**

There were no suspicious pools of liquid observed on the subject property or adjacent properties.

---

### **5.2.11 Drums, Totes and other Containers**

No drums, totes or other containers were observed on the subject property.

### **5.2.12 Hazardous Substances and Petroleum Products in Connection with Identified Uses**

No petroleum products or hazardous substances were observed on the subject property or adjacent properties.

### **5.2.13 Unidentified Substance Containers**

No unidentified substance containers were observed on or adjacent to the subject property at the time of site reconnaissance.

### **5.2.14 Polychlorinated Biphenyls (PCBs)**

No transformers were observed on the subject property.

## **5.3 Exterior Observations**

SEH made the following exterior observations during the site reconnaissance.

### **5.3.1 Pits, Ponds or Lagoons**

Man made ponds are located on the subject property to the east and west of the water treatment facility and also to the west of the water tower. Ponds appear to be used for collection of storm water.

### **5.3.2 Stained Soil or Pavement**

No significant areas of stained soil or pavement were observed on the subject property at the time of site reconnaissance.

### **5.3.3 Stressed Vegetation**

Due to winter climate at the time of site reconnaissance, vegetation was dormant and observations for stressed vegetation could not be made. Observations of the ground surface were obstructed by snow cover.

### **5.3.4 Solid Waste**

Two piles of rubbish were identified on the subject property. The first pile is located approximately 100 feet south of 16th Avenue NE and approximately 500 feet from the intersection of Airwaves Road NE and 16th Avenue northeast. This pile consists of rusty, twisted metal that appeared to be an old cooking grill. The second pile of rubbish is located approximately 200 feet to the south of the cul-de-sac on 16th Avenue NE. The pile consists of burnt wood that appeared to be a collection of small ladders and logs. Photographs of the rubbish can be found in **Appendix H**.

Three piles of concrete slabs and curb pieces were located in separate locations south of 16th Avenue NE, approximately 50-200 feet from the road. The first pile was located near the twisted metal described in the previous paragraph. The second and third piles were located near the burnt wood. A majority of the visible concrete were protruding from mounds of brush and dirt that appeared to have been pushed together. Photographs of the concrete can be found in **Appendix H**.

Several solid waste receptacles were located on the soccer fields on the southern end of the subject property.

---

### 5.3.5 Waste Water

There are no structures on the subject property that produce waste water.

### 5.3.6 Wells

One well was observed at the southeastern edge of the subject property. According to MDH CWI, well ID# 749822 is Pine City MW-4 and is used as a monitoring well. The well is approximately 967-feet amsl and is 16-feet deep. A static water level of 7-feet from land surface was measured on 12/14/2006.

### 5.3.7 Septic Systems

There was no evidence of septic systems on the subject property.

## 6.0 Interviews

Interviews were conducted with persons familiar with the subject property to obtain information regarding the presence or possible presence of RECs or HRECs in connection with the subject property.

### 6.1 Interview with current Owner/Occupant(s)/Site Manager

An interview with Nathan Johnson, City Planner for the City of Pine City, was conducted on December 7, 2012. Mr. Johnson indicated that the property contained a part of a grass runway for a municipal airport. The grass runway has since turned into soccer fields. No buildings have existed on the site. Mr. Johnson indicated that the property was recently subdivided to exclude the lagoon system and the City's water treatment and tower.

When asked about the concrete pilings and rubbish located south of 16<sup>th</sup> Avenue NE, Mr. Johnson explained that the concrete had originated from a street/sidewalk project completed in 1991. He also speculated that some of the rubbish may have been from a county garage that burned down.

Mr. Johnson explained that the soccer field is mowed regularly for field use. To Mr. Johnson's knowledge, there are no tanks located on the property. There are no environmental issues associated with neighboring properties.

### 6.2 Interview with past Owner(s)/Occupant(s)/Site Manager(s)

Interviews of past owners, occupants, or site managers were not conducted as no contact information was available upon the completion of the Phase I ESA.

### 6.3 Interview with Local Government Officials

Since the City of Pine City is the owner of the subject property, interviews with local government officials were conducted in **Section 6.1** of the report.

### 6.4 Interview with Others

No one else was interviewed during the completion of this Phase I ESA.

## 7.0 Findings and Opinions

SEH has completed this Phase I ESA, and based on the information presented above, the following known or suspected RECs, HRECs, or *de minimis* conditions were identified for the subject property.

- Lake Superior Laundry, 1335 Airways Rd NE, spill ID# 73101 had a release of an unreported substance of an unknown quantity on 6/23/2008. The cause and source of the

---

spill are unknown. The spill was closed on 6/24/2008. Local groundwater is expected to flow to the east. The site was confirmed, during the site visit, to be the building adjacent to the southern edge of the subject property. Considering the unknown information about the spill and its adjacency to the subject property, this site is considered a **REC**.

- Two piles of rubbish were identified on the subject property. The first pile is located approximately 500 feet west of the intersection of Airwaves Road NE and 16<sup>th</sup> Avenue northeast. This pile consists of rusty, twisted metal that appeared to be an old cooking grill. The second pile of rubbish is located approximately 200 feet to the south of the cul-de-sac on 16<sup>th</sup> Avenue NE. The pile consists of burnt wood that appeared to be a collection of small ladders and logs. Three piles of concrete slabs and curb pieces were located in separate locations south of 16<sup>th</sup> Avenue NE, approximately 50-200 feet from the road. A majority of the visible concrete was protruding from mounds of brush and dirt. The source for the rubbish and concrete were identified as being from a 1991 road construction project. This site is considered a *de minimis* condition for the subject property.
- Pine City Wastewater Treatment Plant (WWTP), 16<sup>th</sup> Ave NE, Pine City, Minnesota 55063, ID# MN0021784 (WIMN), is located north of the subject property with approximately six treatment ponds located to the WSW of the subject property. The treatment plant and the ponds are both adjacent to subject property. The WWTP is an active discharger of wastewater and is permitted as of 02/21/2008. One notice of violation was issued on 08/17/10 and action was taken on 09/29/10. The incident was closed on 11/01/10 and no further information was provided. Local groundwater from the site is expected to flow to the east. This site is not a REC for the subject property
- Pine City, City Of – Airwaves Rd, 1205 Airwaves RD, ID# MNR000115436 is a conditionally exempt small quantity generator (CEG) of an unknown material with no listed violations. This site was confirmed to be the City of Pine City Public Works building during the site visit and is located approximately .25 miles south of the subject property. This site is not considered a REC for the subject property.
- Pine City Rifle Range, 505 Airport Road NE, 0.40 miles SW, ID# VP16660 is a 2.5 acre former rifle range designated as a VCP site and a brownfield site. A Phase I, Phase II, and two field audits have been conducted at the site between 1/1/2001 and 7/9/2003. The site is not currently active. Shallow groundwater from this site is expected to flow to the east. Considering groundwater flow is cross-gradient from the subject property and the rifle range is .40 miles SW of the subject property, this site is not considered a REC for the subject property.
- Westerman Bus Co, 1225 Airwaves Road NE, ID# 122572 has an active, 12,000 gallon gasoline UST. The tank was registered on 2/3/2003 and has no reported releases. The site is located approximately 1000 feet from the southern edge of the subject property. The bus company is expected to be cross-gradient to the subject property. This site is not considered a REC for the subject property.
- Pine County Garage, County Road 55 and Route 3, 0.40 miles SW, ID# 2142 is a LUST site with an unknown quantity of diesel fuel, discovered on 1/3/1990. Cleanup action began on 2/7/1990 and removed 100 cubic yards of soil from the site. Groundwater became contaminated and the drinking water aquifer was impacted. Contaminated soils remain at the site. Local groundwater is expected to flow to the east. The site is expected to be cross-gradient to the subject property and is not considered a REC.

---

## 7.1 Significant Data Gaps

The following data gaps were identified in completion of the ESA. The significance of the data gaps has been evaluated by the environmental professional as follows:

Historical aerial photos were not available from between 1940-1955, 1957-1964, 1966-1977, 1984-1990, and 1992-2002. Considering the subject property has consistently been used as a grass air strip and soccer fields, these data gaps are not considered significant to the findings and conclusions of the Phase I ESA.

Interviews with past owners, occupants, or site managers were not available as no contact information was available. Considering the subject property has consistently been used as a grass air strip and soccer fields, this is not considered significant to the findings and conclusions of the Phase I ESA.

---

## 8.0 Conclusions

SEH has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E 1527-05 of the subject property. Any exceptions to, or deletions or deviations from, this practice are described in **Sections 1.4** and **10.0** of this report. This Phase I ESA has identified the following HRECs or RECs in connection with the subject property:

- Spill of unknown quantity and substance located at Lake Superior Laundry adjacent to the southern edge of the subject property. A file summary of spills for Lake Superior Laundry is recommended to determine details about this incident.

## 9.0 Deviations

Other than the limitations and exceptions listed in **Section 1.4** and **Section 10.0**, there were no substantial deletions, deviations, or additions from this practice.

## 10.0 Limitations and Standard of Care

This ESA was completed in general accordance with ASTM E 1527-05, *Standard Practice for Environmental Assessments* and SEH's agreement with City of Pine City. The findings and conclusions of this report are not scientific certainties, but probabilities based on professional judgment regarding the significance and accuracy of the collected data. When reasonably ascertainable, environmental data was obtained and reviewed. However, the accuracy of the sources and collected data is not the responsibility of SEH.

When a Phase I ESA is completed without subsurface exploration or chemical analyses of the soil and/or groundwater at the site, no statement of scientific certainty can be made regarding the environmental or subsurface conditions resulting from either onsite or offsite pollutant sources. The possibility always exists for contaminants to migrate from one property to another via surface water, groundwater or soil. The ability to accurately assess the environmental risk associated with the transport of pollutants through these media to the site is beyond the scope of this Phase I ESA.

This Phase I ESA report was prepared for the exclusive use of City of Pine City. The negotiated scope of work imposed limitations on the collection and interpretation of evidence, consistent with the ASTM Standard, resulting in a commensurate uncertainty as to the conclusions drawn. The degree of uncertainty was deemed acceptable by City of Pine City. Any third party interested in using or relying upon this report must first secure written authorization from City of Pine City and SEH, and agree to accept SEH's terms and conditions respecting indemnification and agreed upon limitations of liability.

SEH's services were conducted in a manner consistent with the level of care and skill standard to the industry. The conclusions and recommendations contained in this report were arrived at in accordance with generally accepted professional practice at this time and location. Other than this, no warranty is implied or intended.

**12.0 Signature(s) of Environmental Professional(s)**

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in §312.10 of 40 CFR 312 (**Appendix I**).

I have the specific qualification based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in §312.10 of 40 CFR 312.

A handwritten signature in black ink, appearing to read "Allen H. Sunderman", written over a horizontal line.

User Questionnaire

This Page Left Blank Intentionally

## User Questionnaire for

In order to qualify for one of the *Landowner Liability Protections* (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

(1.) **Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).**

Are you aware of any environmental cleanup liens against the *property* that are filled or recorded under federal, tribal, state, or local law?

No.

(2.) **Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).**

Are you aware of any AULs such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

No.

(3.) **Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**

As the *user* of this ESA do you have any specialized knowledge of experience related to the property or nearby properties? For example, are involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No.

(4.) **Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).**

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

N/A — Not being purchased/sold.

(5.) **Commonly known or reasonably ascertainable information about the property (40CFR 312.30).**

Are you aware of commonly known or reasonably ascertainable information about the property that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,

(a) Do you know of any past uses of the *property*? *airport.*

(b) Do you know of specific chemicals that were present or once were present at the *property*? *No.*

(c) Do you know of any spills or chemical releases that have taken place at the *property*? *No.*

(d) Do you know of any environmental cleanups that have taken place at the *property*? *No.*

(6.) **The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**

As the *user* of this ESA, based on your knowledge and experience related to the property are there any *obvious* indications that point to the presence or likely presence of contamination at this property?

No.

### User Questionnaire for

Please answer these additional questions if applicable.

(7.) Reason Phase I is required: *To get "Shovel Ready" Certification*

(8.) Type of property and type of property transaction: *Industrial*

(9.) Complete and correct address for the *property*: *XXXX Airwaves Road XXXX 16<sup>th</sup> Ave NE*

(10.) Identify all parties, or "users," who will rely on the Phase I ESA Report: *City of Pine City, DEED, State of Minnesota, Certifiers, prospective buyers.*

(11.) Name and contact information for the **site contact**:  
*Nathan Johnson, 315 Main St S #100, Pine City, MN 55063*

(12.) Name and contact information for **current** owner/occupant/manager of the *property*:  
*same c/o City of Pine City*

(13.) Name and contact information for **past** owners/occupants/managers of the *property*:

# ENVIRONMENTAL LIEN REPORT

The NETR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied property information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' office, registries of deed, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved and description); and
- provide a copy of the deed or cite documents reviewed;

**Thank you for your business**

Please contact NETR at 480-967-6752  
with any questions or comments

#### Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

#### Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

The Native American Consultation Database (NACD) is a tool for identifying consultation contacts for Indian tribes, Alaska Native villages and corporations, and Native Hawaiian organizations. The database is not a comprehensive source of information, but it does provide a starting point for the consultation process by identifying tribal leaders and NAGPRA contacts. This database can be accessed online at the following web address <http://home.nps.gov/nacd/>

## Environmental FirstSearch Descriptions

**NPL: EPA NATIONAL PRIORITY LIST** - The National Priorities List is a list of the worst hazardous waste sites that have been identified by Superfund. Sites are only put on the list after they have been scored using the Hazard Ranking System (HRS), and have been subjected to public comment. Any site on the NPL is eligible for cleanup using Superfund Trust money.

A Superfund site is any land in the United States that has been contaminated by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

FINAL - Currently on the Final NPL

PROPOSED - Proposed for NPL

**NPL DELISTED: EPA NATIONAL PRIORITY LIST Subset** - Database of delisted NPL sites. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

DELISTED - Deleted from the Final NPL

**CERCLIS: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)**- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

PART OF NPL- Site is part of NPL site

DELETED - Deleted from the Final NPL

FINAL - Currently on the Final NPL

NOT PROPOSED - Not on the NPL

NOT VALID - Not Valid Site or Incident

PROPOSED - Proposed for NPL

REMOVED - Removed from Proposed NPL

SCAN PLAN - Pre-proposal Site

WITHDRAWN - Withdrawn

**NFRAP: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM ARCHIVED SITES** - database of Archive designated CERCLA sites that, to the best of EPA's knowledge, assessment has been completed and has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

NFRAP – No Further Remedial Action Plan

P - Site is part of NPL site

D - Deleted from the Final NPL

F - Currently on the Final NPL

N - Not on the NPL

O - Not Valid Site or Incident

P - Proposed for NPL

R - Removed from Proposed NPL

S - Pre-proposal Site

W – Withdrawn

**RCRA COR ACT: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES** - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD: EPA** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN: EPA/MA DEP/CT DEP** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that generate or transport hazardous waste or meet other RCRA requirements.

LGN - Large Quantity Generators

SGN - Small Quantity Generators

VGN – Conditionally Exempt Generator.

Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.

CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.

MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.

VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.

SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.

LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

**ERNS: EPA/NRC** EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**Tribal Lands: MN/DOT** INDIAN RESERVATIONS - database of Indian Reservations within the state of Minnesota.

**Tribal Lands: MN/DOT** INDIAN RESERVATIONS - database of Indian Reservations within the state of Minnesota.

**Tribal Lands: DOI/BIA** INDIAN LANDS OF THE UNITED STATES - Database of areas with boundaries established by treaty, statute, and (or) executive or court order, recognized by the Federal Government as territory in which American Indian tribes have primary governmental authority. The Indian Lands of the United States map layer shows areas of 640 acres or more, administered by the Bureau of Indian Affairs. Included are Federally-administered lands within a reservation which may or may not be considered part of the reservation.

BUREAU OF INDIAN AFFIARS CONTACT - Regional contact information for the Bureau of Indian Affairs offices.

**State/Tribal Sites: MN PCA** SUPERFUND PERMANENT LIST OF PRIORITIES (PLP) AND DE-LISTED PERMANENT LIST OF PRIORITIES (DPLP) SITES - database of state equivalent CERCLIS/SUPERFUND sites.

**State Spills 90:** *MN PCA/MN DOA* DATABASE LISTING OF SPILLS - database of spills reported to the Minnesota Pollution Control Agency. The data includes information regarding initial cause, initial source, material spilled, and quantity. AGRICULTURAL SPILLS - database of spills reported to the Minnesota Department of Agriculture. The data includes distance to well, residence and date closed.

**State/Tribal SWL:** *MN PCA* PERMITTED SOLID WASTE DISPOSAL FACILITIES LISTING - database of permitted solid waste landfill facilities.

CLOSED LANDFILL SITES(CLP) - database of closed municipal waste landfills that were formerly permitted by the state.

UNPERMITTED DUMP SITES - database contains dumpsites for the entire state. Included in the list are abandoned dumps, demolition sites, tree disposal sites, industrial dumps and other dumps. Most of these sites existed prior to the creation of the MPCA in 1967, and detailed information about them is not generally available.

**State/Tribal LUST:** *MN PCA* DATABASE LISTING OF UNDERGROUND STORAGE TANKS SUBSET - database of sites that have a program interest type of LS. The data includes piping, tank construction, type of tank, contact and owner information.

**State/Tribal UST/AST:** *MN PCA* DATABASE LISTING OF UNDERGROUND STORAGE TANKS - database of underground storage tanks registered with the Minnesota Pollution Control Agency. The data includes piping, tank construction, type of tank, contact and owner information.

**State/Tribal IC:** *MN PCA* SITE REMEDIATION SECTION (SRS) SUBSET- database that contains summary information about the nature of contamination found at several types of clean up sites that have institutional controls, restrictive covenants and deed notices throughout the state.

**State/Tribal VCP:** *MN PCA/MN DOA* VOLUNTARY INVESTIGATION AND CLEANUP PROGRAM DATABASE (VIC) - database of properties both known or suspected of environmental contamination. Data includes institutional control information.n/

**State/Tribal Brownfields:** *MPCA* VOLUNTARY PETROLEUM BROWNFIELD PROGRAM (formerly VPIC) – database of sites that have received technical assistance and liability protection to facilitate petroleum contamination investigations and cleanups, property transfers and redevelopment.

**RADON:** *NTIS* NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

**DOCKET:** *EPA* INTERGRATED COMPLIANCE INFORMATION SYSTEM (ICIS) - database of federal administrative and federal judicial cases under the following environmental statutes: the Clean Air Act (CAA), the Clean Water Act (CWA), the Resource Conservation and Recovery Act (RCRA), the Emergency Planning and Community Right-to-Know Act (EPCRA) Section 313, the Toxic Substances Control Act (TSCA), the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund), the Safe Drinking Water Act (SDWA), and the Marine Protection, Research, and Sanctuaries Act (MPRSA).

**Federal Other:** *EPA* SECTION SEVEN TRACKING SYSTEM (SSTS) – database of registration and production data for facilities which manufacture pesticides.

VAPOR INTRUSION DATABASE – database that records the migration of volatile chemicals from the subsurface into overlying buildings. Volatile chemicals in contaminated soil or groundwater can emit vapors that may migrate through soil and into indoor air spaces.

**FI Map Coverage:** *PROPRIETARY* FIRE INSURANCE MAP AVAILABILITY - Database of historical fire insurance map availability.

**Meth Labs:** *US DOJ* NATIONAL CLANDESTINE LABORATORY REGISTER - Database of addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the U.S. Department of Justice ("the Department"), and the Department has not verified the entry and does not guarantee its accuracy. All sites that are included in this data set will have an id that starts with NCLR.

Qualifications of the Environmental Professional

This Page Left Blank Intentionally

## Allen H. Sunderman, PG Principal/Senior Hydrogeologist

### General Background

Principal/Hydrogeologist responsible for soil, sediment, and groundwater contamination investigations, remediation, hydrogeologic studies, groundwater monitoring, sampling and analysis, soil and subsurface exploration. Wellhead protection plans, groundwater modeling, brownfields, risk assessment. Experienced in soil and groundwater remediation, site assessments, and environmental audits.

### Experience

**Phase I and II Environmental Assessment (EA) – Dakota County, Minnesota.** Al was the project manager for the Phase I and II EA of a former dump site located in Inver Grove Heights, Minnesota. The site was a 22-acre uncontrolled dump site. The project included difficult topography and redistribution of waste from a road construction project through the center of the site. Several investigative techniques were utilized including rotosonic drilling, geophysics, geoprobe borings and geographic based data management. This project was completed within the MPCA VIC Program.

**Sunnyridge Lane – Golden Valley, Minnesota.** Project Manager for investigation and remediation of hazardous level lead contamination. Cracked battery casings were discovered during the reconstruction of Sunnyridge Lane. Project included the preparation and implementation of a Phase II work plan, bench scale testing, and two Response Action Plans. SEH worked with City staff in preparing grant applications and successfully obtaining three Environmental Response Fund (ERF) grants for nearly \$100,000.

**Phase I Environmental Site Assessments – Volunteers of America, Sioux Falls, South Dakota.** Served as Project Manager for Phase I Environmental Site Assessments (ESAs) that were conducted for four separate residential development areas. The ESAs included site reconnaissance, records review, map reviews, historical property use research, interviews and a thorough evaluation and report, and all were successfully completed in a very limited time frame.

**Albert Lea, Minnesota.** Lead Hydrogeologist for brownfield investigation of large abandoned industrial facility. Investigation included assessment of more than 50 potential environmental conditions including dry cleaning facilities, petroleum storage, hazardous waste storage, solvent disposal, and former dumpsite.

**Mn/DOT – St. Paul, Minnesota.** Al was the Project Manager for a comprehensive camp coldwater groundwater evaluation. Project included assessment of construction and dewatering impacts to a historic protected spring. Project involved installation, monitoring and sampling of several wells, piezometers seeps and springs, extensive geophysics, geologic interpretation, and fracture trace analysis pumping tests.

### Education

*Bachelor of Science, Geology  
University of Minnesota  
Duluth (1981)*

*Post Graduate Study,  
Hydrogeology  
University of Minnesota (1985)*

*MODFLOW 3-D Groundwater  
Modeling, NGWA (1992)*

*Ground Water Geochemistry,  
NGWA (1993)*

*Remediation of NAPL's in  
Groundwater NGWA (1994)*

*Remediation of Chlorinated  
Compounds NGWA (1998)*

### Professional Registrations/ Certification

*Professional Geologist in  
Minnesota, Wisconsin and  
Indiana*

*Professional Geologist - AIPG*

*OSHA 40-Hour Hazardous  
Waste, Certified and Supervisor  
Certification*

### Professional Associations

*Association of Ground Water  
Scientists and Engineers  
(AGWSE)*

*National Ground Water  
Association (NGWA)*

*Minnesota Ground Water  
Association (MGWA)*

*American Institute of  
Professional Geologists (AIPG)*

*Minnesota Chapter AIPG  
National Brownfield Association*
