The Spectacle
-Dare to stand out

March 2019

Just for Fun

“It feels great to reach a personal goal, and it’s also nice when someone else recognizes your accomplishment. Motivation is key to achievement of any kind. Here are some contests and activities that could be motivating, fun and potentially lucrative!” http://www.adlit.org/fun/

Upcoming and Ongoing

Mentoring Day

Mentoring Day is an opportunity for families and students to plan for the future. Get information about careers, employment skills, money management, post-secondary education, self-advocacy, and more. This event will be held on March 11 at Fund du Lac Tribal and Community College in Cloquet, MN. For more information go to https://www.nlsec.org/interagency/mentoringday

Career Expo April 27, 2019

We are excited to share more details with you about SSB’s Career Expo for high school and college students who are blind, low vision, or DeafBlind. The event will take place on Saturday, April 27 at Minnesota Department of Education, Conference Center B. The Expo opens at 10:00. For students with a combined hearing and vision loss, the Expo will open at 9:00 a.m. This event is free and registration is open! You can register at https://goo.gl/forms/xg5VMOWcO3xYYBc82

Throughout the Expo:

- Connect with adults with a vision loss from a variety of professions and careers.
- Hear from college representatives about what college is like.
- Learn why diversity matters from an employer’s point of view.
- Share and learn about assistive technology.
- Sign up for individual informational and/or mock interviews.

Please direct any questions to Sheila.koenig@state.mn.us

Summer Opportunities
It is so refreshing to dream about summer while the snow flies outside! At the end of this newsletter, you will find two lists of summer opportunities. The first list (I) details group programs where students can build their adaptive skills like using computers, orientation & mobility, and independent living. The second list (II) details programs that offer summer internship opportunities.

**Blind & Socially Savvy**

“Blind & Socially Savvy” is a training offered through the International School of Protocol. It focuses on training students with a vision loss in “soft skills” like professional image, nonverbal communication, networking, and employer expectations. Often people learn such soft skills by observing others, but people who are blind or low vision do not have visual access to learning these skills. “Blind & Socially Savvy” weaves the principals and strategies used in International School of Protocol workshops for corporate executives, government officials, and professional athletes into workshops designed specifically for students with a vision loss.

“Blind & Socially Savvy” is coming to Minnesota!

- First two days of Summer Transition Program June 9-24, 2019.
- Duluth Center for Vision Loss beginning week of July 20, 2019.

Email sheila.koenig@state.mn.us with questions or to register. There is no fee for these programs. Space is limited to enhance individual coaching opportunities.

**Midwest Transition Institute for Students Who are DeafBlind**

The Minnesota DeafBlind Project will be hosting this regional event at Bethel University in St. Paul on June 23-26, 2019. The theme is: Minnesota…Land of 10,000 Opportunities, Ya Sure You Betcha! This is a great way for students and families to connect and plan for the future. Please e-mail cathy.lyle@metroecsu.org for more information.

**SSB’s Communication Center, Minnesota’s Accessible Reading Source**

The Communication Center is here to put your books into accessible formats that work for you. Custom audio, e-text, DAISY markup, human voice—we can do it! Just give us a call 651-539-1422. We also work with school districts to provide Braille for students in K-12 programs.

**PACER News**

Pacer Center is an invaluable resource for parents and educators. They offer a variety of workshops and webinars on topics like school avoidance, assistive technology, housing, and employment pathways. Visit https://www.pacer.org/workshops/ to see a list of upcoming opportunities.

**Podcasts**

Check out our latest podcasts:

Learn about Tactile Maps, Braille Greeting Cards, and the Wonderful Services from Tactile Vision Graphics.

Choosing the Right Tools for Success - Meet Jesse Anderson, Assistive Technology Specialist and Accessible Game Advocate
I currently work as a lead accessibility consultant for Target. My job includes working with multiple teams to make sure everything we put on target.com is accessible with assistive technologies people might be using to access our site. A majority of my job is collaborating with user experience designers; they design how features on our site will look and how they should function. I talk to the designers about what they need to think about or include in their designs to make sure what we are building will be accessible and usable for everyone. I also talk with engineers to make sure the way they are building new website features will work properly with different assistive technologies such as screen readers, switch devices, keyboards, screen magnifiers, etc. I also play a large role in testing the website to verify everything is working properly with assistive technologies, and I log issues when problems are found and make sure they are fixed quickly.

Some of my past jobs have included running a post-secondary program at the Texas School for the Blind, being a vocational rehabilitation counselor for the state of Hawaii serving blind and visually impaired clients, and my very first job was working in a Nebraska state park called Ashfall Fossil Beds where I gave tours of the state park and answered questions from visitors.

When I’m not working, my hobbies include cooking, spending time with friends, and triathlon. I’ve been competing in triathlon races consistently for three years, and have done all distances of racing from sprint triathlons to a full 140.6 mile Ironman. I love seeing how far I can push myself through the sport of triathlon and I’ve met a wonderful community of triathletes and guides who I am blessed to call my friends.

In terms of computer work I am a screen reader user, so I can do most of the testing using the screen reader. For testing visual aspects of the site the key for me is creating relationships with coworkers. I can have a coworker test visual aspects of an experience for me, and I can in turn do screen reader testing for them. I also form partnerships with user experience designers and engineers. I can meet with designers and ask questions about their designs to make sure I understand the experience. Through asking those questions, they also learn the things I am looking for to make an experience accessible. Being open with engineers means they can feel free to ask me questions about the best way to develop a feature to make sure the end product will work well with assistive technologies. Relationships are a key part of gaining trust and a good working relationship with people. Also, having skills you can trade with other coworkers so that you are not the person always asking for help, but the asking for and giving help becomes a two-way street has been very helpful for me.

As often as possible, advocate for yourself and take responsibility for your education or work experiences. Once you get out into the job market, it will be up to you to know what types of accommodations or technologies you will need to be most successful. Employers won’t know what
you need, so you have to have a plan for yourself and you need to work on being able to ask for those things.

Relationship building is also key. It’s often said that it isn’t what you know, but it’s who you know that matters. I’ve found that to be very true in my employment journey. Each of the jobs I've had after college have come to me through a connection I had made with a person somewhere along the way. Your academics and other skills can get you the job, but often in order to learn about the job you have to have a connection; so try to make as many connections with professionals or other blind people if possible, in the field you are interested in pursuing.

**Tech Tidbit**

It’s the season for assistive technology conferences!

The Assistive Technology Industry Association (ATIA) conference took place in late January, and had a few announcements. A good place to find a recap and audio interviews for ATIA and other blindness and technology events is [www.blindbargains.com](http://www.blindbargains.com)

The annual CSUN technology conference is coming up in mid-March. Be sure to check out news and product announcements at Blind Bargains podcasts.

The area of game accessibility is becoming more interesting. SSB’s Assistive Technologist Jesse Anderson will be presenting at the Game Accessibility Conference as part of a panel on game and virtual reality accessibility for blind and low vision users. More information about the one-day conference can be found at [www.gaconf.com](http://www.gaconf.com)

**Building BRIDGEs**

As students navigate the world of high school and begin thinking about the future, we offer services and resources that provide a foundation for success. Each of the core areas of our BRIDGE framework highlights an essential component that teenagers need in order to succeed after high school:

- Basic Skills
- Role Models
- Initiative
- Discovery
- Goal Setting
- Experiences

In this same framework, we offer resources for parents and educators.

“Teaching Keyboarding: More Than Just Typing” from Education World emphasizes the importance for keyboard instruction. It’s a skill that all students need in order to be efficient in college and the workplace. Often keyboarding is offered as a business elective in high schools, which is the ideal
place for students to learn and practice this skill. Many technical colleges in Minnesota have keyboarding classes, and there are additional online resources, too.

As a recent 60 Minutes episode shows, there are alternative ways to accomplish dreams when a person loses sight. "Architect Goes Blind, Says He's Actually Better at His Job" is a good example of how thinking outside of the box can lead to unexpected results.

In this Forbes article, we see the important skills that teens can learn from finding and pursuing their own summer opportunities. They learn through the process of finding the opportunity, in addition to the job itself.

Depending on where you live, personal finance for teens may or may not be a part of a teenager’s learning curriculum before leaving high school. The article “A Guide to Personal Finance for Teens” can be a starting point for conversations about money and general financial literacy.

In “The Art of Decision-making,” the authors talk about the important difference between goals and aspirations, and why both are necessary.

It’s time to start dreaming of summer! Summer work experience is a great way to build your resume, grow your skills, and learn about the world of work. Summer is also a great time to focus on building skills, confidence, and abilities. Check out our list of organizations that offer work opportunities for students (including internships) or our list of programs offering training in independent living and job readiness for students who are blind, low vision, or DeafBlind. Find something fun, challenging, interesting, or rewarding to do this summer!

Looking Ahead in High School

Thinking about what comes after high school is an important skill. The links below offer steps to take to prepare and plan for life after graduation. You can find the timelines below on SSB’s “For Teens,” “school, job, and life skills” tab.

Freshman Timeline
Sophomore Timeline
Junior Timeline
Senior Timeline

Ideas?

We are always looking for ideas you’d like to see featured in this newsletter. Please email Sheila.Koenig@state.mn.us with any suggestions or brainstorms. 😊

2019 Summer Program Opportunities for Teens

I. Learning skills related to blindness, low vision, and DeafBlindness
The summer programs listed below offer training in independent living and job readiness skills. They are of varying lengths during the summer. The information about each program comes directly from their website. Contact your student’s SSB counselor to connect with these programs.

**BLIND Incorporated (Blindness: Learning in New Dimensions)** offers an 8-week Post-Secondary, Readiness, Empowerment Program (PREP) designed to prepare students for academic, employment, and social success. The PREP curriculum is designed to empower blind youth with the alternative techniques of blindness they will need to be successful in the college and the career fields they choose, and to give them the confidence and belief in themselves they need to find and keep a job. **Additionally there are three one-week Summer programs** focusing on independent living, post-secondary success, and navigating the world of work.

**Courage Kenny SHARE Program** is a resource that provides people of all ages and abilities the opportunity to achieve physical and emotional fitness - and just have some fun. SHARE is a service of Courage Kenny Rehabilitation Institute, part of Allina Health, but our list of services includes those offered by other organizations. It’s a one-stop shop for activity listings and registration details in Minnesota and western Wisconsin.

**Duluth Center for Vision Loss** offers summer camps designed to sharpen skills needed for success, including Workforce Readiness, College Readiness, Self-advocacy, Mobility, Technology, Independent living, and much more. Students will learn core workforce readiness and adjustment to blindness skills. They will also be given the opportunity to socialize with peers from across the state and to participate in a wide array of recreational activities. The Lighthouse Transition Program is built on the understanding that “now is the time” that youth need to be developing certain core skills that are essential for their future.

**Gallaudet University Summer Youth Camps**

Our **Summer Youth Camps** are designed for middle and high school students up to the age of 19. Our programs provide stimulating summer learning and experiential opportunities that blend excitement, education, and enjoyment in a bilingual environment rich in cultural diversity and located just minutes away from the U.S. Capitol.

**Helen Keller National Center** offers programs to students who are DeafBlind which enable each person who is deaf-blind to live and work in his or her community of choice. HKNC offers individualized evaluation and training which will assist students in achieving their own definition of success. The emphasis for the student in the program is to participate in learning opportunities which will lead to successful employment and a full, enriched and independent life in the community. The philosophy of the Center is one of self-determination for all.

**Intermediate School District 917 Vision Program**  The Extended School Year Program will focus on the Expanded Core Curriculum (ECC) for students who are blind/visually impaired. ECC is used to define concepts and skills that often require specialized instruction with students who are blind or visually impaired in order to compensate for decreased opportunities to learn incidentally by observing others. For information, contact Lori Klein at 651-423-8170 or lori.klein@isd917.k12.mn.us

**Minnesota State Academy for the Blind (MSAB)** offers Summer School programming for elementary, Middle school and high school age students. Elementary School programs focus on elementary level academics as well as individual goals identified in student IEP’s. Middle and High school students will participate in activities encompassing the three areas of transition (postsecondary, employment, and independent living).
National Federation of the Blind offers a variety of local and national opportunities. The NFB BELL Academy is designed to provide intensive Braille instruction to blind and low-vision children during the summer months. EQ is a week-long learning opportunity that gets blind students excited about STEM by offering hands-on learning experiences. Visit www.nfb.org and www.nfbrmn.org for more information.

Summer Transition Program (STP) provides experiences to address the specific transition needs of students who are Blind, Visually impaired or DeafBlind.

STP complements each student’s core curriculum at their local school by providing individualized opportunities in the three transition areas identified in their Individualized Education Program (IEP). These unique transition activities, as part of the Expanded Core Curriculum, give each student the opportunity to increase independence in their school, home, community and work environments. Dates for 2019 are June 9-25.

Email Julie Kochevar at julie.kochevar@ahschools.us for information.

II. Summer Internship Opportunities

| The BrandLab          | Twin Cities Metropolitan  | The BrandLab classroom program offers students innovative and hands on in-class curriculum developed and taught by industry professionals. In partnership with a licensed teacher, a BrandLab Instructor collaboratively moves through the comprehensive 6 to 10 week long BrandLab curriculum where students will be introduced to brainstorming, problem-solving and creativity through the lens of marketing. Our hands-on approach ensures that students will learn the marketing process by executing a full-scale, holistic, creative campaign. Our program emphasizes access and exposure. We provide exposure to students by interacting with industry professionals through classroom volunteers and field trips. Students who complete The BrandLab course will:  
  • Gain experiential understanding of how to create successful marketing based in strategy, emphasizing target audience, key message, tone, branding, and tactics. | Attend and complete The BrandLab’s course curriculum at one of the listed partner schools:  
  • AGAPE High School  
  • Bloomington Kennedy High School  
  • Como Park Senior High School  
  • Edison High School  
  • FAIR High School

| **Specialty Healthcare – Student Summer Volunteers** |                           | program runs for eight weeks from mid-June through mid-August                                                                                                                                                                                                                                                                                                                                                                                                                                             | • Complete an online application (only for students who are ages 16 or 17 and are applying for summer volunteer positions).  
  • Submit one teacher or guidance counselor reference form by March 31.  
  • Have a parent or guardian print, sign and return a parent release form by March 31.  
  • Have a parent or guardian sign and return a teacher or guidance counselor reference form by March 31.  
  • Attend a personal interview at the hospital.  
  • Attend a volunteer orientation session in May.  
  • Be available to volunteer during weekday hours.  
  • Be comfortable interacting with children who have disabilities.  
  • Commit to maintaining patient confidentiality.  
  • Provide documentation of a TST (Mantoux) test.  
  • Provide vaccination information.                                                                                                                                                                                                                                                                                                                                                  | open from March 1 to March 14.                |
<p>| <strong>Three Rivers Park – Pathways Internship</strong> | Hennepin County           | The Pathways Internship program provides meaningful, hands-on opportunities for students and youth, primarily in the first-tier communities of Hennepin County, to explore the exciting possibilities of a career in parks and recreation. Three Rivers Park District offers a variety of opportunities through the Pathways Internship program, including Outdoor Education, Recreation, Park Maintenance, Community Engagement and more. Pathways is a paid internship opportunity.                                                                                                                  |                                                                                                                                                                                                                                                                  |                                               |</p>

<td><strong>Disability Rights Storytellers Fellowship</strong></td>
<td>National</td>
<td>The Disability Rights Storytellers Fellowship managed by <a href="https://www.rootted.com">Rooted in Rights</a> and AAPD provides the opportunity for individuals with disabilities to learn and apply skills in digital media storytelling, and to connect with media professionals to prepare participants for advanced careers in media production, journalism, online advocacy, or digital design. The project combines hands-on training in cutting-edge technologies with a strong foundation in developing each individual's voice and using story-driven videos in advocacy. Examples of past Storytellers Upon admission to the program, Rooted in Rights will send a pre-tested, pre-assembled video production kit to the Fellows. The fellowship kicks off with orientation sessions in which Rooted in Rights creative professionals and AAPD staff lead workshops on the history of disability justice, current policy issues, and the media's role in the disability rights movement as well as technical workshops focused on video technique, script writing, digital storytelling, basic camera composition, and video editing. The Fellows will begin using their kit and gain valuable hands-on experience right away. During the 6-month fellowship period, Fellows are expected to write and film two 3-4 minute videos. At every step in the process, the Fellows are a part of the Rooted in Rights production team – receiving feedback and guidance while being challenged creatively to make the videos as engaging as possible while also meeting the standards for quality and universal accessibility that all of our video projects demand. The Fellows will have the opportunity to ask questions and Rooted in Rights professionals will be available for one-on-one support. <strong>Hold a strong interest in disability rights advocacy and pursuing that work through digital media storytelling.</strong> <strong>NOTE:</strong> Applicants are not required to have prior experience producing digital media. <strong>Be able to commit to fully participate in the fellowship and meet all deadlines.</strong> Time commitments include Orientation sessions, digital meetings with media professionals, and weekly check-ins. <strong>Identify as a person with a disability. You will not be required to disclose your specific disability; however, your application for this program will signify that you consider yourself a person with a disability.</strong> <strong>NOTE:</strong> This is a program run specifically for people with disabilities by the American Association of People with Disabilities (AAPD) and Rooted in Rights. Those selected for this program will be involved in various disability-focused activities.</td>

| **Microsoft Ninja Camp**| Seattle, WA    | Microsoft NINJA Camp will prepare current seventh, eighth, ninth, and tenth grade students with disabilities for future careers in tech by providing training in an inclusive and fun environment. It's a multi-day experience that provides an in-depth look at Microsoft and the diverse careers available in tech.  
Participants will:  
  • Learn digital skills using Microsoft products  
  • Connect with Microsoft employees with disabilities in the workplace  
  • Grow in confidence by leveraging personal strengths | Must be in HS 9-12 grade and also identifies as a person with a disability. | Friday February 1st 2019 (Closed) |

mentoring. At the beginning of the fellowship, Rooted in Rights will work with each Fellow to arrange a schedule for choosing video topics, developing a production plan, filming, and editing to ensure timely completion of both videos.

In addition to hands-on workshops, the Fellows will participate in video chats and Q&As with media professionals, including people with disabilities, to receive advice on how to break into the media industry. AAPD will also work to connect the Fellows to internships and employment opportunities. Because work in the Storytellers Fellowship is not a full-time commitment and can be completed from anywhere, the Fellows would have the opportunity to begin work or internships simultaneously.

- College students with disabilities are encouraged to apply; however, this is not an academic Fellowship and is not restricted to college students. All individuals with disabilities who hold a strong interest in disability rights advocacy and who can commit to the time requirements are eligible to apply. This Fellowship can serve as a professional development opportunity for individuals who are already employed.

<td><strong>Silicon North Stars</strong></td>
<td>Minneapolis, Saint Paul</td>
<td>Founded in 2013, the mission of Silicon North Stars is to inspire and educate young Minnesotans to become future leaders in technology. We focus on equipping a select group of high potential, rising ninth graders from underserved communities in Minnesota with the inspiration and community they need to pursue careers in technology. We do this through two unique programming tracks. First, we bring each new class of Silicon North Stars to Silicon Valley for a one-week long tech camp. The second programming track for Silicon North Stars - meeting regularly with tech companies and startups in the Twin Cities.</td>
<td>Silicon North Stars chooses 16 students per year to enter our annual class. We do so through our partners in the Twin Cities: The STEP-UP program in Minneapolis, and Humboldt High School and Washington Technology Magnet High School in St. Paul. If you’re a student who’s been accepted into STEP-UP, Humboldt, or Washington Technology Magnet, please contact your administrator to find out how to apply for the program.</td>
<td>We are not accepting public applications at this time.</td>
